Monroe Gourp and CHFA who say Housing Authority under HAP which is HUD Housing and Urban Development Section 8 Housing fails to maintain dwelling units safe from life threatening defects Colorado doesn't have a law protecting citizens from growth of indoor mold (sick building syndrome) Management maintenance knowing or knowingly have ignored lied to head office of corporation Denver Housing even the owner of the apartments choosen to ignore the complaints of the health issues caused by improper reconstructioning areas damaged from water leaks not to mention maintenances failure to care as a reasonable person should by means of spending money to fix problem as simple as changing out carpets maintenance choices should not have been to shampoo carpets to cause more moisture feeding the mold growth that could have been prevented at a low price but no now having to deal with health issues high blood preasure defect lungs destroying immune system from maintenance poor choices three months calling making complaints to local agencies and law enforcements and HUD to get help management and maintenance decide to move tenants to a unit of pre-existing water damage tenants now suffer life long threats with health and have fear that there is no hope because even filling law suits agianst the owner hasen't changed or helped change the life threatening threats of tenants health the several inspections have not been done correctly and people who are or have been doing inspections are rude ignorant and stupid especially where there is government money given to prevent any and all defects turning for the worst and sadly to say in this situation it has turned for the worst because supposably these this certain apartments have no way of tenants being able to have a voucher for portability for tenants to move out into other places who are the same as section 8 housing which coporation privatly owned do not care about tenants concerns and tenants are treated and looked at as the crazy persons the truth is if tenants weren't/ wasn't feeling or didn't feel inside health issues that are

problems which were not parent before then there would not be any reason to fight to go forward with complaints or crying out for help because there just wouldn't be a reason but when statutes laws and regulations are set in place to protect ones rights then one must push to get the correct help to change to make it easier better life living with the life threatening health issues that can not be reversible the many ethical violations by HUD employees and or the third party of HUDs partneres are unacceptable spending waisting tax payers money lying to cover up what really is affecting not only the lives of the tenants who have no choice but to stay and live where air quality is health hazardous but also it has been destroying the property value what needs to be done is to have a highly trained Inspector to have lab test be done from samples from walls and air quality needs to been known for the sack of the lives of the ones who live daily breathing in hazardous toxic bad to health and maintenance needs to spend tax payers money for what it is meant to be spent on for bettering lives and the community instead of personal gains
