To whom it may concern,

These changes to the forms will make approving/denying FMLA so much easier. We will no longer have to call or fax forms to employees who may not understand what we need changed or don't know how to explain it to the Doctor. We won't have to call Doctor's offices who are either unwilling to provide information, don't respond to phone calls, or send back the form as it was originally submitted, etc. This will save time and make our jobs so much easier.
