

Revised 4/6/04

MEMORANDUM FOR Barbara M. LoPresti
Chief, Technologies Management Office

From: Alan R. Tupek
Chief, Demographic Statistical Methods Division

Subject: Specifications for the Computer Assisted Personal Interview
(CAPI) Quality Control (QC) Reinterview Blaise Instrument for
the 2011 Consumer Expenditure Diary (CED) Survey

I. Purpose

This memorandum documents specifications for the CAPI QC reinterview instrument for the 2011 CED Survey. These specifications are for a Blaise instrument. Use these specifications in conjunction with the memorandum, Specifications for a Generic Computer Assisted Personal Interview (CAPI) Quality Control (QC) Reinterview Blaise Instrument.

II. Quality Control Reinterview

CAPI original interviews and Type B and C noninterviews are eligible for a QC reinterview. The goal of the QC reinterview is to detect falsification by the field representatives or supervisory field representatives ((S)FRs). The reinterview instrument includes paths for telephone reinterviews and personal visit reinterviews.

III. Instrument Specifications

We broke down our specifications for the generic QC reinterview instrument into three major parts. The front specifications, Section XIII, include the screens that direct the reinterviewer to make contact, introduce himself/herself, and ask for the respondent. The middle specifications, Section XIV, include the roster verification screens and the survey specific questions used to determine whether falsification occurred. The back specifications, Section XV, include the thank you screens and the screens that set up callbacks, assign reinterview dispositions, and wrap up the case. This memorandum includes in those sections only those screens that are new or have changes to the generic specifications. For your convenience, we identify any additions or deletions on the generic screens with changes by highlighting the additions and striking out the deletions.

As in the generic specifications, we divide the display of a screen's info pane into the text section and the answer list section. Any text given in italics in the text section denotes read only information that is not said aloud by the reinterviewer. Display this italicized text in regular font in blue on the screen.

Attachment A, CED Reinterview Instrument Screen Index, provides the page number(s) of each screen (new or generic with changes) listed in these specifications. Attachment B, CED Reinterview Blaise Instrument Flowcharts, displays the pathing of all screens in the front, middle and back portions of the instrument. Attachment C, CED Reinterview Instrument Flowchart Index, offers an index to the screens in the flowcharts.

IV. Record-Typed Reinterview Input File

Attachment D contains the format of the Reinterview Sample Control Input File (SCIF) for the CED Survey. This Reinterview SCIF lists all of the variables by record type that are on the reinterview input file. The original instrument needs to set or initialize these variables, except for the few that come from the Demographic Statistical Methods Division (DSMD) generic reinterview system. DSMD creates the reinterview input files using the generic reinterview system.

Refer to the CED Reinterview SCIF in Attachment D for information regarding the description, length, and values of each of the variables required for reinterview. Record Type 8500 in Attachment D shows the generic household level variables in positions 1-83 and the generic person level variables in position 1-90. CED specific household and person level variables follow these positions.

The following is a list of only those reinterview input file variables utilized in the CED reinterview instrument. These variables are used either to set new variables, to "fill" entries on the screen, or to control pathing. The original instrument must set and output these variables. Some of these variables are used in the generic portions of the reinterview instrument. If the CED Survey uses a different name for any of these generic variables, the CED name is noted in the 'Description' column. Convert the variable's CED name to its generic name in the manipula script when extracting the original output for reinterview.

Name	Description	Record Type
RESPNAME	Respondent name	100001
AREA	Respondent's phone number area code	100001
PREFIX	Respondent's phone number prefix	100001
SUFFIX	Respondent's phone number suffix	100001

