General Comment

Pulling the data requires an update to a technology system. Annual changes to the form may not be reasonably accommodated especially if the changes are announced late requiring a short turnaround.

Once it is set up using technology, it is easy to meet the deadline most weeks. It would be more practicable to be able to submit items more

frequent as changes in the sites data happens daily. I tend to think that submission by Wednesday and the availability to the public on Friday results in advertising obsolete data.

Request the ability to have real time data advertised.
