

RE: Docket ID NRC-2019-0036

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

A. Yes, it is necessary to maintain safety for users of the gauge and helps ensure a level of oversight into storage and use of gauges.

2. Is the estimate of the burden of the information collection accurate?

A. It appears to be; however, this is not my area of expertise.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

A. Yes – implementation of standardized forms for information gathered would be helpful to both parties

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

A. As above, standardized forms and automated collection would help. A central location for downloaded required forms.
