General Comment

Electronic collection of this information would be preferred. The NRC's general practice of collecting all information via mail is very outdated for 2018.

Recommend removing Section 6 - Devices not subject to registration, or making sure the information is correct and up to date. I am the Radiation Safety Officer at my organization, and the most recent GL packet I received had over 30 errors in this section, making it seem like the NRC did not care too much about this information. Either care about it enough to make sure it is correct, or remove the section entirely. This was also difficult to correct via mail.
