PAPERWORK REDUCTION ACT STATEMENT

A federal agency may not conduct or sponsor, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a current valid OMB Control Number. This collection is voluntary. The authority for conducting this collection comes from Title 13 U.S.C., Chapter 1, Subchapter 1, Section 16.

The OMB Control Number for this information collection is 0607-0994. Public reporting for this collection of information is estimated to be approximately 21 hours per response, including the time for reviewing instructions, completing and reviewing the collection of information.

Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to:

Paperwork Reduction 0607-0994 United States Census Bureau 4600 Silver Hill Road Room 4H177 Washington, DC 20233

The Census Bureau issued a *Federal Register* Notice to revise its confidentiality pledge language to address the new cybersecurity screening requirements:

Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

INTRODUCTION TO THE 2020 CENSUS LOCAL UPDATE OF CENSUS ADDRESSES OPERATION

A. Background

The 2020 Census Local Update of Census Addresses Operation (LUCA) is a voluntary decennial census operation. LUCA is the only opportunity prior to the 2020 Census for tribal, state, and local governments (including the District of Columbia and Puerto Rico) to review and update the Census Bureau's residential address list for their jurisdiction. The Census Bureau relies on a complete and accurate address list to reach every living quarters and associated population for inclusion in the census. The Census Address List Improvement Act of 1994 (Public Law 103-430) authorizes the LUCA operation. Refer to www.census.gov/geo/partnerships/luca-pl-103-430.html for more information.

Title 13, United States Code (U.S.C.), provides for the confidential treatment of address information and structure points showing the location of housing units or group quarters. For more information about Title 13, U.S.C., please refer to

e.https://www.census.gov/history/www/reference/privacy_confidentiality/title_13_us_cod_e.html. Signed confidentiality agreements and restrictions are required to participate in LUCA. See **Appendix A, Confidentiality and Security Guidelines** or refer to https://www.census.gov/geo/partnerships/luca.html>.

B. LUCA Responsibilities

The Census Bureau's LUCA responsibilities include:

- Provide training to LUCA participants.
- Provide the necessary materials to participants.
- Provide assistance.
- Process updates submitted by LUCA participants.
- Review and validate LUCA submissions.
- Provide feedback materials for participant review.
- Provide assistance for participants to resolve any address discrepancies.
- Provide for a formal appeal of disputed addresses by an independent federal agency outside of the Census Bureau and the Department of Commerce.

The LUCA participant responsibilities include:

- Select your LUCA liaison and reviewers. The Census Bureau suggests that individuals in your jurisdiction involved in zoning enforcement, not work on this operation since this may create a conflict of interest.
- Sign and return *D-2002—Registration Form*.
- Read, understand, and agree to abide by *D-2004—Confidentiality and Security Guidelines* including all liaisons, reviewers, and anyone with access to Title 13, U.S.C. materials (See **Appendix A** for the terms of the *Confidentiality and Security Guidelines*).
- Sign and return *D-2005—Confidentiality Agreement Form* including the signature of all liaisons, reviewers, and anyone with access to Title 13 materials.
- Complete and return the D-2006—Self-Assessment Checklist.
- Complete and return the *D-2003—Product Preference Form*.

- Ensure that everyone working on LUCA understands the procedures for participating in the operation and Census Bureau terminology and concepts.
- Keep Census Bureau addresses and maps showing structure points¹ (housing units and group quarters locations) confidential and ensure they are used only for census purposes.
- Ensure the receipt of all required materials for the LUCA review.
- Prepare a strategy to conduct the review of LUCA materials.
- Complete your address list review and return your updated materials to the Census Bureau within 120 calendar days of receiving your LUCA materials.
- Review the Census Bureau's detailed feedback materials.
- Address discrepancies to the LUCA Appeals Office.
- Destroy (preferred method) or return all Title 13 materials to the Census Bureau after the appeal process is complete.
- Sign and date the *D-2012—Destruction or Return of Title 13, U.S.C. Materials Form.*

For your convenience, several forms are included in the Appendix and are available on the LUCA Web site at http://www.census.gov/geo/partnerships/luca.html. These forms include:

- *D-2001—Contact Information Update Form*—if you need to update LUCA contact information, complete and return this form.
- D-2004—Confidentiality and Security Guidelines—provides a detailed explanation for protecting and safeguarding the confidential Census Bureau materials covered by Title 13, United States Code (U.S.C.).
- *D-2005—Confidentiality Agreement Form*—if your LUCA Liaison changes or to add additional reviewers complete and return this form.
- D-2008—Address List Add Page.
- *D-2011—Inventory Return Form for the Return/Submission of Materials*—return this form with your address and feature updates.
- D-2012—Destruction or Return of Title 13 Materials—use this form at the conclusion of the LUCA operation to inform the Census Bureau that the LUCA liaison has destroyed or returned all Title 13 materials.

C. Training and Technical Support

Training workshops provide instruction using the LUCA materials. In addition, self-training aids and webinars are available online at the LUCA Web site at www.census.gov/geo/partnerships/luca.html.

Note: If you need additional information or assistance, please call 1-844-344-0169 or email at GEO.2020.LUCA@census.gov.

¹A **structure point** is a coordinate location that represents the location of one or more housing units and/or group quarters. Structure points are protected by Title 13, U.S.C. See **Appendix A**, **Confidentiality and Security Guidelines**.

Table 1: LUCA Schedule

Date	Event
January 2017	Advance notice mailed to Highest Elected Officials (HEO), Tribal Chairs (TC), and other LUCA contacts.
March 2017	LUCA Promotional Workshops begin.
July 2017	LUCA Invitation and Registration materials mailed to HEOs, TCs, and Governors.
October 2017	LUCA Training Workshops begin.
February-April 2018	Participants receive their LUCA materials.
March-September 2018	Census Bureau processes LUCA submissions.
April 2018-May 2019	Census Bureau validates 2020 LUCA addresses.
June-August 2019	Census Bureau delivers feedback materials to participants for review.
April 1, 2020	Census Day.

CHAPTER 1. BEFORE YOU BEGIN YOUR REVIEW

Chapter 1 explains some of the terms and concepts used by the Census Bureau and recommended strategies for your LUCA review. Refer to the *Glossary* or visit the Census Bureau's Web site at https://www.census.gov/geo/reference/ for additional terms and definitions.

