Title: Petition to classify orphan as an Immediate Relative, Application for Advance processing of an orphan petition, supplement 1, Listing of an Adult Member of the Household .Form I-600,I-600A

First of all let understand the word orphan. Orphan can be define as when someone that once have parent turn not to have those parent again for life or someone that as no father or biological mother in which he/she is being taking care of by an Organization/Government /NGOs .Some children turn to be an orphan due to the sudden death of their parent in which family member like Aunty, Grandmother, Uncle or any other relatives we're in charge of the affaire of taking care of such child and some children we're abandon by the so called parent in which government intervene in the affaire of such children.

USCIS should understand that before any child can be consider as immediate relative of another family certain document as to be presented to show why that child is changing status, the same thing apply to any orphan before an orphan can be consider as immediate relative of another member of the family necessary document as to be presented to show the reason the family decided to take him/her into their family to become an immediate relative so as to make processing of a petition to sound meaningful. While putting all the illustration together I feel there is no way an orphan could become an immediate relative of any family member without eventually passing through the system of adoption before he/she can be consider as genuine member of another family under necessary regulation and the law guided by the constitution.

For these reasons if the USCIS create a petition to classify orphan as an immediate relative in a certain forms called Form I-600 and I-600A under which immigration rules and laws would the form be adjudicated and under which constitution would the processing of such Form I-600 and I-600A will be best determine and the supporting documentation that is going to be presented.

Lastly to my own opinion as a USCIS stakeholder I think this classifying of an orphan as an immediate relative is another terms of English which is describe or illustrate as Adoption because any family that as decided to turn an orphan to immediate relative, as definitely adopted the child under the current law which I read under the regulation and laws guided by the United State constitution because I'm a foreigner. Unless the USCIS want to simplify adoption processing or make the adoption processing to be more easier for many U.S Citizen in which their will be a creation of another version of Forms and Titles which I think ;Petition to classify orphan as an immediate relative is not the best title to describe such Idea.

Thanks

God Bless America
