

required to be distributed to any beneficiaries is the smaller of:

1. The estate's or trust's adjusted basis in the property immediately before distribution, plus any gain or minus any loss recognized by the estate or trust on the distribution (basis of beneficiary), or

2. The FMV of such property.

If a section 643(e)(3) election is made by the fiduciary, then the amount entered on line 10 will be the FMV of the property.

A fiduciary of a complex trust or a decedent's estate may elect to treat any amount paid or credited to a beneficiary within 65 days following the close of the tax year as being paid or credited on the last day of that tax year. To make this election, see the instructions for Question 6 on page 30.

The beneficiary includes the amounts on line 10 in his or her income only to the extent of his or her proportionate share of the DNI.

Complex trusts. If the second tier distributions exceed the DNI allocable to the second tier, the trust may have an accumulation distribution. See the line 11 instructions below.

Line 11—Total Distributions

If line 11 is more than line 8, and you are filing for a complex trust that has previously accumulated income, see the instructions on page 30 to see if you must complete Schedule J (Form 1041).

Line 12—Adjustment for Tax-Exempt Income

In figuring the income distribution deduction, the estate or trust is not allowed a deduction for any item of the DNI that is not included in the gross income of the estate or trust. Thus, for purposes of figuring the allowable income distribution deduction, the DNI (line 7) is figured without regard to any tax-exempt interest.

If tax-exempt interest is the only tax-exempt income included in the total distributions (line 11), and the DNI (line 7) is less than or equal to line 11, then enter on line 12 the amount from line 2.

If tax-exempt interest is the only tax-exempt income included in the total distributions (line 11), and the DNI is more than line 11 (that is, the estate or trust made a distribution that is less than the DNI), then figure the adjustment by multiplying line 2 by a fraction, the numerator of which is the total distributions (line 11), and the denominator of which is the DNI (line 7). Enter the result on line 12.

If line 11 includes tax-exempt income other than tax-exempt interest, figure line 12 by subtracting the total of the following from tax-exempt income included on line 11:

1. The charitable contribution deduction allocable to such tax-exempt income, and
2. Expenses allocable to tax-exempt income.

Expenses that are directly allocable to tax-exempt income are allocated only to tax-exempt income. A reasonable proportion of expenses indirectly allocable to both tax-exempt income and other income must be allocated to each class of income.

Schedule G—Tax Computation
