General Comment

Please do not make changes to this document. To my knowledge and understanding, it is working as intended.

However, understanding that an OMB form needs to be reviewed every 3 years, please do not require that the effective date be changed from 07/10 to 07/13 in the footer section.

Even this minor change will require that paper and electronic forms of this document be updated so that the clinician responsible will assured he/she is using the 'current version' of the OMB form. The cost and burden of changing even just the revision date for unit based paper versions or those available electronically is unnecessary.

Suggest a notice in the Federal Register that the form has not been revised and that it is permissible to use the form version 07/10.

Thank you.