1.1 The Census Bureau's Master Address File

The Master Address File (MAF) is a nationwide database of all addresses used to support many of the Census Bureau's operations. Besides containing mailing addresses and ZIP Codes, an address record in the MAF also contains geographic information about the location of addresses. In areas where there are non-city style addresses (e.g., rural route or post office box number), the address record may contain additional information such as a location description.

1.2 The Topologically Integrated Geographic Encoding and Referencing Database

Address records in the MAF link to road segments or road features in the Topologically Integrated Geographic Encoding and Referencing (TIGER) database. The TIGER database includes the geographic coordinates and names of all streets, water features, and other linear features, and boundaries for jurisdictions and statistical areas (census tracts², census blocks³, etc.) used to tabulate decennial census data.

1.3 What is a Housing Unit?

The Census Bureau defines a housing unit as:

A single-family house, townhouse, mobile home, trailer, apartment, group of rooms, or a single room occupied as a separate living quarters or, if vacant, intended for occupancy as a separate living quarters. Separate living quarters is one in which one or more occupants (or intended occupants, if vacant) live separate from any other individual(s) in the building and have direct access to the living quarters without going through another living quarters, such as from outside the building or through a common hall.

The following types of housing units are acceptable and should be included on the address list you submit to the Census Bureau:

Houses, including townhouses, condominiums, and apartments.

² A **census tract** is a small, relatively permanent statistical division of a county or statistically equivalent entity, delineated for the purpose of presenting Census Bureau statistical data.

³ A **census block** is a geographic area bounded by visible features, such as streets, roads, streams, and railroad tracks, and invisible features, such as the boundaries of governmental units and other legal entities. Census blocks are the smallest area for which the Census Bureau collects and tabulates statistical information.

- Living quarters within an otherwise nonresidential structure such as an apartment within a church, school, or business.
- Mobile homes or trailers occupied as separate living quarters, or if vacant, intended for occupancy as separate living quarters.
- Transitory location (TL) sites for movable or mobile housing, portable housing units, boats, motorized recreational vehicles (RVs), tents, trailers that are pulled by cars or trucks. See Section 4.7.
- Any housing units under construction that will be habitable (closed to the elements with final roof, windows, and doors) on Census Day, April 1, 2020.

1.4 What are Group Quarters?

Group Quarters (GQ) are a place where people live or stay, in a group living arrangement owned or managed by an entity or organization providing housing and/or services for the residents. This is not a typical household-type living arrangement. These services may include custodial or medical care as well as other types of assistance, and residency is commonly restricted to those receiving these services. Residents of group quarters are usually not related.

The following types of group quarters are acceptable and should be included on the address list:

- Correctional facilities:
 - Federal and state prisons.
 - Local jails and other municipal confinement facilities.
 - Correctional residential facilities.
- Group homes.
- Juvenile facilities:
 - Group homes for juveniles (non-correctional).
 - Residential treatment centers for juveniles (non-correctional).
 - Correctional facilities intended for juveniles.
- Nursing homes:
 - Nursing facilities/skilled-nursing facilities.

Note: Residents of assisted living, congregate care, and continuing care communities who are not receiving skilled nursing care are included in the housing unit population. Assisted living quarters are considered housing units and not group quarters as long as they have separate access from outside or from a common hall.

- Homeless shelters.
- Hospitals:
 - Mental (psychiatric) hospitals and psychiatric units in other hospitals.
 - Hospitals with patients who have no usual home elsewhere.
 - In-patient hospice facilities.

- College or university dormitories, fraternities, sororities.
- Workers' group living quarters or dormitories.
- Religious group quarters.
- Any group quarters under construction that will be habitable (closed to the elements with final roof, windows, and doors) on Census Day, April 1, 2020.

Note: Housing units and group quarters can exist within the same structure. For example, assisted living quarters (housing units) may be located in the same structure that contains a nursing facility (group quarters).

1.5 Unacceptable Types of Housing Units and Group Quarters

Exclude the following unacceptable types of housing units and group quarters addresses from your updates to the Census Address List:

- Condemned or scheduled for demolition.
- Under construction or remodeling for conversion to a nonresidential purpose.
- Used solely for nonresidential storage.
- Used solely as offices or businesses in which no one is living.
- Used solely for ceremonial purposes.
- Transitory units (TU) including pads, sites, slips, units, and rooms located at transitory locations (TL). See Section 4.7.
- Under construction and will **not** be habitable (closed to the elements with final roof, windows, and doors) on Census Day, April 1, 2020.

Note: The LUCA materials do not contain residential addresses within military installations. The Department of Defense provides the enumeration numbers to the Census Bureau for those living on military bases. The Census Bureau does not canvass or mail to addresses on military installations so there is no need to include these addresses as part of the LUCA review.

1.6 Census Bureau Addresses

1.6.1 Residential and Nonresidential Addresses

The Census Bureau divides all addresses into two use types, residential and nonresidential. Residential addresses are addresses of housing units and/or group quarters where one or more people could live. Nonresidential addresses are addresses of a structure or unit within a structure that do not serve as a residence, such as commercial establishments, schools, government offices, and churches.

Note: Some structures can contain both residential and nonresidential units, even though they have a single address such as an apartment over a store or a home with an office. In this instance, the LUCA operation considers this address residential since it contains a housing unit.

1.6.2 City Style Address Format

The Census Bureau classifies housing units and group quarters that have a house number and street name address, for example, 212 Elm Street or 137 Clark Court, Apt. 3, as city style addresses. In some instances, the house number may also include an alpha character such as 35A or W9254. These are mailing address or addresses that provide location for emergency services, such as police, fire, and rescue (E-911 addresses).

City style addresses for housing units in multiunit structures, such as apartment buildings, contain a unit designator, for example, Apt 101 or Suite D or a location designator such as "rear" or "basement" (Refer to **Appendix E**, **Unit Designation Abbreviation**). The Census Bureau and the United States Postal Service (USPS) treat these designators as part of the housing unit address, and they are included in each affected census address record.

Note: For 2020 LUCA, participants must provide unit identifiers (e.g., Apt 1, Apt 2, Unit A, Unit B) for multiunit buildings. Ensure that all your apartment buildings, especially small multiunit buildings (3-4 units), such as large houses subdivided into apartments, have a separate address line for each unit that includes the basic street address and the individual unit designation.

