What is the purpose of these "E-logs" safety you say? Well that's exactly opposite what will it do when implemented! It will force drivers like me who currently drive 58-60 mph to run top speed whatever allowed, and to be honesty with you I don't feel safe going 70-80 in Texas or even 65 is other states. Who will compensate drivers for westing time while being loaded or unloaded for hours and hours? I've spent 20 hours two days ago getting loaded. What about delivery times and missed appointments? You all want to shop and have things to buy but you also want to tell me when to drive, when to sleep, when to take a break! It's clear that you are behind huge companies and e-logs are only driven to make money and safety is a smoke behind it. How most of you have jobs it blows my mind anyway! This government needs to back up before it gets smacked up! This industry needs more room to breathe not less. Have you ever been behind a wheel at one of these rigs, do you know what it takes to run it? Do you know under what kind of stress drivers are? Well it's bad and it's only getting worst with your control.

Keep doing it uncle same, keep pushing us to the point of no return!

We did it once and we WILL do it again if needed!
