this is paid for by general taxpayers so that this agency has information on the lies of the salmon commercial profiteers. I don't think this survey is worth collecting since the salmon profiteers don't tell the division exactly what they steal from the sea. 100% of the boats coming in have more fish stacked on board than they claim. It is all a big lie they are taking 300% more than they tell this agency. I see absolutely no reason to use these lies or for taxpayers to pay for this survey. Shut the survey down. Law enforcement should be out there to check what these commercial fish robbers are actually doing and up to. They are a bunch of swine, going out with guns on their boats to kill marine life because the marine life eats some fish. What a lousy bunch of swine. Shut down the survey. It is full of lies. This comment is for the public record. Please receipt. Jean Public Jean Public1@gmail.com examine one boat fully and you can calculate how much is actually being stolen. At least one and one half times what has reported. This comment is for the public record. Please receipt. Jean Public Jean Public1@yahoo.com

We are soliciting comments on the proposed ICR that is described below. Abstract: The administration and uses of national wildlife refuges and wetland management districts are governed by the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997; the Refuge Recreation Act of 1962 (16 U.S.C. 460k-460k-4) (Recreation Act); and, the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 et seq.) (ANILCA). ANILCA provides specific authorization and guidance for the administration and management of national wildlife refuges within the State of Alaska.

The Yukon Delta National Wildlife Refuge (YDNWR) is requesting authorization to contribute to the design and implementation of subsistence fisher surveys for the purposes of informing in-season fisheries management decision-making in the Kuskokwim River subsistence salmon fishery. A program is already in place and is operated by tribal partners (the Orutsaramiut Traditional Native Council and the Kuskokwim River Inter-Tribal Fisheries Commission [KRITFC]), but the YDNWR would like to be more involved in planning and administering the surveys.

The information collected by the survey includes the times individuals left and returned from boat launches, several characteristics of their fishing gear, broad classification of where the fishing activity occurred, for how long they actively fished, and how many of each of three salmon species they harvested. When coupled with aerial boat counts performed by the YDNWR, these data can be used to obtain quantitative estimates of total fishing activity and salmon harvest occurring from short-duration subsistence harvest opportunities. The estimates are then used to inform the management strategy used jointly by the YDNWR and the KRITFC.
