## General Comment

I respectfully request that the federal government reconsider the proposal to cancel CDL and non-CDL licenses. My CDL is the only source of income I have, and I do not have any job opportunities outside of CDL work. My family and all of our living expenses fully depend on the income I earn through my CDL. If these licenses are cancelled, my career will end, and my family will lose our only financial support. I have invested years of training, money, and experience into this profession, and losing my CDL would have a devastating impact on our livelihood. I strongly urge you to protect CDL holders like me whose careers, families, and futures depend on this license.
