A Message from the Director, U.S. Census Bureau...

To: Health Care Facility Administrator

Your facility has been randomly selected to participate in a very important national survey conducted by the U.S. Census Bureau called the **American Community Survey** (ACS). The ACS is an on going survey that tells us what the population looks like and how it lives. A sample of residents who live or stay in your hospitals, nursing facilities/skilled nursing facilities, and inpatient hospice facilities is included in the ACS. Participating in the ACS is important and also *required by law* (Title 13, United States Code, Sections 141, 193, 221, and 223).

Estimates from the ACS are used by federal, state, local, and tribal governments, as well as by private nonprofit organizations and communities. For example:

- Local governments use these estimates for budgeting, evaluating programs, and planning for community development projects, such as those for the older population, hospitals, and senior centers.
- Other organizations use this information to provide services to the community and to plan or establish new facilities, buildings, and programs.
- Administrators at your own facility may use ACS estimates themselves.

Throughout the year, representatives for the ACS contact different facilities, such as hospitals, nursing facilities/skilled nursing facilities, and inpatient hospice facilities. During the next month, one of our ACS field representatives will contact you or someone in your office to discuss the survey and to schedule an appointment to visit your facility.

The field representative will:

- answer any questions you may have about the ACS or about interviewing residents of your facility.
- collect and verify basic information about your facility, such as the facility name and address.

- ask for a list of residents who are currently living or staying at your facility to establish a basis for their sample.
- select a random sample of residents to take part in the ACS.
- interview the selected residents. If a resident is unable to participate in an interview, the field representative will work with you to determine if there are other ways to get the needed information.

Selected residents will be asked to respond to the ACS and provide information about various topics, such as education, military service, insurance coverage and disability. ***All the information the U.S. Census Bureau collects is confidential by law (Title 13, United States Code, Section 9).***

Your cooperation is essential to the success of the ACS, and the field representative may need your assistance in collecting survey information from the sample of residents. The field representative will need access to the residents chosen. For those residents who cannot complete the survey, according to the Health Insurance Portability and Accountability Act of 1996 (HIPAA), to the extent required by Title 13 or other law, an organization or facility covered by HIPAA is permitted under the Privacy Rule to disclose protected health information to the Census Bureau for survey purposes.

The enclosed brochure provides answers to frequently asked questions about the ACS. If you want to learn more about the ACS, please visit the Census Bureau's Web site at census.gov/acs.

If you have further questions, please call the Census Bureau's Atlanta Regional Office toll-free number at 1-800-424-6974 (ext. 53955), and ask for the ACS supervisor.

Thank you in advance for your cooperation, and we look forward to working with you.