Name	Description	Record Type
EXTN	Respondent's phone extension	100001
HNO	Address - house number	2000
HNOSUF	Address - house number suffix	2000
STRNAME	Address - street name	2000
UNITDES	Address - unit designation	2000
PHYSDES	Address - physical description	2000
PO	Address - locality	2000
ST	Address - state abbreviation	2000
ZIP5	Sample unit address - ZIP code	2000
ZIP4	Sample unit address - ZIP4	2000
ORIOUT	Original outcome code - See Attachment E for values reset for reinterview * OUTCOME in CED original instrument - Convert OUTCOME to ORIOUT in manipula script	2550
ORIFR	Original FR code of (S)FR who completed the case * INTID in CED original instrument - Convert INTID to ORIFR in manipula script.	2550
BESTTIME	Best time to call	8000
BESTTIM2	Best time other	8000
NOSUNDAY	Do not call on Sunday	8000
CP1NAME ¹	Contact person 1's name	8000
CP1TITL ¹	Contact person 1's title	8000
CP1PHON ¹	Contact person 1's phone number	8000
CP1EXT ¹	Contact person 1's phone extension	8000
CP1ADD1 ¹	Contact person 1's address 1	8000

Attachment J specifies the screens required in the original instrument to collect the variable BYOBS and contact person information for original Type B and C noninterview cases. The original instrument must include these screens.

Name	Description	Record Type
CP1ADD2 ¹	Contact person 1's address 2	8000
CP1PO ¹	Contact person 1's address - PO/city	8000
CP1ST ¹	Contact person 1's address - state	8000
CP1ZP5 ¹	Contact person 1's address - ZIP code	8000
CP1ZP4 ¹	Contact person 1's address - ZIP4	8000
SPANONLY	Spanish speaking	8000
SPHONE	Second phone number for respondent or household	8000
PHTYPE	Type of phone for respondent or household	8000
SPHTYP	Type of phone for second phone number	8000
CP1PHT	Type of phone for contact person	8000
BYOBS ¹	Original case classified as a noninterview by: 1 = Observation only 2 = Information provided by contact person 0 or empty = Question not asked for an interview or Type A case	8500 (HH level)
INTDATE	Original interview date	8500 (HH level)
TYPEA_SP	Other Type A noninterview - write-in * TPAS_PK2 in CED original instrument - Convert TPAS_PK2 to TYPEA_SP in manipula script	8500 (HH level)
TYPEB_SP	Other Type B noninterview - write-in * TPBS_PK1 or TPBS_PK2 in CED original instrument - If PICK_UP1 = 233 and PICK_UP2 = 216, 219, 321, 322, 323, 324 or 325, convert TPBS_PK1 to TYPEB_SP in manipula script. Else convert TPBS_PK2 to TYPEB_SP in manipula script.	8500 (HH level)
TYPEC_SP	Other Type C noninterview - write-in * TPCS_PK2 in CED original instrument - Convert TPCS_PK2 to TYPEC_SP in manipula script	8500 (HH level)

Name	Description	Record Type
TOTAL_CU	Number of CUs	8500 (HH level)
NUMHOUSE	Number of persons in primary CU	8500 (HH level)
EPD	Earliest placement date	8500 (HH level)
PLCEDAT1	Diary 1 - Placement date	8500 (HH level)
PICKDTE1	Diary 1 - Pickup date	8500 (HH level)
PICK_UP1	Diary 1 - Pickup status code	8500 (HH level)
PLCEDAT2	Diary 2 - Placement date	8500 (HH level)
PICKDTE2	Diary 2 - Pickup date	8500 (HH level)
PICK_UP2	Diary 2 - Pickup status code	8500 (HH level)
ANYENTR1	Any entries for Week 1	8500 (HH level)
ANYRECAL1	Any items recalled for Week 1	8500 (HH level)
ANYENTR2	Any entries for Week 2	8500 (HH level)
ANYRECAL2	Any items recalled for Week 2	8500 (HH level)
NROSIZE	Number of records for Block 01 (ie. Original roster size)	8500 (person level)
LNO	HH composition - line number * MEMBNO in CED original instrument - Convert MEMBNO to LNO in manipula script	8500 (person level)
QCRESP	A flag indicating which household members are the respondents for complete original interviews. Place this flag on each person record. In the reinterview, the original respondent (that is, the person the (S)FR actually spoke to) is reinterviewed whenever possible. 1 = person (S)FR spoke to 0 = all other household members	8500 (person level)
FNAME	HH composition - first name	8500 (person level)
LNAME	HH composition - last name	8500 (person level)
AGE	HH composition - age	8500 (person level)

