

Paperwork Reduction Act Burden Disclosure Statement

This data is being collected to gather feedback and test knowledge of attendees for their understanding of the topic during the training session. The data you supply will be used for understanding where more training is needed and how to shape the content for future training sessions. The data will be collected through Mentimeter, which is an online tool that is free for users and easy to use. This tool is also interactive, which is one of the goals of the training team to spark discussion and engagement with the content presented in the training.

Public reporting burden for this collection of information is estimated to average 1 minute per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Office of the Chief Information Officer, Enterprise Policy Development & Implementation Office, IM-22, Information Collection Management Program (1910-5160), U.S. Department of Energy, 1000 Independence Ave SW, Washington, DC 20585; and to the Office of Management and Budget (OMB), OIRA, Paperwork Reduction Project (1910-5160), Washington, DC 20503.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

Submission of this data is voluntary.

Artificial Intelligence (AI) polling questions.

1. What are the potential benefits of implementing an AI judicial platform?
 - a) Minimizes judicial independence and increases bias
 - b) **Streamlines judicial processes and improves efficiency**
 - c) Increases the complexity of legal proceedings
2. How can a brain-computer interface assist individuals with physical and mental impairments?
 - a) By potentially creating neurological and physical side effects
 - b) **By enabling control of electronic devices through neural impulses**
 - c) By enhancing physical strength and agility to create super humans
3. What are the ethical concerns and potential risks associated with brain-computer interface technology?
 - a) Improved mental health and well-being
 - b) **Potential for manipulation and loss of autonomy**
 - c) Enhanced cognitive abilities and intelligence
4. True or False. AI is infallible and should be fully trusted.
 - a. True
 - b. **False**
5. AI is not useful for:
 - a) Summaries of documents
 - b) Code development
 - c) **Installing electrical equipment**
 - d) Basic customer service support
6. True or False. AI shows promise for assisting people with debilitating medical issues.
 - a. **True**
 - b. False
7. What is the most significant concern about third-party development of AI and LLMs?
 - a) The open nature of AI code
 - b) **The collection of personal information**
 - c) The developers can make mistakes
 - d) The AI or LLM may not integrate with other systems

8. When an artificial intelligence, particularly large language models (LLMs), generates incorrect, nonsensical, or fabricated information, even when it appears confident and authoritative, it is called a:

- a) Dream
- b) Fantasy
- c) Gibberish
- d) Hallucination

9. Beneficial use cases for AI-generated avatars include the following except:

- a) Allowing individuals to express their identity in virtual environments
- b) Resurrecting historical figures, creating dynamic learning opportunities
- c) Hiding individual identities during the commission of criminal activities
- d) Enabling family members and friends to better handle the loss of a loved one
