What is Research and Development (R&D)?

R&D is planned, creative work aimed at discovering new knowledge or developing new or significantly improved goods and services. This includes a) activities aimed at acquiring new knowledge or understanding without specific immediate commercial applications or uses (basic research); b) activities aimed at solving a specific problem or meeting a specific commercial objective (applied research); and c) systematic use of research and practical experience to produce new or significantly improved goods, services, or processes (development).

Does R&D include development of software and Internet applications?

Only development of software and Internet applications that include an element of uncertainty and that are intended to close gaps and meet scientific and technological needs should be reported as R&D on this survey

R&D activity in software includes:

- Development of new software
- Significant improvement of existing software
- Construction of new theories and algorithms in the field of computer science

R&D activity in software does NOT include:

- Creation of new software based on known methods and applications

- Conversion or translation of existing software and software languages
- Adaptation of a product to a specific client, unless knowledge that significantly improved the base program was added in that process
- Routine debugging of existing systems and software

Domestic full-time equivalents (FTEs)

5-7 Of the domestic R&D employees reported in Question 5-6, line d, what was the number of domestic full-time equivalent (FTE) R&D employees?

The number of full-time equivalent R&D employees may differ from the number of R&D employees reported in Question 5-6. Count each R&D employee who works full-time on R&D activities as 1 FTE. Count each R&D employee who works part-time on R&D activities using the fraction of the time he/she devotes to R&D activity. For example, an R&D employee who works half-time on R&D activity would be counted as one-half (1/2) of an FTE employee. Similarly, a full-time employee who devotes 25% of her time to R&D would be counted as one quarter (1/4) of an R&D FTE employee.