Name	Description	Record Type
REL	HH composition - relationship * CU_CODE1 in CED original instrument - Convert CU_CODE1 to REL in manipula script	8500 (person level)
SEX	HH composition - sex	8500 (person level)
PERSTAT	Status - delete/reinstate	8500 (person level)
AWAY_COL	HH composition - away at college	8500 (person level)
HH_MEM	HH composition - HH member	8500 (person level)
PERCUNUM	HH composition - CU number	8500 (person level)

V. Variables Set in the Reinterview Instrument

A. The CED original instrument sets outcomes and placement and pickup dates for both the Week 1 and Week 2 Diaries, but sets one final outcome (ORIOUT) for the case. As a result, it is necessary to set the new variable ORIOUT_I and to reset the input variables ORIOUT and INTDATE in the CED reinterview instrument in order verify the outcome for the appropriate week. Reset ORIOUT and INTDATE as follows:

1. Set ORIOUT_I = ORIOUT.
2. Reset ORIOUT, only after setting ORIOUT_I, as follows:

If ORIOUT_I = 201, ORIOUT = 201.

If ORIOUT_I = 203, ORIOUT = 203.

If ORIOUT_I = 204 and PICK_UP2 = 326, ORIOUT = 205.

If ORIOUT_I = 204 and PICK_UP2 ≠ 326, ORIOUT = PICK_UP2.

If ORIOUT_I = 206, ORIOUT = 206.

If ORIOUT_I = 207 and PICK_UP1 = 326, ORIOUT = 208.

If ORIOUT_I = 207 and PICK_UP1 ≠ 326, ORIOUT = 207.

If ORIOUT_I = 210 and PICK_UP1 = 216, 219, 321, 322, 323, 324, 325 (Type A noninterview) and PICK_UP2 = 326, ORIOUT = 211.

If ORIOUT_I = 210 and PICK_UP1 = 216, 219, 321, 322, 323, 324, 325 (Type A noninterview) and PICK_UP2 ≠ 326, ORIOUT = PICK_UP2.

If ORIOUT_I = 210 and PICK_UP2 = 216, 219, 321, 322, 323, 324, 325 (Type A noninterview) and PICK_UP1 = 326, ORIOUT = 212.

If ORIOUT_I = 210 and PICK_UP2 = 216, 219, 321, 322, 323, 324, 325 (Type A noninterview) and PICK_UP1 ≠ 326, ORIOUT = PICK_UP1.

If ORIOUT_I = 326 and PICK_UP1 = 326, ORIOUT = 209.

If ORIOUT_I = 326 and PICK_UP1 ≠ 326, ORIOUT = 326.

If $\text{ORIOUT_I} > 210$ and $\text{ORIOUT_I} \neq 326$, $\text{ORIOUT} = \text{PICK_UP2}$.

3. Reset INTDATE , only after resetting ORIOUT , as follows:

If $\text{ORIOUT} = 201$, $\text{INTDATE} = \text{PLCEDAT1}$.

If $\text{ORIOUT} = 203$, $\text{INTDATE} = \text{PLCEDAT1}$.

If $\text{ORIOUT} = 204$, $\text{INTDATE} = \text{PLCEDAT2}$.

If $\text{ORIOUT} = 205$, $\text{INTDATE} = \text{PLCEDAT1}$.

If $\text{ORIOUT} = 206$, $\text{INTDATE} = \text{PLCEDAT2}$.

If $\text{ORIOUT} = 207$, $\text{INTDATE} = \text{PLCEDAT2}$.

If $\text{ORIOUT} = 208$, $\text{INTDATE} = \text{PLCEDAT1}$.

If $\text{ORIOUT} = 209$, $\text{INTDATE} = \text{PLCEDAT1}$.

If $\text{ORIOUT} = 211$, $\text{INTDATE} = \text{PLCEDAT2}$.

If $\text{ORIOUT} = 212$, $\text{INTDATE} = \text{PLCEDAT1}$.

If $\text{ORIOUT} > 212$, $\text{INTDATE} = \text{PLCEDAT2}$.

Note: Set ORIOUT_I , ORIOUT , and INTDATE only once at initial entry. Do not reset if a case is reopened.

- B. The generic portions of the reinterview instrument use the following variables. Set these variables in the CED reinterview instrument as follows.

