---

I was reviewing the proposed FMLA form WH-380-E and could not find a category under Part A: medical information that would cover outpatient procedures. Most of our FMLA is for employees having an outpatient surgery which does not require them to stay in the hospital or facility overnight. For example, knee or shoulder surgery is usually performed in an outpatient surgical center and the person is sent home to recover 6-8 weeks.

Sincerely,  
Cindy Burnett
