Subject: [External_Sender] RE: RE: Status please, Opportunity to review and comment on an NRC information collection "10 CFR part 140, Financial Protection Requirements and Indemnity Agreements" (3150-0039)

John and Tom, the individual that I initially requested this information from, has returned from vacation. I asked him the four information collection questions over the phone. I apologize for the late reply. I went to <http://www.regulations.gov>, it stated the comment period was closed. Here are the responses to the four questions that were asked:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

We were unable to answer this question.

2. Is the burden estimate accurate?

This information is compiled in a different format for senior management review, so the additional time to reformat it to send to the NRC is about two hours.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

The current format provides for sufficient information quality and clarity.

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

Considering the small information collection burden (about two hours) the use of automated data collection is not considered necessary.

EXTERNAL SENDER

Tom,

Understood that you didn't respond by the 11th.

Does Callaway still intend to respond and, if so, is there a new projected date for a response?

Or, will Callaway not be responding.

Thanks in advance,

John Klos

John –

We (Dave Brownawell in my group) solicited a response from the group at Ameren headquarters that provides the input to our routine report for this regulation. Dave reminded them at the end of last week, but we did not get a response from them, i.e., not yet and thus not in time. My impression is that the requested feedback is voluntary, but I'm still sorry that we weren't able to respond.

Subject: Opportunity to review and comment on an NRC information collection "10 CFR part 140, Financial Protection Requirements and Indemnity Agreements" (3150-0039)

Tom,

The Nuclear Regulatory Commission recently published a Federal Register Notice announcing our intent to submit an information collection request to the Office of Management and Budget (OMB) for "10 CFR part 140, Financial Protection Requirements and Indemnity Agreements" (3150-0039). A supporting statement describing the requested information is available at <http://regulations.gov> by searching docket NRC-2018-0050.

As a potential respondent to this information collection, we are interested in your feedback. Specifically, we are seeking input on the following questions by June 11, 2018:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

Comments can be submitted by going to <http://www.regulations.gov> and searching for Docket No. NRC-2018-0050. Please note that comments will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

Thank you,

John Klos