1.6.3 Non-city Style Address Format

The Census Bureau classifies addresses that do not include a house number and/or a street name as non-city style addresses. Non-city style addresses may not include a complete house number and street name address. Frequently used non-city style mailing addresses include:

- Rural route and box number.
- Highway contract route and box number.
- General delivery.
- Post Office box only delivery (Not accepted for LUCA).

Non-city style addresses often do not follow any numeric sequence and may not be associated with the name of the street or highway on which they are located. For this reason, the Census Bureau uses different methods to compile the list of addresses for inclusion into the address list, such as a physical location description (BRICK HOUSE w/ATTACHED GARAGE ON RIGHT), structure points (geographic coordinates), and census geographic codes (state code, county code, census tract number, census block number).

1.7 Census Tract

Census tracts are small, relatively permanent statistical subdivisions of a county or statistically equivalent entity. Numbered uniquely within each county, census tracts:

- Delineated for presenting Census Bureau statistical data.
- Generally, have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people.

- Follow relatively permanent visible features.
- May follow governmental unit boundaries and other non-visible features.
- Occasionally split due to population growth or merged because of substantial population decline.
- Consists of a six-digit code with a decimal between the fourth and fifth digit, contains a
 four-digit base number, including leading zeroes, plus a two-digit number suffix, with
 trailing zeroes. For example, 1234.01 and 0003.00.

1.8 Census Block

A geographic area bounded by visible features, such as streets, roads, streams, and railroad tracks, and invisible features, such as the boundaries of governmental units and other legal entities. A census block is the smallest area for which the Census Bureau collects and tabulates statistical information. Census blocks are numbered within census tracts and are unique to the census tract to which they belong. For example, if your jurisdiction has three different census tracts then each will likely contain a census block 1000. Pay close attention to both the census tract and census block number on the address list when conducting your review and making updates.

Note: The 2020 LUCA operation uses 2010 tabulation blocks represented as "tabblock2010" in the TIGER Partnership shapefiles for digital map participants.

1.9 What is Geocoding?

In order to process your address submissions, the Census Bureau **requires** the inclusion of **census geographic code information (geocodes).** Geocoding is the assignment of an address or structure to a location identified by one or more geographic codes. Geographic codes include the correct **state**, **county**, **census tract**, **and census block** codes.

Because the Census Bureau counts people where they live, geocodes support the systematic collection of data that allows Census enumerators to locate an address. They are also important in allocating data from questionnaire responses to the correct location. You must include geocodes or structure coordinates (latitude and longitude) for the Census Bureau to process your address submissions. The Census Bureau will not accept addresses without the geocodes including the **state**, **county**, **census tract**, and **census block codes** or by providing structure coordinates (latitude and longitude) on the address list. You can find the census geographic codes on your LUCA materials.

1.10 Ungeocoded Addresses

The USPS provides addresses to the Census Bureau on a regular basis. Although these addresses include state and county codes, the Census Bureau further geocodes these addresses to include the census tract and census block. In some cases, where the Census Bureau does not have new roads or road names in TIGER, these addresses could remain ungeocoded to the correct census tract or block. The Census Address List for state and county participants may contain ungeocoded addresses that could indicate areas of new growth where the Census Bureau may be missing the

corresponding road features. Please provide the geocodes or the structure coordinates (latitude and longitude) for these addresses, if known, to ensure that the Census Bureau can enumerate each housing unit in the correct location.

1.11 Strategies for Reviewing the Address List

When deciding how to conduct the LUCA review, consider your time, staff, and available local address information. If a complete review is not possible, focus your review on these areas:

- Annexed land.
- Apartment buildings and complexes.
- Areas along governmental boundaries.
- Areas of new housing construction (apartment complexes/subdivisions).
- Blocks with the greatest address count differences between the Census address block count and your address block count.
- E-911 address conversion areas.
- Group Quarters (e.g., housing such as college dorms, and nursing homes).
- New mobile home parks or new scattered mobile homes.
- Single-family homes converted to multifamily homes, and vice versa.
- Warehouses converted to residential lofts.

Note: New for the 2020 LUCA Operation, multiunit identifiers (i.e., Apt 1, Apt 2, or Unit 1, Unit 2) are required for all newly added addresses and address updates for multiunit structures. The Census Bureau will not process a multiunit address without multiunit identifiers.

1.12 Local Address Sources

There are many possible sources of local address information. Some of these sources may not match the Census Address List exactly, but they are a good indication of where change is taking place and can help you identify addresses that you need to add to the census address list.

Potential local address sources for compiling your residential address list:

- Annexation records.
- Assessment or tax files (residential units).
- Driver's license files.
- E-911 address files.
- Housing inspection records or occupancy permits.
- Local utility records.
- New housing construction or building permits (include units that are under construction only if final roof, doors, and windows will be in place on Census Day, April 1, 2020).
- Planning and zoning records.
- School enrollment records.
- Voter registration files.

CHAPTER 2. THE LUCA PAPER ADDRESS MATERIALS

This chapter discusses protecting Census Bureau address information and describes the Census Address List, Address List Add Page, and Address Count List. The examples shown may differ from the finalized materials. All address list and map examples containing map spots use fictitious information.

2.1 Protecting Census Bureau Paper Address Information

The LUCA liaison accepts the responsibility for protecting and safeguarding the confidential Census Bureau materials covered by Title 13, U.S.C. This includes the Census Address List, all address list paper copies, and maps (including copies) containing structure points (map spots). For detailed information refer to **Appendix A**, **Confidentiality and Security Guidelines**.

If you need to add additional reviewers during your LUCA review, a blank *Confidentiality Agreement Form (D-2005)* is included in **Appendix F**. Be sure additional reviewers read and understand the *Confidentiality and Security Guidelines*, **Appendix A**, before signing and returning the *Confidentiality Agreement Form (D-2005)*, **Appendix F**, to the Census Bureau.