RPROXY_A This is a flag indicating whether a proxy is allowed in the reinterview. Set to

1 = proxy allowed in reinterview

OPROXY_A This is a flag indicating whether a proxy interview is allowed in the original interview. Set to

1 = proxy allowed in original interview

OPROXY_U This is a flag indicating for which household member a proxy was used in the original interview. However, since the use of proxies is not an issue, this flag is not set in the original instrument. Set $\text{OPROXY_U} = 0$.

SURVEY_NAME This is a string variable (200 characters in length) indicating the name of the survey. Set to

Consumer Expenditure Diary Survey

USE_CKSUP This is a string variable (three characters in length) indicating if the (S)FR needs authorization before

conducting a personal visit reinterview due to budget concerns. Set to

Yes = (S)FR needs authorization

<DISCREPANCY> This is an array of 16 elements. It contains a list of codes indicating the various discrepancies found during the reinterview. When the reinterview instrument indicates a discrepancy, the instrument will store the appropriate code in this array. Upon wrapping up a case, the DISCREPANCY array is copied into the Reinterview Notes.

ORIOUT_RSLT This is a string variable (four characters in length) indicating the type of original outcome for a case. Set, only after ORIOUT is reset, as follows:

If ORIOUT = 201,203, 205, 206, 207, 208, 209, 211, 212, 326, then ORIOUT_RSLT = INT.

If ORIOUT = 216, 219, 321, 322, 323, 324, 325, then ORIOUT_RSLT = A.

If ORIOUT = 217, 224, 225, 226, 228, 229, 231, 232, 331 or 332, then ORIOUT_RSLT = B1.

If ORIOUT = 233, then ORIOUT_RSLT = B2.

If ORIOUT = 240, 241, 243, 244, 245, 246 or 252, then ORIOUT_RSLT = C1.

If ORIOUT = 247, 248, 290, 341 or 342, then ORIOUT_RSLT = C2.

TYPE_D This is a string variable (three characters in length) indicating if the original survey has original Type D noninterviews. Set to

No = original survey does not have original Type D noninterviews.

VACANT_INT This is a string variable (three characters in length) indicating if the survey has vacant interviews. Set to

No = survey does not have vacant interviews.

REDESIGN This is a string variable (three characters in length) indicating if the survey has converted to the 2000 Sample Redesign. Set to

No = survey has not converted to the 2000 Sample Redesign.

PUERTO_RICO This is a string variable (three characters in length) indicating if the survey includes Puerto Rico addresses. This variable is set as follows:

No = survey does not include Puerto Rico addresses.

PV_ONLY This is a string variable (three characters in length) indicating if the survey requires all original interviews to be conducted by personal visit. This variable is set as follows:

Yes = All original interviews must be done by personal visit.

MIN_AGE This is a numeric variable (two characters in length) indicating the minimum age for an eligible respondent in the original interview. Set to

16 = minimum age for an eligible respondent

CONTACT_C_INFO(1-3) This is a three string variable (80 characters in length each) indicating some descriptive text for the survey to be filled on the CONTACT_C screen. Set to

CONTACT_C_INFO1 = your household and the

members who make up your household for the

CONTACT_C_INFO2 = Consumer Expenditure
Diary Survey?

CONTACT_C_INFO3 is empty

ROSTER_INFO(1-3) This is a three string variable (80 characters in length each) indicating some descriptive text for the survey to be filled on the ROSTER_3 and ROSTER_4 screens. Set to

ROSTER_INFO1 = doesn't have a usual residence
elsewhere or who wasn't away at college

ROSTER_INFO2 = on [Fill: INTDATE]

ROSTER_INFO3 is empty

TYPEB_SPLIT	This is a string variable (three characters in length) indicating if reinterview noninterview vacants and Usual Residence Elsewhere (UREs) need to be split between regular and seasonal. Set to No = vacants and UREs are not split between regular and seasonal
RIDATE	This is the date stamp that the CED reinterview instrument marks when a case is opened. Its format is mmddyyyy.
TIME_C	This is the time stamp that the CED reinterview instrument marks when a case is opened. Its format is hhmmss in military time.
OIRESP	This is a string variable (two characters in length) representing the line number of the original respondent. Set to the line number (LNO) of the household member with QCRESP = 1.

