Comment:

I agree that electronic cigarette users should be informed with what that are inhaling into their bodies. Therefore, they will know which products will be more harmful to them and the level of nicotine in each product. It has helped many people cope with their nicotine addiction. Electronic cigarettes are more environmental friendly than tobacco cigarettes due to not filling the air with the smell of tobacco and not being thrown around on the floor. I have been seeing less amounts of tobacco cigarette butts on the ground and I am personally not a fan of the smell either so I am in supports for electronic cigarettes. *🗨️