2.2 D-2007—The Census Address List

The Census Address List contains all of the residential (city style and non-city style) addresses known to the Census Bureau within your jurisdiction. It also contains census geographic codes (state, county, census tract, census block) that indicate the location of each address. The paper address list is on 8 ½ x 14 inch (legal size) paper. Each sheet contains six addresses. Figure 1. 2020 Census Paper Address List Tract/Block Sort Example displays an example of the tract/block sort of the Census Address List. Figure 2. 2020 Census Paper Address List Street Name/House, Unit, Census Tract, and Census Block Number Sort Example displays an example of the street name/house number sort of the Census Address List.

The Census Address List for county participants may contain ungeocoded addresses. Please provide the geocodes or the structure coordinates (latitude and longitude) for these addresses, if known, to ensure that the Census Bureau can enumerate each housing unit in the correct location. Refer to **Section 4.6, Ungeocoded Addresses—Counties Only**.

2.2.1 Heading Area

The top of each page of the paper address list is the heading area. This area contains:

- The product type (Address List).
- The operation name [2020 Census Local Update of Census Addresses Operation (LUCA)].
- The Sort Type (e.g., Tract/Block).
- The Entity Name and Entity ID code (e.g., Winter County CO88009).
- The page number out of the total number of pages (e.g., 17 of 20).

- The creation date (e.g., 01/04/2018).
- The disclosure statement—Disclosure Prohibited by Title 13, U.S.C.

The paper address list sort depends on the selection you chose when you registered:

- Census Tract #/Block #/Street Name/House #/Unit #, or
- Street Name/House #/Census Tract #/Census Block #.

The entity section contains your entity name and unique Federal Information Processing Series (FIPS) entity identification (entity ID) code. The code is of variable length, depending on your entity type. For example:

- State: Alabama, ST01
- County: Mercer County, Pennsylvania, CO42085
- Place: Abbeville city, Alabama, PL0100124
- Minor Civil Division: Salem Township, Mercer County, Pennsylvania, MC4208567472

Entity	Entity Identification Code	Total Characters
State	ST (2 alpha) + (2 numeric)	4
County	CO (2 alpha) + State (2 numeric) + County (3 numeric)	7
Place	PL (2 alpha) + State (2 numeric) + FIPS Place (5 numeric)	9
Minor Civil Division (MCD)	MC (2 alpha) + State (2 numeric) + County (3 numeric) + FIPS MCD (5 numeric)	12

Table 2: Entity Identification Codes

2.2.2 Entity ID Codes for Tribal Governments

The entity section contains your entity name and unique Federal Information Processing Series (FIPS) code assigned by the Census Bureau to your tribe and associated geographic area. This fixed length alphanumeric code is composed of 12 characters.

The tribal code is 6 characters:

- TR + a 4-digit numeric code
 - TR0013, and

The tribal geographic area code is 6 characters:

- TA + a 4-digit numeric code
 - o TA0185.

Below is an example of a tribal identification code and its associated geographic area:

- TR0013TA0185
 - TR0013 represents the Utu Utu Gwaitu Paiute Tribe of the Benton Paiute Reservation, and
 - TA0185 represents Benton Paiute Reservation, the geographic area associated with the Utu Utu Gwaitu Pauite Tribe.

2.2.3 Static Information

Do not edit the gray columns on the Census Address List. These columns include:

- Column 1, Line Number—the sequential number of the address record.
- Column 2, **MAFID**—the unique control number (maximum character length is 9 characters) assigned by the Census Bureau to each address.
- Column 5, **GQ Flag**—displays a '**Y**' for addresses that are considered group quarters, such as nursing homes or dormitories.
- Column 6, City Style Mail Delivery Address or E-911 Address or the Physical Location Description and Road Name—contains the following sub-columns that you may not edit:
 - o 6a, **Complete Address Number**—housing unit or group quarters house number, which can contain numbers, letters, hyphens, or other characters.
 - 6c, Group Quarters Name—the name of a group quarters such as BAYSIDE NURSING HOME or DOBBS HALL.
 - 6d, Facility Name or Physical Location Description—may include a Facility Name such as UNIVERSITY OF ILLINOIS or a brief physical location description for a noncity style address such as 2 STORY STONE HOUSE/SHUTTERS.
 - 6e, Apt/Unit Number—apartment or unit number, if applicable. This column may contain apartment unit numbers (e.g., 101 or 101A), location (e.g., rear, basement), or trailer lot number. (See Appendix E for Unit Designation Abbreviation Examples.)
- Column 7, Non-city Style Address Mail Delivery—identifies non-city style mail delivery addresses (may contain rural route and box numbers or highway contract route numbers and box numbers).
- Column 7a, Non-city Style ZIP Code—identifies the mail delivery ZIP Code for a non-city style address.
- Column 9, City Style Address Flag—displays "Y" if city style address, an "N" if non-city style address.
- Column 10a, **Latitude**—populated only if the Census Bureau has captured an address structure point for the address, otherwise blank.
- Column 10b, **Longitude**—populated only if the Census Bureau has captured an address structure point for the address, otherwise blank.

Note: Do not edit the gray rows containing the statement "NO KNOWN ADDRESSES IN THIS BLOCK." If there are residential addresses known in these blocks, add them to the Address List Add Page.

2.2.4 Editing the Census Address List

The columns you can edit on the Census Address List include:

- Column 3, **Action Code**—used to record the type of change when an update is made to the address list, including:
 - **C**—Correction to this addresses.
 - **D**—Delete this address.

- **J**—Address is not in this jurisdiction.
- N—Address is nonresidential.

Note: For reference, the bottom of each page of the address list contains the Action Code descriptions.

- Column 4, Census Geography Location of Address—contains the following subcolumns:
 - 4a, State County Code—identifies the FIPS state and county code for your jurisdiction.
 - 4b, Census Tract—uniquely identifies the census tracts within a county or statistically equivalent entity (up to a 4-digit number followed by a decimal point and a 2-digit suffix).
 - 4c, Census Block—identifies uniquely numbered census blocks within each census tract.
- Column 6, City Style Mail Delivery Address or E-911 Address or the Physical Location Description and Road Name—contains the following sub-columns that you may edit:
 - o 6b, **Complete Street Name**—including prefix and/or suffix directional as part of the address of the housing unit or group quarters.
 - o 6f, City Style ZIP Code—5-digit ZIP Code for each address.
- Column 8, **Map Spot Number**—unique numbers assigned by the Census Bureau to a structure that contains a housing unit or a group quarters address in selected areas.

