

To whom it may concern:

Hello,

My name is Ying Qing, reporter from Caixin Media in Beijing.

Regarding to the notice of new agency information collection activities I have a few questions about it. Hope for your reply.

1 What kind of social media information respondents have to provide? Will they have to provide the password of the account?

2 After collecting the social media information on EVUS, who will these information be handed to?

3 How do CBP actually do the vetting according to those social media information? which part of the information CBP care the most ?(people they connect or the information they share?)

4 How can CBP actually guarantee the privacy of the respondents?

5 The notice said "Estimated Number of Respondents: 3,595,904." how did CBP figure out this acute number?

6 How can the CBP guarantee those decline to provide the social media information would not be negatively affected?

HOPE FOR YOUR REPLY thank you very much!

YING
