RE: Docket Number – PHMSA-2013-0124

AllTransPack, Inc (ATP) is interested in taking part in the paperless hazard communications pilot program referenced under Docket number PHMSA-2013-0124.

ATP is an independent packaging and crating company that specializes in performing the required pre-transportation functions of 49 CFR on behalf of offerors of hazardous materials (dangerous goods) for all modes of transport. ATP's Hazardous Materials Operations Department is fully staffed with seven full-time HM Specialists who are trained and qualified to prepare and certify hazardous materials shipments for all modes.

Shipping paper certifications processed by ATP average approximately 200 per month.

The types and quantities of hazardous materials prepared and certified by ATP vary greatly.

We are located in Sterling, VA next to Dulles International Airport and have the e-systems capabilities required to partake in the program.