Note: The Census Address List for county participants may contain ungeocoded addresses. They do not contain census tract and census block codes. If your county receives ungeocoded addresses, they are listed at the end of your Census Address List. Please provide the geocodes or structure coordinates (latitude and longitude) for these addresses, if known, to ensure and accurate housing unit enumeration in the correct location.

2.3 D-2008—The Address List Add Page

Use the Address List Add Page to add residential addresses for your jurisdiction not shown on the Census Address List and addresses that require a change or correction as discussed in **Section 2.2.4**. The Census Bureau provides you with five (5) copies of the Address List Add Page. We suggest that you make additional copies before recording your updates. For your convenience, a blank Address List Add Page is included on the last page of this guide. In addition, a blank Address List Add Page is on the LUCA Web site at http://www.census.gov/geo/partnerships/luca.html.

2.3.1 Heading Area

The top of each page of the Address List Add Page is the heading area. This area contains:

- The product type (Address List Add Page).
- The operation name [2020 Census Local Update of Census Addresses Operation (LUCA)].
- Information you must record on each Address List Add Page that you update and return to the Census Bureau:
 - o The Add Page For—include your entity name (e.g., Winter Co).
 - The Entity ID Code—available on the Census Address List; you must provide this code for the Census Bureau to process your address submissions (e.g., CO88009).
 - o The Page Number and Total Number of Pages (e.g., 10 of 20).
 - The Name of Preparer—the name of the person recording the information. (preparer required to have signed Confidentiality Agreement Form)
 - The Date Completed (e.g., 03/04/2018).

2.3.2 Columns to Complete

- Column 1, Line Number—print the sequential number for each added address record.
- Section 2, Census Geographic Location of Address—used to record the census geographic code of the address or addresses you are adding. Section 2 contains the following sub-columns:
 - o 2a—State County Code Number—the address list displays the state and county codes combined in column 4a, State County Code, to enter in column 2a.
 - 2b—Census Tract Number—uniquely identifies the census tracts within a county or statistically equivalent entity (up to a 4-digit number followed by a decimal point and a 2-digit suffix).
 - 2c—Census Block Number—identifies uniquely numbered census blocks within each census tract.

Note: The Census Bureau will not process address submissions that do not contain census geographic information codes or map spot location (by placing a dot on the map) or by providing latitude/longitude structure coordinates on the address list. You can find the specific entity codes (state code number, county code number, census tract number, and the census block number) on your LUCA materials. When adding addresses, pay attention to the correct format as well as correct census codes for each individual address.

• Column 3, Enter "Y" if this is a Group Quarters—used to indicate if an address is a group quarters. If the address is a group quarters, print a 'Y' in this column.

Note: If you enter a "**Y**" in column 3, you must provide a group quarters name (column 4d) and a facility name (column 4e) if the group quarters are associated with a facility (e.g. GQ Name – Dobbs Hall; Facility Name – University of Illinois). The Census Bureau will not process an identified group quarters address record without a group quarters name.

- Section 4, Residential Address—used to record the residential address. Record the following information in the sub-columns:
 - 4a—Complete Address Number—an address number, alone or with an address number prefix and/or address number suffix, that identifies a location along a thoroughfare or within a community (e.g., the "123" in 123 Aca Street, Atlantis, LE 99997).
 - 4b—Complete Street Name—street or road name associated with the address.
 - 4c—RR or HCR and Box Number—If the address is a rural route (RR) and box number or highway contract route (HCR) and box number, record it in this section.
 - 4d—Group Quarters Name—if the address is a group quarters, record the name of the facility (e.g., Atlantis Gardens Nursing Home).
 - 4e—Facility Name or Physical Location Description—enter the facility name if the group quarters are associated with the facility.
 - 4f—Apt/Unit Number—if the address is an apartment or unit, record the unit designation (e.g., 101). If the address contains a location designation (e.g., rear, basement) or trailer lot number, record the appropriate information. (Refer to Appendix E, Unit Designation Abbreviation.).

Note: New for the 2020 LUCA Operation, multiunit identifiers are required for all new added addresses and address updates for multiunit structures for LUCA. The Census Bureau will **not process a multiunit address without a multiunit identifier.**

- 4g—Mailing ZIP Code—5-digit ZIP Code.
- Column 5, Unique Map Spot Number—(Optional) enter a unique alphanumeric character (e.g., A1) in this column to indicate the location of the address on the census map after adding the corresponding map spot to the paper map (small format preferred, but can be added to the large format map if you chose not receive the small format maps).
- Column 6, Address Use, if Known, M=Mailing, L=Location, B=Both—(Optional) if known, enter a value indicating if the address is used for M (mail purposes), L (location purposes, including emergency services), or B (both mailing and location purposes).

Refer to **Figure 3** for an example of the Address List Add Page. For your convenience, a blank Address List Add Page is included on the last page of this guide. In addition, a blank Address List Add Page is on the LUCA Web site at http://www.census.gov/geo/partnerships/luca.html.

Figure 3. The Address List Add Page

2.4 D-2009—The Address Count List

The Address Count List contains the number of housing unit and group quarters addresses on the Census Address List for each census block within your jurisdiction. Use this list to identify inconsistencies between the Census Bureau's housing units and/or group quarters address counts and your housing unit and/or group quarters address counts. The Address Count List contains 72 census blocks per page and is for reference only.

2.4.1 Heading Area

The top of each page of the Address Count List is the heading area. This area contains:

- The product type (Address Count List).
- The operation name [2020 Census Local Update of Census Addresses Operation (LUCA)].
- The entity code (e.g., CO88099).
- The entity name (e.g., Winter County).
- The page number out of the total number of pages (e.g., 17 of 20).
- The creation date (e.g., 01/04/2018).

2.4.2 Column Contents

The Address Count List contains three sections with four columns each:

- 1. Census Tract Number—uniquely identifies the census tracts within a county or statistically equivalent entity (up to a 4-digit number followed by a decimal point and a 2-digit suffix).
- 2. Census Block Number—identifies uniquely numbered census blocks within each census tract.
- **3. Count of Housing Unit Addresses**—count of all housing unit addresses known to the Census Bureau for each census block within your jurisdiction.
- **4. Census Count of Group Quarters Addresses**—count of all group quarters addresses known to the Census Bureau for each census block within your jurisdiction.

