

**SUPPORTING STATEMENT FOR PAPERWORK REDUCTION ACT SUBMISSION
UNDER 5 CFR PART 1320
INFORMATION COLLECTION: 2133-0522**

Seamen's Claims; Administrative Action and Litigation

Introduction: Seamen's Claims; Administrative Action and Litigation. Information Collection #OMB 2133-0522, request for renewal; expiration date: March 31, 2009.

A. Justification

1. Explain the circumstances that make the collections of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.

Applicable statutes are found in the Suits in Admiralty Act, 46 U.S.C. 30901-30918 and the Public Vessels Act, 46 U.S.C. 31101-31113. The combined effect of these statutes is to permit non-jury proceedings in admiralty to be brought against the United States by persons who suffer death, injury or illness while serving as masters or members of a crew on board a vessel owned or operated by the United States. Title 46 Code of Federal Regulations Part 327 establishes a Maritime Administration (MARAD) administrative procedure to respond to claims for damage recovery allowed under these statutes. The administrative process allows claimants to submit information at their own initiative to seek recovery in their own self interest for alleged damages. In order to accomplish this, the rule instructs the initiator of the claim to provide certain appropriate information so that MARAD can evaluate the issues of agency and vessel liability and the reasonableness of the recovery demand. This information collection enhances DOT's National Security goal.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

The information about the alleged damage claim is evaluated by MARAD to determine if the claim is fair and reasonable. If MARAD allows the claim, and it is settled, the agency will make appropriate payments to the claimant. This administrative process impacts upon Federal programs of the U.S. Admiralty Courts, U.S. Department of Justice and the U.S. Treasury.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Also describe any consideration of using information technology to reduce burden.

The Maritime Administration provides a total electronic option for this information

collection.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in item 2 above.

Requested information is not available through other means or sources. The claimant must establish the claim.

5. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83-I), describe the methods used to minimize burden.

Not applicable. Only individuals may be claimants.

6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing the burden

Claim information is provided only when the claimant decides to submit a claim. Without this information, a claim could not be processed.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:

- **requiring respondents to report information to the agency more often than quarterly;**
- **requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;**
- **requiring respondents to submit more than an original and two copies of any document;**
- **requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;**
- **in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;**
- **requiring the use of a statistical data classification that has not been reviewed and approved by OMB;**
- **that includes a pledge of confidentiality that is not supported by authority**

established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing data with other agencies for compatible confidential use; or

- **requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.**

There are no special circumstances that require the collection of information to be conducted in a manner described above.

8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.

Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and record-keeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every three years - even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.

The Maritime Administration published a 60-day notice and request for comments on this information collection in the Federal Register (70 FR 39777 on July 10, 2008, indicating comments should be submitted before September 8, 2008. No comments were received.

In addition, discussions with prior claimants on submission of defective claims resulted in the revision of reporting requirements covered by this information collection package.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

Payments are made or denied to injured seamen based on the information provided in this collection.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulations, or agency policy.

MARAD staff is obligated to provide assurance of confidentiality to the extent information is protected under the Privacy Act.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

Not applicable. There are no questions of a sensitive nature.

12. Provide estimates of the hour burden of the collection of information. The statement should:

- **Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated burden and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.**
- **If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in item 13 of OMB Form 83-I.**
- **Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in item 14.**

Number of <u>Respondents</u>		Responses Per <u>Respondent</u>		Total Responses <u>Annually</u>		Hours Per <u>Response</u>		Total Hours <u>Annually</u>
60	x	1	=	60	x	12.5	=	750

Cost to Respondent = 12½ hours at \$150 per hour = \$1,875

A determination of the estimated number of hours required and cost per response was made after consultation with several respondents.

The burden estimate will fluctuate based upon occurrence of accidental events and the number of vessels in navigation during any particular time period. Furthermore, the amount of documentation provided varies with the complexity of individual events. It will depend upon the extent of damage occurring and length of recovery period which requires extensive medical reports. Larger claims require extensive investigation and documentation. Merchant mariners would probably spend less time making a claim than would their representative. Therefore, twelve and a half hours are allowed as an average estimate of time it would take the respondent to conclude the administrative claim process, this includes an estimate for typing the claim.

13. Provide an estimate of the total annual cost burden to respondents or record keepers resulting from the collection of information. (Do not include the cost of any hour burden shown in items 12 and 14).

- **The cost estimate should be split into two components: (a) a total capital and start-up cost component (annualized over its expected useful life); and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.**
- **If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.**
- **Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to**

achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.

(a) Total Capital and Start-Up Costs Estimate: There are no capital or start-up costs associated with this information collection.

(b) Total Operation and Maintenance and Purchase of Services Estimate:

Not applicable

14. Provide estimates of annualized cost to the Federal Government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from items 12, 13, and 14 in a single table.

The total cost to the Federal Government for processing the collection is estimated as follows:

One-time Costs: \$ None.

Annual Costs: \$49,132

a) Time of specialists and reviewers involved in evaluating claim information: (Est.) 8 hrs. per claim at \$51,68 x 60 claims annually =	\$ 24,806
b) Clerical Assistance and miscellaneous 1 hr per claim x \$29.20/hr. (Average) x 60 est. claims annually =	<u>\$ 1,752</u>
	\$26,558
Administrative Costs = . 85%	<u>\$22,574</u>
Total:	\$49,132

15. Explain the reasons for any program changes or adjustments reported in items 13 or 14 of the OMB Form 83-1.

Not Applicable.

16. For collections of information whose results are planned to be published for statistical use, outline plans for tabulation, statistical analysis, and publications. Provide the time schedule for the entire project, including beginning and ending

dates of the collection of information, completion of report, publication dates and other actions.

There are no plans to publish the results of the information collection for statistical purposes.

17. If seeking approval not to display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

Not applicable.

18. Explain each exception to the certification statement identified in Item 19, “Certification for Paperwork Reduction Act Submissions,” of OMB Form 83-I.

Not applicable. There are no exceptions to the certificate statement.
