Hi Christopher,

Sorry for the delay. The number of responses and time estimates for line items 2 through 5 in the first table generally appear reasonable to us based on Point Thomson experiences. For the first line item (Application for Procedural Regulations), was the "total annual burden hours" divided by 5 to arrive at an annual estimate of 300 hours (so 1,500 total hours every 5 years)? If so, the number appears reasonable. If not, it appears to us that number could be significantly higher. In any case, it may be worth reaching out to Josh Kindred with AOGA on time spent on applications for procedural regulations as AOGA coordinates those applications on behalf of the North Slope operators.

Hope this helps.

Kait
