Re: Docket No. APHIS-2011-0060  
Proposed Rule: Importation of Fresh Citrus from Uruguay

Dear Sir/Madam:

We are writing in full support of the Animal Plant Health Inspection Service Docket No. APHIS-2011-0060, that allows for the importation into the Continental United States fresh citrus from Uruguay under certain conditions. We anticipate that all risk mitigation procedures will be vigorously implemented by the growers and packing house operations in Uruguay, and the U.S. consumers will benefit from the additional source of high quality citrus.

Lucca Freezer & Cold Storage has been in the produce business for over 30 years. We are one of the largest packers of imported citrus on the east coast. If Uruguay fresh citrus is granted entry into the US it will help to create numerous jobs throughout the supply chain.

Our interest in the USA summer citrus market is consumer driven. The consumption of citrus during the summer months has expanded over the past decade from 20,000 metric tons to 200,000 tons, based on a high percentage of consumers who want fresh citrus 12 months of the year. These consumers are heavy users who purchase citrus for taste and wellness attributes. There is limited domestic citrus production during the summer months and no production of Mandarins. During this period, Uruguay produces the citrus varieties preferred in the U.S. market and this supply will complement the other sources within the Southern Hemisphere.

We commend APHIS for this decision and we urge the USDA to adopt and to implement this rule.

Respectfully submitted

Re: Docket No. APHIS-2011-0060  
Proposed Rule: Importation of Fresh Citrus from Uruguay

Dear Sir/Madam:

We are writing in full support of the Animal Plant Health Inspection Service Docket No. APHIS-2011-0060, that allows for the importation into the Continental United States fresh citrus from Uruguay under certain conditions. We anticipate that all risk mitigation procedures will be vigorously implemented by the growers and packing house operations in Uruguay, and the U.S. consumers will benefit from the additional source of high quality citrus.

OHL International is a Customs Broker, Freight Forwarder and Warehousing concern headquartered in Philadelphia PA. We have been in business since 1968, specializing in the import clearances of fruits and vegetables from a variety of countries. Implementation of the proposed rule would open up additional markets for our customers importing fresh citrus fruit including the Citrus hybrids and the Citrus-related genus Fortunella from Uruguay. This in turn would create jobs and support the expansion of the summer citrus market. OHL will support both the growers and importers adherence to all conditions of entry established under the proposed rule.

Our interest in the USA summer citrus market is consumer driven. The consumption of citrus during the summer months has expanded over the past decade from 20,000 metric tons to 200,000 tons, based on a high percentage of consumers who want fresh citrus 12 months of the year. These consumers are heavy users who purchase citrus for taste and wellness attributes. There is limited domestic citrus production during the summer months and no production of Mandarins. During this period, Uruguay produces the citrus varieties preferred in the U.S. market and this supply will complement the other sources within the Southern Hemisphere.

We commend APHIS for this decision and we urge the USDA to adopt and to implement this rule.

Respectfully submitted,

Re: Docket No. APHIS-2011-0060  
Proposed Rule: Importation of Fresh Citrus from Uruguay

Dear Sir/Madam:

I am writing in full support of the Animal Plant Health Inspection Service Docket No. APHIS-2011-0060, that allows for the importation into the Continental United States fresh citrus from Uruguay under certain conditions. We anticipate that all risk mitigation procedures will be vigorously implemented by the growers and packing house operations in Uruguay, and the U.S. consumers will benefit from the additional source of high quality citrus.

Maersk Line is the largest global ocean carrier and one of the premier carriers of refrigerated produce serving the US economy. We are proud of our comprehensive array of transportation services which includes advanced refrigeration technology for the citrus market. These services have brought significant access and year-round benefit to American consumers. The consumption of citrus during the summer months has expanded over the past decade from 20,000 metric tons to 200,000 tons because American consumers now demand fresh citrus 12 months of the year. During this period, Uruguay produces the citrus varieties preferred in the U.S. market and this supply will complement the other sources within the Southern Hemisphere.

We commend APHIS for this decision and we urge the USDA to adopt and to implement this rule.

Respectfully submitted,

Clint Eisenhauer
