Comment

the fact is there is little law enforcement of this law by aphs. many many places sell whatever they want, no matter what the import status is. and as far as forfeiture, there is zero enforcement to ever stop any of these ag profiteers from selling the crap products that have become major invasives in the usa. this allowance of invasives is costing american taxpayers billions of dollars per year, but aphs does nothing.

aphs needs a clean out. they are the killers of so many kinds of animals and they do it in the most sneaky way possible. they never tell people who live there they are going to poison hundreds of thousands of birds. they just come in and do it and then the homeowner finds hundreds of dead birds on his lawn. they also put out the most m44 toxic chemical to kill predators, because the hunters dont want any predators around because they want to be the predator. the dastardly horrific things done by this awful agency are all for the ag profiteers, who call in sneakily and unidentifiable to get killings and murders done of wildlife and birds.

this agency needs to be shut down. its budget needs to be cut to zero. they are the sneakiest thing around. no transparency here. and they kill and murder and brutalize to the nith degree. and they arent keeping out invasives. america is filled with them and all being sold at ag and nursery stores. the public is getting scammed and ripped off by this agency. the general public pays the taxes to get ripped off by aphs. this agency deserves a grade of f minus
