Your math is suspect. You used the following estimates:

2,183,460 - Estimated total number of annual responses
5 hours - Estimated time per response
118,863 hours - Estimated total annual burden hours

But ...
2,183,460 responses x 5 hours per response = 10,917,300 hours, not 118,863 hours.

I'm guessing that you cut-and-pasted data between this OMB Control Number request and OMB Control Number 1506-0055 (reports of transactions with foreign financial agencies).

1506-0054: 2,183,460 x 5 = 118,863
1506-0055: 2,183,460 x 301 = 118,863

Both are wrong, and both cannot have the same estimated number of responses.

Thank you
