Regarding PACE Data Collection:

The domain for Pressure Ulcer/Injury quality measurement for PACE initially included draft measures for PACE-Acquired Pressure Ulcer/Injury Prevalence and Pressure Ulcer/Injury Prevention. Following testing, the Falls, Falls with Injury and PACE-Acquired Pressure Ulcer Prevalence measures were submitted to the National Quality Forum for consideration of endorsement. Based on the results of validity and feasibility testing, the Pressure Ulcer/Injury Prevention measure was not included at this time.

Thank you
Mark
