## General Comment

PROHIBIT all cigarettes!!!! They kill people, it's a known fact.

Urea is found in cat pee and is also in cigarettes

Methane is found in dog poop and also in cigarette smoke.

Big Tobacco's products kill 1075 smokers every day.

Big Tobacco's products kill 137 people from secondhand smoke everyday.

one tobacco company called younger adult smokers "replacement smokers." You know, because half of their older adult smokers end up dead.

In the U.S. 1200 people die every day from tobacco related disease. For the tobacco industry, this is just business as usual.

902,628 pounds of toxic chemicals were released by tobacco product manufacturing facilities in the US in 2011. There goes the neighborhood!

In just one year, about 12,000 kids lost their mothers to tobacco-related disease in the U.S.

The tobacco industry's products kill around 36,000 people each month. That's more lives than there are public garbage cans in NYC.

A Big Tobacco document shows they worried publishing radioactive Polonium-210 in cigarette smoke would be like "waking a sleeping giant."

Big Tobacco's products kill someone every 6 seconds.

Big Tobacco's products kill more than shark attacks, yeti attacks, fires, floods, sky diving accidents, car crashes, and murder combined.

Cigarette smoke contains arsenic, which used to be found in rat poison.
