Greetings, I would like to note my opinion on "Form 1".  
Personally, any device that is added to a firearm should

1. not be taxed
2. not be registered to the "state".

This follows historical evidence or History and Tradition as noted in NY vs. BRUEN.

Additionally, there's no reason for photographs or signatures or asking for permission for any arm or accessory. Our Constitution simply doesn't allow for the State to babysit the population: technically, it's the other way around...the population is supposed to be watching over the State.

Any law that is in violation of the Federal Constitution is voided and nulled. There is a process for changing the Constitution, that many of our electors have forgotten or have decided to simply ignore.

Please continue to follow the Constitution and the rule of law laid down by our Forefathers who wanted a "simple" Federal Government to oversee the state governments.

Thank you.
