Dear VA - Please do not make the process harder than it has to be for student veterans currently at, or potentially attending, foreign schools and universities. Over the past 5-6 years, the VA made it nearly impossible for student veterans to obtain new foreign education program approvals made, and even to this day there are veterans who - through no fault of their own - have not been able to utilize their GI Bill educational benefits after being told their program was approved but then meeting barriers set forth by the VA.