- C. Set the generic contact person information variables in the CED reinterview instrument as follows:

CPNAME	=	CP1NAME
CPTITL	=	CP1TITL
CPPHON	=	CP1PHON
CPEXT	=	CP1EXT
CPPHT	=	CP1PHT
CPADD1	=	CP1ADD1
CPADD2	=	CP1ADD2
CPPO	=	CP1PO
CPST	=	CP1ST
CPZP5	=	CP1ZP5
CPZP4	=	CP1ZP4

- D. The following variables are also set in the CED reinterview instrument according to the SPECIAL INSTRUCTIONS for screens in either these specifications or the generic specifications.

Name	Description
INTTYP	Method of reinterview T = telephone reinterview P = personal visit reinterview
LENGTH_T	Length of original interview in total minutes - (LENGTH_H x 60) + LENGTH_M
INCT_CNT	Tally of number of persons incorrectly included on the household roster
MISS_CNT	Tally of number of persons missing from the household roster
ITERATION	Counter for number of CUs checked
COUNT	Number of persons in the CU being checked
DEPENDENT	Tally of number of categories showing dependency in a single-person CU
INDEPENDENT	Tally of number of categories showing independency in a multi-person CU
INCT_CU	Tally of number of CU's incorrectly formed
OUTCOME	Reinterview outcome code - see Attachment F for values
RI_DISP	Reinterview disposition code - see Attachment F for values

E. Set BYOBS, when empty, for original Type B and C Noninterviews as follow:

If ORIOUT_RSLT = B1, B2, C1, or C2 and BYOBS is empty, set BYOBS = 1.

Set BYOBS, as defined above, after setting ORIOUT_RSLT and in the April reinterview instrument overlay and the May reinterview instrument only.

VI. Variables Passed between Case Management and the Reinterview Instrument

A. Variables from Case Management

1. Case Management sets ACTION based on OUTCOME. See Attachment F, CED Reinterview Disposition, Outcome and Action Codes, for values. This variable must be included in the reinterview output.
2. The reinterview instrument obtains the name of the (S)FR, variable FR_NAME, from Case Management.

3. The reinterview instrument obtains the reinterviewer's FR code, FRCODE, from Case Management. If the RO reassigns a case, it changes FRCODE in ROSCO. Case Management then passes the updated variable to the reinterview instrument.

B. Variables from Case Management and the Reinterview Instrument

1. The reinterviewer can update the sample unit phone number (AREA, PREFIX, SUFFIX, EXTN) and appointment time (CALLBACK) in both Case Management and the reinterview instrument. Case Management and the reinterview instrument pass these variables, with any updates, back and forth to each other.
2. Case Management and the reinterview instrument also pass the case ID (CASEID) and control number (CTRLNUM) back and forth to each other. These variables serve as identifiers for the case.

C. Variables from the Reinterview Instrument

1. The reinterviewer can also update the contact person phone number (CPPHON and CPEXT) in the reinterview instrument. The reinterview instrument passes these variables, with any updates, to Case Management. The CED reinterview instruments must reset these variables back to CP1PHON and CP1EXT when it passes them to Case Management.
2. The reinterview instrument sets OUTCOME and RI_DISP, as stated in Section V, above, and passes them to Case Management.

VII. Formats for Date and Time Variables

- A. Use the long format (day of week, month, day, four-digit year) to display all date variables in the CED reinterview instrument.
- B. Use the format hh:mm am/pm to display all time variables in the CED reinterview instrument.

VIII. Displaying the Sample Unit Address

Display the sample unit address in the CED reinterview instrument using format ADDRESS2. Screens that display the sample unit address are START, DIAL, INTRO_TC, HELLO_TNX, INTRO_TN, INTRO_PC, HELLO_PNX, ADDVER, INTRO_PN, VERBYOBS, PROX_N, PROX_UN, ROSTER_1, SOMEONE_ELSE, CONTACT_N, VACANT, STAT_VER, VACANT2, STATUS, STAT_PROBE, STAT_PROB2.

