General Comment

this agency should be closed down. this non profit center should be run by a non profit and not by taxation dollars. I also find it corrupt that the usda wants to put people peermently on the welfare line by giving out this free foods that the usda makes out when people on the welfare line come to them for free food. the usda makes their constituency make bigmoney from the taxpayers paying for that food. this entire food supply should be on a donation non profit basis.not the taxpayers paying for this because corruption has crept into this program. the usda wants this to be trillion dollars business, giving away food. it is not in the interest of taxpayers to be paying for food for all the people in this nation. they need to encourage people to work to pay for their food, instead of being welfare recipients. but the usda and its program because of selling their food is on the side of the welfare receipients instead of worrying at all about the tax bill tot eh working citizens of this country. we have a govt agency against the ordinary working man of the usa. make no mistake aboutit this. it is a cabal devoted soley to moneymaking

off the free food industry. we need some changes. we do not need any American govt agency to have a profit making interest in giveaways, which this program is. we need them all to be encouraging people to work to make the usa stronger and not so vulnerable to encouraging poverty. usda is working against the best interests of the usa working man at this point in time. this comment is for the public record. please receipt. let the non profits take this over and let them pay for it. every year this program costs taxpayers more and more for usda involvement.
