9/12/2013

Docket Management System, U.S. Department of Transportation, Docket Operations, Routing Symbol M-30, West Building, Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

Department of Transportation
Pipeline and Hazardous Materials Safety Administration
Docket No. PHMSA-2013-0124, Notice No. 13-7

To whom it may concern,

Cardinal Health Nuclear Pharmacy Services requests to submit a statement of interest to volunteer in Title III, Section 33005, of the Hazardous Materials Transportation Safety Improvement Act of 2012 (H.R. 4348), also referenced as the "Moving Ahead for Progress in the 21st Century Act" (H.R. 4348, "MAP-21") pilot program.

Organization

Cardinal Health Nuclear Pharmacy Services operates as a specialized pharmacy practice area that involves the preparation and dispensing of radiopharmaceuticals. We operate a network of Positron Emission Tomography (PET) biomarker manufacturing facilities and nuclear pharmacies that dispense and deliver time-critical, patient-specific radiopharmaceuticals for diagnostic imaging and therapy.

Stakeholder Type

Cardinal Health Nuclear Pharmacy Services acts as both a shipper and carrier. We have the ability to assist emergency response organizations (law enforcement, hazmat, fire departments) with radiation safety concerns.

Locations

Cardinal Health Nuclear Pharmacy Services maintains a corporate home office in Dublin, Oh. Currently, we operate a nationwide footprint of nearly 140 nuclear pharmacies and 37 PET biomarker manufacturing facilities within the United States. Our facilities are centralized to service multiple customers to deliver patient-specific doses to 95% of hospitals within 3 hours.

Capabilities

We act as both an offeror and interstate carrier of hazardous material. More specifically, the cargo offered and carried is Class 7 Radioactive White-I, Radioactive Yellow-II, Radioactive Yellow-III hazardous material. To service our customers, Cardinal Health Nuclear Pharmacy Services operates a fleet of over 1,300 vehicles and 1,700 drivers. Recently, we have instituted electronic web-ordering systems, digital invoicing, route optimization, and proof-of-delivery systems. These systems give us "real time" visibility to shipments and are tracked via the internet and GPS.