Format ADDRESS2 is for surveys that have not converted to the 2000 Sample Redesign (REDESIGN = No) and that do not include Puerto Rico addresses (PUERTO_RICO = No). This format uses the address variables on Record Type 2000 of the SCIF, Demographic Address, and is defined as follows:

[Fill: HNO HNOSUF STRNAME UNITDES]

[Fill: PHYSDES / blank]

[Fill: PO, ST ZIP5-ZIP4]

FILL INSTRUCTIONS

If PHYSDES not empty, fill PHYSDES.
Else leave blank, do not display item.

IX. Displaying the Household Roster

A. Display the household roster in the CED reinterview instrument as follows:

- Include all persons who have not been deleted in the original interview.
- Exclude a person from the household roster if **PERSTAT = 7 or 99**. This denotes a person deleted in the original interview (7) or a person the interviewer realizes he/she mistakenly listed when entering the household roster (99).
- Do not leave blank lines between persons included in the household roster. Rather, condense the listing to compensate for any deleted person.
- List household members first (HH_MEM = 1), followed by non-household members (HH_MEM = 2). Gray the listing of all non-household members.

Generic screens that display the household roster are: HHCOMP, RIRESP, ROSTER_1, ROSTER_2, ROSTER_3, and ROSTER_4.

B. Other CED survey specific screens that display the household roster are SINGLE_RELATED, SINGLE_HOUSING, SINGLE_FOOD, SINGLE_OTHER, MULTI_RELATED, MULTI_HOUSING, MULTI_FOOD, and MULTI_OTHER. These screens have the additional specifications:

- List only household members (HH_MEM=1).
- Gray any household member whose PERCUNUM ≠ ITERATION.

X. Access to Original CAPI Notes and Reinterview Notes

Within the CED reinterview instrument, provide access between the instrument and the original CAPI notes and the reinterview notes. Both the original CAPI notes and the reinterview notes are separate text files maintained outside the instrument.

- Allow the reinterviewer access to only view the original CAPI notes.
- Allow the reinterviewer access to enter, view, or edit the reinterview notes.

XI. Function Keys

Descriptions of the functions keys are listed below. These keys comply with the listing of Keys Assignments for Consumer Expenditures Survey, dated July 25, 2000.

The "F" Keys

F1	
F2	
F3	
F4	
F5	
F6	
F7	Item notes/remarks
F8	
F9	
F10	Exit - Skip to the END of the reinterview (FIN screen)
F11	
F12	

The "Shift-F" Keys

Shift-F1	Display the household roster (HHCOMP screen)
Shift-F2	Display the Survey Frequently Asked Questions (FAQs) (H_PURPOSE screen)
Shift-F3	Display the Reinterview FAQs (RIREASON screen)
Shift-F4	
Shift-F5	
Shift-F6	
Shift-F7	
Shift-F8	
Shift-F9	
Shift-F10	
Shift-F11	Display standard abbreviations (H_ABBREVI screen)
Shift-F12	Display original CAPI notes

The "Ctrl" Keys

Ctrl-D	Don't know (D)
Ctrl-K	Display function key descriptions (KEY_REF screen)
Ctrl-R	Refusal (R)
Ctrl-F7	Access reinterview notes

Special Purpose Keys

Esc	Cancel
Home	Moves to beginning of form
End	Moves to first unanswered field on path
Page Up	Moves backward one page/screen
Page Down	Moves forward one page/screen
Up Arrow	Move upward or backward one field
Down Arrow	Moves downward or forward one field
Left Arrow	Moves to previous field
Right Arrow	Moves to next field

XII. Refreshing OUTCOME = 202 Cases

If the CED reinterview instrument is exited with OUTCOME=202, refresh the case upon reopening the instrument, except for the following:

- Maintain the variables ORIOUT_I, ORIOUT, and INTDATE, as set at initial entry. DO NOT RESET.
- Maintain the reinterview input file variables and any updates to them (example, phone number changes).
- Maintain CALLBACK and the case's history in Case Management.

XIII. Front Specifications

The screens for the front of the instrument appear in this section.

