RE: *Federal Register* notice of December 1, 2015, for National Agricultural Statistics Service (NASS)
Agricultural Prices Program Survey Forms (OMB Number: 0535-0003)

Dear Mr. Hancock:

The Bureau of Economic Analysis (BEA) strongly supports the continued collection of data by the NASS through the agricultural prices survey forms. The data collected on these forms are crucial to key components of BEA's economic statistics. BEA's use of the data will not be affected by the proposed changes to the target population, sample design, and questionnaire length.

BEA uses data from these forms in the national income and product accounts (NIPAs) and the regional economic accounts. Data on unit prices received and paid by farmers and the related price indexes constructed from the data collected on these forms are used to prepare estimates of the government consumption expenditures, personal consumption expenditures, and farm inventory components of gross domestic product (GDP). They are also used to prepare estimates of gross farm product, the contribution to GDP of the farm sector, and state and county farm income. In addition, BEA's estimates of farm income and product are based on data from USDA's Economic Research Service which depends heavily on the price indexes from this program. A list of the data used is attached.

Please keep BEA informed concerning any modifications to this form. We are particularly interested in any modifications proposed during the form's approval process that would substantially affect our use of these data. For additional information, please contact Tiffany Burrell, Source Data Coordinator, on 202-606-9618 or by e-mail at Tiffany.Burrell@bea.gov. Should you need assistance in justifying these forms to the Office of Management and Budget, please do not hesitate to contact BEA.

Sincerely,

Benjamin Bridgman
Acting on behalf of Dennis Fixler, Chief Statistician