2.4.3 Ungeocoded Addresses

If you are a county participant that received ungeocoded addresses, the **Unable to Geocode** row on the last page shows the total number of ungeocoded addresses in the Count of Housing Unit Addresses column.

2.4.4 Total Row Contents

A **Total** row on the last page of your list shows the total number of census blocks on the Address Count List, the Census Bureau's total count of housing unit addresses, and the Census Bureau's total count of group quarters addresses.

Figure 4. Address Count List

CHAPTER 3. THE LUCA PAPER MAPS

To support the LUCA paper map selection, the Census Bureau provides:

- Large format paper maps (36"x32"), which may include one or more sheets, to all participants that selected the Paper or Paper/Adobe Portable Document Format (PDF) product preference for the map selection. Use these maps to geocode your addresses.
 - The focus of the LUCA operation is addresses. While helpful, map updates are only required to indicate new, or updates to existing, non-city style address records. Participants choosing the paper address list/large format paper product preference that wish to make map updates to accompany their address list updates, must use the large format maps since they do not receive the PDF small format block maps. Due to the scale of the large format maps, updates may be difficult. Please do not allocate much of your 120-day review period attempting map updates. Focus on the address list.
- DVD containing PDF small format (8.5"x14") block maps including map spots (address structure coordinates showing the location of residential addresses). Only those participants that selected the large format paper map with PDF materials receive the Title 13 small format block maps. A PDF of the large format maps is included with this product preference.
- Block to Map Sheet Relationship List containing all of the census blocks within your jurisdiction and identifies the large format parent map sheet(s) on which each census block is located.

See **Appendix B** for a detailed explanation of the legend for the large format paper map. *All map examples depicting map spots use fictitious information for illustration, instruction, and training purposes only.*

3.1 Reading a Large Format LUCA Paper Map

There are three types of paper map sheets:

- 1. Index Sheets
- 2. Parent Sheets
- 3. Inset Sheets

3.1.1 Index Sheets—for reference (if more than one map sheet)

- Covers the entire extent of your jurisdiction.
- Divided into numbered grids that correspond to the parent sheets.
- Each numbered grid corresponds to the area covered by a parent sheet.
- Provided to jurisdictions with more than one parent sheet.
- Index sheets are for reference purpose only.

3.1.2 Parent Sheets

- Detailed view of a section of your jurisdiction.
- Corresponds to a grid and grid number on the Index sheet.
- Shows detail for features and geographic areas.
- Identifies location of census tracts and blocks within your jurisdiction on the parent sheet.

Note: Blocks affected by boundary improvements may contain a block number with an alpha suffix on the parent sheet and/or inset map. You do not need to provide the alpha suffix when changing or adding a geocode to a new address.

3.1.3 Inset Sheets

- Do not exist for every jurisdiction or on every parent sheet.
- Shows the detail of congested areas on parent sheets.
- Highlighted on the parent sheet with a fill pattern and identified with an alpha character (e.g., A).
- May be multiple sheets (e.g., A1, A2).
- Shows detail for features and geographic areas.

3.1.4 Map Information

The LUCA paper large format map shows some of the same information found on a typical road map, such as streets and roads, water features, and legal boundaries. However, the LUCA map displays this information using symbols unique to the Census Bureau. The map displays the following information:

- Entity boundary.
- Entity name and FIPS Entity Code.
- Census tract boundaries and numbers.
- · Census block boundaries and numbers.
- Streets and street names.
- Railroads.
- Water features.

The Map Border

- The key to adjacent areas, if your jurisdiction has multiple map sheets.
- Entity identification information.
- Barcode.
- Scale.
- North arrow.

The Map Legend

- Boundaries.
- Transportation.
- Other Features.
- Landmarks.
- Footnotes and Notes.

See **Appendix B** for a detailed description of the map legend.

Boundary Improvements

The map products reflect jurisdiction boundary improvements. A boundary improvement may split a census block. In these instances, the split block number contains the root number and a suffix. For example, the root block 1001, split by a boundary improvement, is now 1001A and 1001B. The jurisdiction containing 1001A receives only those addresses located within their jurisdiction. The jurisdiction containing 1001B receives only those addresses located within their jurisdiction.

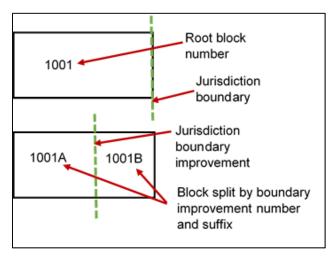

Figure 5. Boundary Improvements

Map Example

This example describes some of the symbols used on the Census Bureau large format parent sheet map.

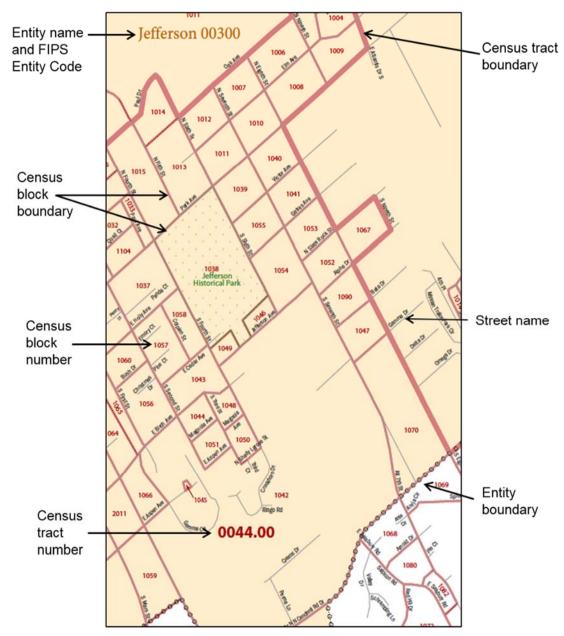

Figure 6. Example of a LUCA Large Format Parent Sheet Paper Map

3.1.5 D-2010—Block to Map Sheet Relationship List

The Block to Map Sheet Relationship List identifies the large format parent map sheet or sheets on which each census block is located. The sort for this product is by census tract number and census block number in ascending order. In the example shown in **Figure 7**, census block 1000 in census tract 46.00 is located on parent sheets 4 and 6.

