Subject: Fwdpublic comment on federal register : time to shut down this expensive govt program - let those interested in making money work without govt tax dollars from general taxpayers

this funding of alleged utilities in rural areas by our taxpayers needs to be shut down. the fact is private industry can get bank financing to do this. it is time that the taxpayers are taken off the roles to provide funding for utilities. actually the utilities have become very very prosperous and do not need a swamp govt agency to work for them. they can work for themselves in securing financing. they have been into that for hundredsof years now. we are not a new country. its time to change the taxation picture. get ordinary taxpayers off the fundin gscheme and let utilities go to the bank for funding. we need change. this is not l860 anymore. it is hundrds of years later. this comment is for the public record. of course swamp Washington never wants to give up money money money for its swamp operations. it wants to go on forever when when hundreds of years go by and nobody makes any changes. wise up. wake up please in corrupt swam pw ashington dc. this comment is for the public record. the usda gets trillions of dollars from taxpayers. its time to downsize. please receipt. jean publiee jeanpublic1@gmail.com

Title: Accounting Requirements for Electric and Telecommunications Borrowers.

OMB Control Number: 0572-0003.

Type of Request: Extension of a currently approved information collection.

Abstract: The Rural Utilities Service is a credit agency of the USDA which makes direct and guaranteed loans to finance electric and telecommunications facilities in rural areas. Accounting requirements that are unique to RUS borrowers are contained in 7 CFR parts 1767 and 1770, and establish basic accounting requirements for the recording of financial information that must be available to the management, investors, and lenders of any business enterprise. This collection is primarily a recordkeeping requirement, although the Agency is requiring borrowers to establish an index of records. The hours of burden to maintain this index are directly related to the portions of the accounting system that are unique to the Agency. There are many important financial considerations for retention and preservation of accounting records. One of the most important considerations to RUS is that documentation be available so that the borrower's records may be audited for proper disbursements of funds.
