I would like to submit the following comments regarding the proposed 366B changes.

- **Our state has no way to track and/or identify the following:**
 - Cases that are not referred for an ADH but have an IHE established – All dropped cases are only identified as a dropped case and we do not distinguish between dropped with an IHE or dropped with no IHE.
 - Cases that are not referred for an ADH and do not have an IHE established - All dropped cases are only identified as a dropped case and do not distinguish between dropped with an IHE or dropped with no IHE.
 - Average Number of days per investigation – Based on our current system's data, it would be very difficult to provide an accurate number.

Most importantly, I think it is necessary to give the states ample time in advance to request system changes prior to requiring data that our current systems cannot produce.

Thank you,

Jody Dalbec