Figure 7. Block to Map Sheet Relationship List

3.2 The Census Bureau PDF Maps

If you selected to receive the Census Bureau's PDF maps, you are required by law to follow the security guidelines as explained in **Section A.4.1**, **Protecting Digital Title 13 Materials** of the *Confidentiality and Security Guidelines* in **Appendix A**. In addition to the large format paper maps, the Title 13 Data Disc contains the Census Bureau's Title 13 block maps in a folder named "maps." You need the password sent to you separately from your paper LUCA materials to open the zipped, encrypted file as described in **Section 3.2.1**. The DVD also contains the 2020 Census Local Update of Census Addresses Operation (LUCA) paper respondent guide in PDF format, **2020LUCA_paper_respondent_guide.pdf** and a Readme file, **Readmefirst2.txt**.

All map examples depicting map spots use fictitious information for illustration, instruction, and training purposes only.

3.2.1 Opening the PDF Maps

You need Adobe Reader (or Acrobat Professional) to open and view the LUCA PDF maps. If needed, you can download the free PDF software at https://acrobat.adobe.com/us/en/acrobat/pdf-reader.html.

- To keep your work organized, create a new directory or new folder on your hard drive.
- Insert the Title 13 Data Disc.
- Right click on the folder named "maps" and select copy.

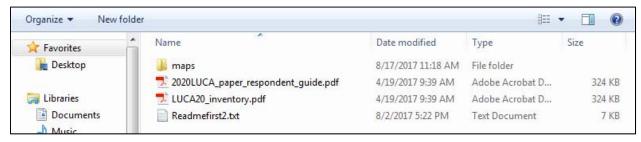

Figure 8. "maps" Folder

- Open the new folder you created and paste the copied "maps" folder.
- Double-click the "maps" folder, the following files appear in the folder:
 - Readme.txt—contains an Adobe Reader statement.
 - About_the_maps.pdf—contains tips for using the pdf small format block maps and includes a brief description of the map types and supplemental files. In addition, this file includes tips for printing the small format maps.
 - LUCA20<EntType><EntCode>.pdf—contains images of the large format paper maps you received.
 - LUCA20< EntType ><EntCode>_BLK2MS.txt—contains a list of all the blocks within your jurisdiction and the sheet or grid number(s) that identify the parent sheet where the block is located. This file is in a semicolon text format.
 - Title13_BlockMaps.exe—this .exe contains the Title 13 small format block maps to update road features and map spots.

Figure 9 shows the folder containing the extracted file:

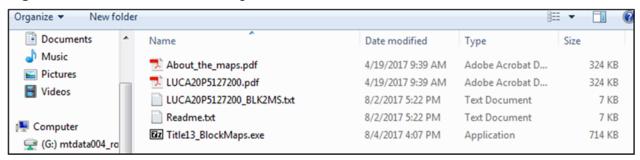

Figure 9. "maps" Extracted Files

See **Section 3.2.6.1** for instructions on opening the Title13_BlockMaps.exe file.

3.2.1.1 Examples of File Names

The following are a few examples using entity types and entity codes:

- LUCA20C88003.pdf—Large format bundled PDF map for a county.
- LUCA20P2302060.pdf—Large format bundled PDF map for a place.
- LUCA20M2717317918.pdf—Large format bundled PDF map for an MCD (township).
- LUCA20R0010.pdf— Large format bundled PDF map for a reservation.
- LUCA20C88003_BLK2MS.txt—Block to Map Sheet Relationship List for a county.
- LUCA20M8817317918_BLK2MS.txt—Block to Map Sheet Relationship List for an MCD.

Table 3: Entity Type and Entity Code

<enttype> IS ENTITY TYPE:</enttype>	<entcode> IS ENTITY CODE:</entcode>
C = COUNTY	COUNTY = SSCCC
M = MINOR CIVIL DIVISION (MCD)	MCD = SSCCCMMMMM
P = INCORPORATED PLACE	PLACE = SSPPPPP
R = AMERICAN INDIAN RESERVATION	AIR = RRRR
	SS = STATE CODE (FIPS)
	CCC = COUNTY CODE (FIPS)
	MMMMM = MCD CODE (FIPS)
	RRRR = AIR CODE (CENSUS)

3.2.2 Boundary Improvements

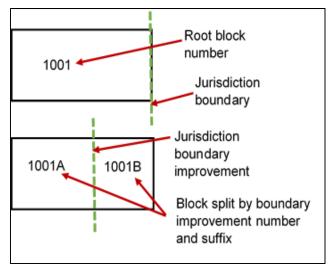

Figure 10. Boundary Improvements

The PDF small format block map products reflect jurisdiction boundary improvements. A boundary improvement may split a census block. For the small format block maps in these instances, the split block number contains the root number and a suffix. For example, the root block 1001, split by a boundary improvement, is now 1001A and 1001B. The jurisdiction containing 1001A receives only those addresses located within their jurisdiction. The jurisdiction containing 1001B receives only those addresses located within their jurisdiction.

3.2.3 The LUCA20<EntType><EntCode>_BLK2MS.txt File

The Block to Map Sheet Relationship List is a semicolon delimited text file. This file contains the specific map sheet or sheets on which each census block is located. You can open the file with a simple text editor such as WordPad or Notepad. You can also import the file with spreadsheet software such as Excel.

- 1) To open the file in your text editor:
 - Click on the LUCA20<EntType><EntCode>_BLK2MS.txt file

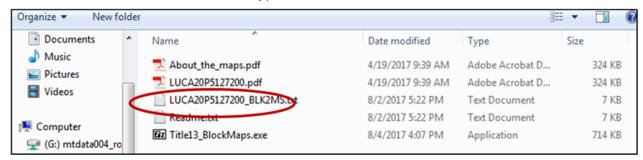

Figure 11. The Block to Map Sheet Relationship File

- When the file opens, the information appears in the following columns:
 - Type
 - Block GEOID
 - Block Suffix
 - Sheets

In the following example, the Block GEOID (880090501071000) contains:

- State 88.
- County 009.
- Census tract 050107.
- Census block 1000.
- The number of parent sheets, 2.

