Welcome to the

Observer Declare and Deploy System

of the *North Pacific Groundfish and Halibut Fisheries
Observer Program*
administered by the *Fisheries Monitoring and Analysis
Division*
of the *Alaska Fisheries Science Center*.

This system allows you to log your fishing trips in advance
and
determines which trips will need to be observed.

Programming follows the guidance provided in the

Annual Deployment Plan for Observers in the
Groundfish and Halibut Fisheries off Alaska.
2015

Each year NMFS presents its deployment plan at
the October and December meetings of the
North Pacific Fishery Management Council.

Thank you for your participation and for
supporting Alaska's sustainable fisheries.

This site allows access to the online format
for Office of Management and
Budget (OMB) [approved forms](#).
