NAHMS Equine Event Study

Contact: NAHMS@usda.gov

The United States Department of Agriculture (USDA) National Animal Health Monitoring System (NAHMS) is conducting an Equine Event study. This study is an opportunity for event managers to provide their input on current equine health issues. This study will provide valuable data that will benefit the equine industry by:

- Guiding future research and education to benefit equine health,
- Helping to advance equine health to ensure continuation of safe and healthy equine events, and
- Describing biosecurity measures at events to reduce incidence of infectious diseases.

Your voluntary participation is essential to this important study. We are required by law to keep your answers confidential, and your responses on the surveys will be used only in combination with other responses. For more information about the study, please see (link to flyer). For more information about NAHMS, please see (link to Equine page).

You may complete the survey online by clicking on the link above and entering the 6-digit survey code listed above. If you are unable to complete the web-based survey and would prefer either a paper questionnaire or to complete the questionnaire over the phone, please contact me by phone or email. If you have any questions or comments about this study, we would be happy to talk with you. Our NAHMS toll-free number is (866) 907-8190.

Your participation ensures that we obtain reliable results that accurately describe the equine industry. Thank you very much for helping with this important equine study.

Sincerely,

EQUINE EVENTS STUDY

Do you manage or participate in equine events?

The NAHMS Equine 2026 study is an opportunity for event managers and participants to provide their input on current equine health issues. The study will examine biosecurity and health management strategies at 850 randomly selected events featuring varied disciplines, breeds, and venue sizes. The study will take place in 30 States for events occurring during 2026. Participation is voluntary and information provided is confidential. All results will be reported in an aggregated format. **Results will not be used for regulatory purposes, and none of the reported information will be traceable to a particular event or State.**

What happens if I agree to participate in the study?

NAHMS representatives will randomly select events and send managers an invitation to participate in the study. Event managers who agree to participate will receive a link to an online questionnaire to answer questions about their event. A NAHMS representative will then visit the venue during the event to answer any questions, conduct an on-site questionnaire, and obtain samples from the environment and participating equines to determine presence of certain pathogens.¹ Samples for respiratory pathogens will be held for at least 2 months before they are tested. All test results will be kept confidential and will not be traceable to a venue or event.

Why should I participate in the study if selected?

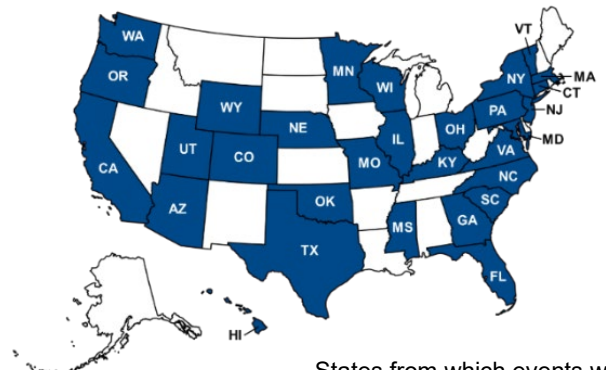

The study is expected to provide valuable statistics about equine events and information about ways to reduce the impacts of infectious diseases at events. The results will help advance equine health to ensure continuation of safe and healthy equine events. High response rates will ensure high-quality data that best represents the U.S. equine industry, so we encourage everyone who is selected to participate!
