Subject: Fw:public comment on federal register administration costs for continuing payments to farmers markets and \$25 bucks to senior citizens dont mean we should spend billions for this program anymore j- shut down the out of control spending - farmers market...

they are selling meat and bread at the door farmers market in Flemington NJ and your bill doesn't say that the farmers markets should be selling that. they are also selling clothes. i think we have enough farmers markets and all you are going to get in the USA so it's time to shut down this entire program. the fact is these farmers markets really don't need the fat cat bureaucracy in Washington DC to work. they can work out on their own. they simply do not need a huge administrative staff in Washington DC to take care of them. the taxpayers can and should get a break from this bureaucracy shutting down immediately. this comment is for the public record. please receipt.
