General Comment

COMMERCE AND TRADE 15 U/S / 271(a)(1) ; The future well-being of the United States economy depends on a strong manufacturing base and requires continual improvements in manufacturing technology, quality control, and techniques for ensuring product reliability and cost-effectiveness. Help United States industry and manufacturing compete strongly in world markets. to advance mining and material productions, through cooperative efforts among industries, universities, and government laboratories, promising research and development projects, which can be optimized by the private sector for commercial and industrial applications in USA.

Steel and Iron and Rare Earth elements mining and production are a vital national security. Agencies need to provide funds and made available for the construction, alteration, maintenance, or repair of a public building or public work unless the iron, steel, and manufactured goods are produced in the United States. America needs to address the dumping of minerals and or products. A quota on all imports from all countries to the United States. Also recognized the close relation of the economic welfare of the United States to its national security with the impact of foreign competition on the economic welfare of individual domestic industries; and any substantial unemployment, decrease in revenues of government, loss of skills, or any other serious effects resulting from the displacement of any domestic products by excessive imports, without excluding other factors, in determining whether a weakening of the U.S. economy by such imports may impair national security. imports are causing substantial unemployment, decrease in revenues of government, loss of skills or investment, or other serious effects resulting from the displacement of any domestic products by excessive imports.

Agency Lead role in stimulating cooperative work among private industrial organizations in efforts to surmount technological hurdles, and otherwise has been responsible for assisting in the improvement

of industrial technology.

The future of USA , requires tariffs laws on dumping nations, Improvements in America mining, timber harvest, gas and oil production, manufacturing, road and bridge infrastructure. Fundamental scientific and engineering research to develop USA materials for standards that improve quality and reliability of America taxpayers. New mining processes by which such improved methods may be used in practice to improve manufacturing and to assist industry to transfer important material discoveries into commercial products.

USA needs to craft a strategy to retaliate against China, a book published in 1999 by two People Liberation Army, colonels entitled 'Unrestricted Warfare shows the implementing a strategy of its own towards the United States and against our private sector companies. Larger strategic challenge posed by China towards America is an economic one, and a new approach is required to compete effectively against China's coordinated efforts in the Americas.

American Recovery and Reinvestment Act, 2009, Nothing went to the mining of materials, nothing for gas or oil how sad. Far too many social programs and money to billionaires, food programs, technology firms, science, windfarms, electric cars, mass transit rail, and not enough for to provide for the protection and restoration of domestic critical infrastructure operations . Not enough went to preserve and create jobs and promote economic recovery in energy and mining, and natural resources, not enough was to invest in road and bridges, air ports transportation, and other infrastructure that will provide long-term economic, Not enough for investments needed to increase economic efficiency benefits. Not enough went to Natural resources water shed and flood control and operations, Not enough Rural Housing, rural water, waste water, and waste disposal programs, Not enough for Farms and ranchers and Rural Development, Not enough for "Military Construction, Veterans health, medical facilities, International boundary or construction highway infrastructure investment.

CODE OF LAWS OF THE UNITED STATES OF AMERICA 112a. United States Treaties and Other International Agreements; contents; admissibility in evidence. The Secretary of State shall cause to be compiled, edited, indexed, and published, beginning as of January 1, 1950, a compilation entitled "United States Treaties and Other International Agreements,"

Bring back agency known as United States Bureau of Mines; Department of the Interior can establish another a bureau of mining, for metallurgy, and mineral technology, thoroughly equipped for the duties by mining technical education and experience.

USGS is the sole science agency for the Department of the Interior, Not Mining production.
