we have chicken farms in the usa. they are American and they can be easily searched and made to stop abusing animals. the fact is we cant do that all over mexico. its time to stop this import of dead chickens and pigs from other countries. what we need to do is just gorw in this country and fix the abuse issue where chciens aqe treated so abusively and inhumanely in this country.I am not for importing dead chickens or pigs from other countries. we have no control of what they are fed there at all. they can be fed all kineds of chemicals, clearly aqphis does not care. aphis is an evil, vile agency that abuses animals itself. look at the expose the ny times did of their research facility in Nebraska. we want humane conditions for chiceksn. we want the \debeaking to stop, we want male chickens to be allowed to live, we want them to be fed healthy food and not chemical crap that makes them so heavy they cant sand on their own legs. we don't want the workers to throw them around. we want chickens treated respectfully and carefully. what is gon on t\with chicken via this vile, evil usda and aphis is enough to make americans vomit when they see the results. the videos are out therer and in profusion.so all these profiteers are abusive to factory animals. the confined ways thaqt these animals are raised when they are intelligent creatures is s sin. a real sin.