- **UNIVERSE** - RIREASON = 3

<p><i>Don't you have anything better to do with my tax dollars? I'm too busy to answer your questions again.</i></p>
<p>The Bureau of Labor Statistics uses the data from this survey to measure the changes in prices in consumer goods and services. Information collected in this survey contributes to the Consumer Price Index, which assesses the change in purchasing power of consumer dollars. The Census Bureau's method of measuring data quality for this survey is to re-contact a percentage of respondents to check that the data was collected correctly during the original interview. We believe this method helps the Census Bureau prevent the wasting of your tax dollars.</p>

- **SPECIAL INSTRUCTIONS**

This screen is a reference screen accessed by the Shift-F2 key.

This FAQ menu screen is the same as that in the original instrument.

- **UNIVERSE** - H_PURPOSE = 1

What is this survey all about?

Who uses this information?

The Consumer Expenditure Diary Survey collects information from households and families on their buying habits. It helps us to understand what products and services are bought and how much is spent.

This survey has a number of uses. The most important is the periodic revision of the Consumer Price Index. The Consumer Price Index provides cost of living and wage adjustments, social security payment adjustments, and helps determine the cost of school lunches.

NEW SCREEN

- **UNIVERSE** - H_PURPOSE = 3

*How long will this take?
How many times will you visit?*

I will be here a short time today to ask a few questions about you household. I will also drop off your first diary. How long it will take to write your expenses each day depends on how many things you buy. Some days you may have nothing to record, other days you may have a lot to record. It averages out to about 15 minutes a day.

After today, I will return in a week to pick up your completed diary and drop off the second diary. At the end of the second week, I will return to pick up the second completed diary and ask a few final questions.

Who is going to see what I write down?

Your names and addresses are removed from what you report in the diaries. All Census Bureau employees take an oath of confidentiality and are subject to fines and imprisonment if they improperly disclose information provided by people like you. All information collected is used for statistical purposes only.

Is this survey real?

Yes. The Bureau of Labor Statistics conducts the Consumer Expenditure Diary Survey under the authority of Title 29 of the U.S. Code. Congress authorizes the financial support for the CE survey through Public Laws 94-439 and 95-205.

The Census Bureau collects the CE data under the authority of Title 13, U.S. Code, Section 8b, which allows the Census Bureau to undertake surveys for other government agencies. Participation in the survey is voluntary. Under Title 13, the Census Bureau holds all information in strict confidence. We will not release information reported in the survey which would permit the identification of a household or any of its members to anyone outside of the Census Bureau.

Return to reinterview if accessed by the Shift-F1 key.

XIV. Middle Specifications

The screens for the middle of the instrument appear in this section. Response choices in italics are blind don't knows or refusals. Do not show these choices, but allow the reinterviewer to enter Ctrl-D for "don't know" (D) or Ctrl-R for "refusal" (R), where noted. Output "don't know" as "9" and fill with preceding "9"s if variable length > 1. Output "refusal" as "8" and fill with preceding "8"s if variable length > 1. If a screen has eight or nine response choices, and allows "don't know" or "refusal," length = 2 for the variable to differentiate between a response choice of 8 or 9 and a "don't know"(99) or "refusal" (98).

XV. Back Specifications

The screens for the back of the instrument appear in this section. A list of the reinterview disposition (RI_DISP), outcome (OUTCOME) and action (ACTION) codes appear in Attachment F, CED Reinterview Disposition, Outcome, and Action Codes. The reinterview instrument sets the reinterview disposition and outcome codes. Case Management assigns the action code based on the reinterview outcome code.

Your reinterview detected multiple discrepancies.

◆ Enter the code of the detected discrepancy which best describes this case.

1. Respondent said no one contacted household.
2. You determined original status, ~~201 - Interview~~, incorrect.
6. Respondent indicated original status incorrect.
7. Household roster incorrect.
8. Not all original survey questions asked.
9. (S)FR conducted a telephone interview only when personal visit required.
10. Case done by a personal visit and respondent said laptop not used.
12. CU make-up incorrect.
13. Respondent said diary not placed.
14. Respondent said CU either a) had expenses for blank diary, b) did not record or have recalled expenses for completed diary, or c) did not have recalled expenses for Type B-326 diary.
15. Respondent indicated Week 1 Type B status incorrect for a Week 2 interview.
16. Contact person not responsible for care of Type B-217 (temporarily absent) unit.
