

Medicare.gov Webpage User Feedback Sessions

Do you submit CMS MIPS measures in one of the following performance categories: Quality, Improvement Activities (IA), or Promoting Interoperability?

If you meet the following criteria, you may be able to take part in a feedback session with Rainmakers Strategic Solutions to share your suggestions for improving, and experience using, the Medicare.gov webpage. **To participate in a feedback session, you must have a laptop or desktop computer and be one of the following:**

■ **Any healthcare provider that participates in Medicare, for example:**

- Primary Care Provider
- Specialists (e.g., cardiologists, endocrinologists, oncologists)
- Nurse Practitioners (NPs)
- Geriatricians
- Orthopedic
- Physical therapist
- Occupational therapist
- Podiatrists
- Dentist (DDO)
- Speech-language pathologists
- Behavioral health providers (e.g., psychiatrists, psychologists, licensed clinical social workers)

Clinicians with experience in Electronic Health Records (EHR) and Health Information Exchange (HIE) are encouraged to participate

You can't participate if you:

- Are a current or former Federal employee for the Department of Health and Human Services

How to Sign Up for a Feedback Session

To be considered for a feedback session, fill out an [interest form](#) by scanning the QR code and someone from Rainmakers will reach out to you about the next steps.

For questions about the feedback group, call us at 844-424-9377 or email the team at rainmakersoutreach@rainmakersolutions.com.

Join Our Network

To hear more on upcoming opportunities to share your voice, join the [Voice of the Patient Network](#).

What Is the Voice of the Patient Network?

The Voice of the Patient is a network managed by Rainmakers that connects people with opportunities to share their voice on important topics such as chronic diseases, health care, policies, professional experiences, and more. By joining the network, members can take part in activities such as surveys, focus groups, and listening sessions that can help shape health care.
