Title: Overdose Data to Action Limiting Overdose through Collaborative Actions in Localities (OD2A LOCAL)

Project Id: 0900f3eb82001c7b

Accession #: NCIPC-PPEB-10/12/22-01c7b

Project Contact: Lawrence Scholl

Organization: NCIPC/DOP/PPEB

Status: Pending Clearance

Intended Use: Funding Determination

Estimated Start Date: 09/01/2023

Estimated Completion Date: 08/31/2028

Description & Funding

Description

Priority: Standard

Date Needed: 10/21/2022

Determination Start Date: 10/12/22

Description: This NOFO will fund 40 local jurisdictions to implement and evaluate overdose surveillance infrastructure building activities as well as several overdose prevention strategies that are required (i.e., linkage to and retention in care; harm reduction; clinician and health systems best practices) and optional (i.e., stigma reduction; health IT enhancements). Among these 40 jurisdictions, up to 20 will be funded to implement and evaluate drug product and/or paraphernalia testing and up to 20 will be funded to implement and evaluate surveillance of linkage to and retention in care.

IMS/CIO/Epi-Aid/Lab-Aid/Chemical Exposure Submission: No

IMS Activation Name: Not selected

Primary Priority of the Project: Not selected

Secondary Priority(s) of the Project: Not selected

Task Force Associated with the Response: Not selected

CIO Emergency Response Name: Not selected

Epi-Aid Name: Not selected

Lab-Aid Name: Not selected

Assessment of Chemical Exposure Name: Not selected

Goals/Purpose The central goal in Overdose Data to Action: Limiting Overdose through Collaborative Actions in Localities (OD2A: LOCAL) is to support city or county local health departments (LHDs), special district health departments and territories to use data to drive actions that reduce overdose morbidity and mortality in communities as fast as possible, with a primary focus on opioids and/or stimulants.

Objective: Funded recipients strengthen their overdose prevention and surveillance activities, with recipients achieving progress toward several long-term outcomes within the five years of this cooperative agreement: # Decrease nonfatal and fatal drug overdoses, overall and especially among disproportionately affected and underserved populations, with a primary focus on overdoses involving opioids and/or stimulants. # Reduce health inequities related to overdose by closing gaps in access to care and services. # Integrate harm reduction strategies and principles with a focus on meeting people where they are with empathy and in a non-judgmental manner. # Improve linkage to and re-engagement and retention in services, care, treatment, and recovery, with a focus on opioid use disorder (OUD) and stimulant use disorder (StUD). # Build overdose surveillance infrastructure. # Track and address emerging drug threats # Track linkage to and retention in care

Does this project include interventions, services, or policy change work aimed at improving the health of groups who have been excluded or marginalized and Yes

/or decreasing disparities?:

Project does not incorporate elements of health equity science: Not Selected

Measuring Disparities: Yes

Studying Social Determinants of Health (SDOH): Yes

SDOH Economic Stability: Not Selected

SDOH Education: Not Selected

SDOH Health Care Access: Yes

SDOH Neighborhood and Environment: Yes

SDOH Social and Community Context: Yes

SDOH Indices: Not Selected

Other SDOH Topics: Addressing disparities in overdose and achieving health equity are overarching goals within every strategy described within this NOFO. Activities must address overdose-related health disparities by implementing culturally-relevant interventions for those disproportionately affected by overdose and historically underserved, and work to overcome disparities in accessing care.

Assessing Impact: Yes

Methods to Improve Health Equity Research and Practice: Not Selected

Other: Not Selected
