## General Comment

Safeguards on Nuclear Material

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

Yes

2. Is the burden estimate accurate?

Yes

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

Reduce form 741 from using separately for receiving material & sending material, to be able to use dual purpose receiving/and sending form.

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

Using a bar-code system that automatically collects & sends require information with accuracy, timeliness & efficiency.
