I oppose this collection of information from wildlife killers. these refuges were named as peaceful and tranquil places and allowing wildlife gun wackos into them defeats the whole idea of this use. there should be zero hunting permits in refuges. even the name shows that the original sset up of these lands was not to let evil, vicious, degenerate gun wackos into these sites to kill. I am totally opposed to this 50 year old law and believe there needs to be rethinking of what taxpayers are funding here. general taxpayer funds for 325 million americans are used for these sites and none of them can use these sites when the few wildlife killers are out there with their weapons of murder and killing and wounding. that is wrong. its time to amend these laws. we cannot continue to be gouged for tax dollars to support the evil, vicious, degenerate wildlife murderers that dan ash wants put in there. it is inconceivable that a wildlife murderer like dan ash would be put in charge of this agency and so inappropriate and disgusting. this comment is for the public record. please receipt. jean publi jeanpublic1@yahoo.com

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee), as amended (Administration Act), and the Refuge Recreation Act of 1962 (16 U.S.C. 460k-460k-4) (Recreation Act) govern the administration and uses of national wildlife refuges and wetland management districts. The Administration Act consolidated all the different refuge areas into a single Refuge System. It also authorizes us to permit public uses, including hunting and fishing, on lands of the Refuge System when we find that the activity is compatible and appropriate with the purpose for which the refuge was established. The Recreation Act allows the use of refuges for public recreation when the

use is not inconsistent or does not interfere with the primary purpose(s) of the refuge.

We administer 373 hunting programs and 271 fishing programs on 408 refuges and wetland management districts. We only collect user information at about 20 percent of these refuges. Information that we plan to collect will help us:

Administer and monitor hunting and fishing programs on refuges. Distribute hunting and fishing permits in a fair and equitable manner to eligible participants. We use nine application and report forms associated with hunting and fishing on refuges. We may not allow all opportunities on all refuges; therefore, we developed different forms to simplify the process and avoid confusion for applicants. The currently approved forms are available online at <http://www.fws.gov/forms/>. Not all refuges will use each form and some refuges may collect the identical information in a nonform format. We use the following application forms when we assign areas, dates, and/or types of hunts via a drawing because of limited resources, high demand, or when a permit is needed to hunt. We issue application forms for specific periods, usually seasonally or annually. FWS Form 3-2354 (Quota Deer Hunt Application). FWS Form 3-2355 (Waterfowl Lottery Application). FWS Form 3-2356 (Big/Upland Game Hunt Application). FWS Form 3-2357 (Migratory Bird Hunt Application). FWS Form 3-2358 (Fishing/Shrimping/Crabbing Application). We collect information on: Applicant (name, address, phone number) so that we can notify applicants of their selection. User preferences (dates, areas, method) so that we can distribute users equitably. Whether or not the applicant is applying for a special opportunity for disabled or youth hunters. Age of youth hunter(s) so that we can establish eligibility. We ask users to report on their success after their experience so that we can evaluate hunting/fishing quality and resource impacts. We use the following activity reports, which we distribute during appropriate seasons, as determined by State or Federal regulations. FWS Form 3-2359 (Big Game Harvest Report). FWS Form 3-2360 (Fishing Report). FWS Form 3-2361 (Migratory Bird Hunt Report). FWS Form 3-2362 (Upland/Small Game/Furbearer Report). We collect information on: Names of users so we can differentiate between responses. City and State of residence so that we can better understand if users are local or traveling. Dates, time, and number in party so we can identify use trends and allocate staff and resources. Details of success by species so that we can evaluate quality of experience and resource impacts. II.