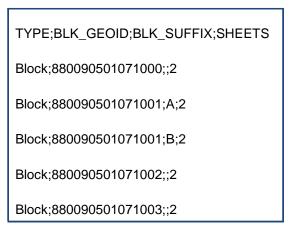

Figure 12. Example of the Digital Block to Map Sheet Relationship List Opened in WordPad

- 2) To import the file into a spreadsheet such as Excel:
 - Open a new Excel spreadsheet.
 - Select 'Data'. Click on 'Get External Data.' Select 'From Text.'

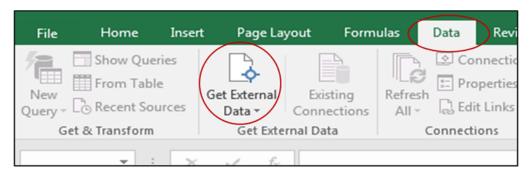

Figure 13. Importing a File in Excel

- Navigate to the folder where you saved the file and select the file. When the file highlights, select '**Import**' at the bottom of the screen.
- The 'Text Import Wizard' window opens in Excel. Step 1 of 3, select 'Next.'

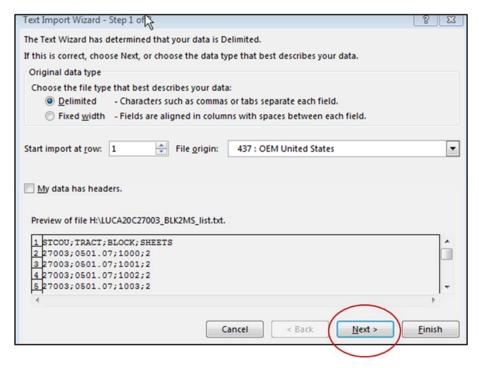

Figure 14. Text Import Wizard Step 1

 Step 2 of 3, select the 'Semicolon' box. From the 'Text qualifier' drop-down menu, select '(none)'. Select 'Next.'

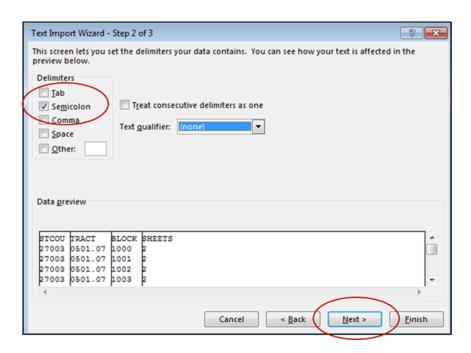

Figure 15. Text Import Wizard Step 2

- Step 3 of 3, hold down the 'Shift' key and select the last column. The columns will highlight black.
- Select the 'Text' radio button.
- Click 'Finish' at the bottom of the window.

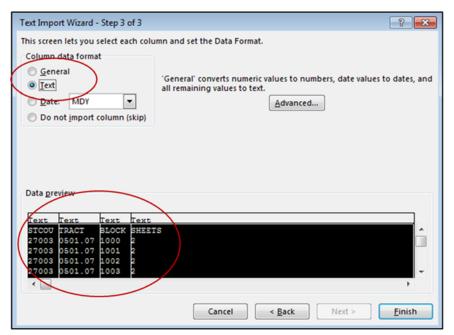

Figure 16. Text Import Wizard Step 3

• When the Import Data window opens, select 'OK.' The file opens in Excel.

3.2.4 The LUCA20<EntType><EntCode>.pdf File

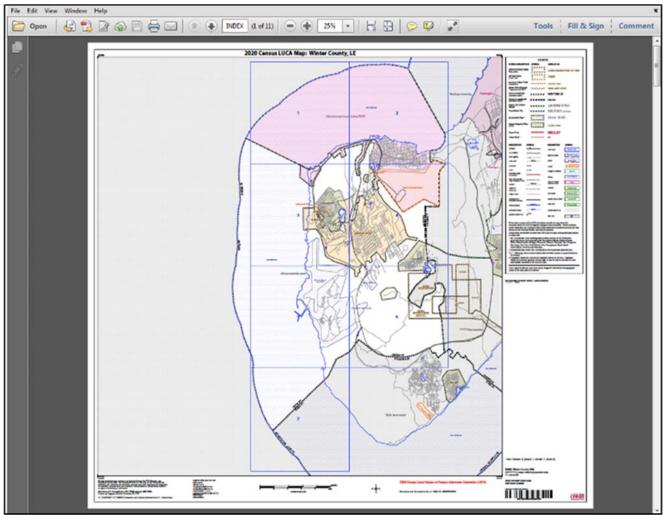

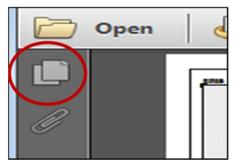

Figure 17. Entity Index Map

The LUCA20<EntType><EntCode>.pdf file contains your entity's PDF file of the index map and all the parent and inset paper maps you received bundled into one file. The lower right corner of the map provides information about the total number of map sheets within the file. The numbered grids displayed on the index map correspond to each large format parent sheet number within the file. You can find where each census block is located using the Block to Map Sheet Relationship List,

LUCA20<EntType><EntCode>_BLK2MS.txt.

3.2.5 Navigating the PDF Large Format Map File

Once the index map is open, you can click the paper icon in the upper left to display the thumbnails (The screen display depends on the version of Adobe you use). These map sheet page numbers correspond to the grid numbers on the main index sheet.

Figure 18. Paper Icon

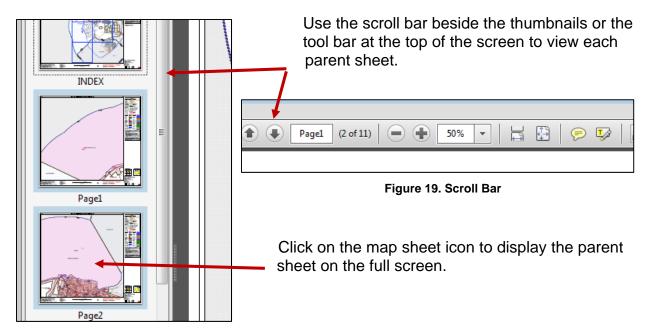

Figure 20. Map Screen Icon

Figure 21. Image Magnification

To zoom in or out, use the plus or minus symbols or the dropdown arrow for the image size (percentage) you need to display.

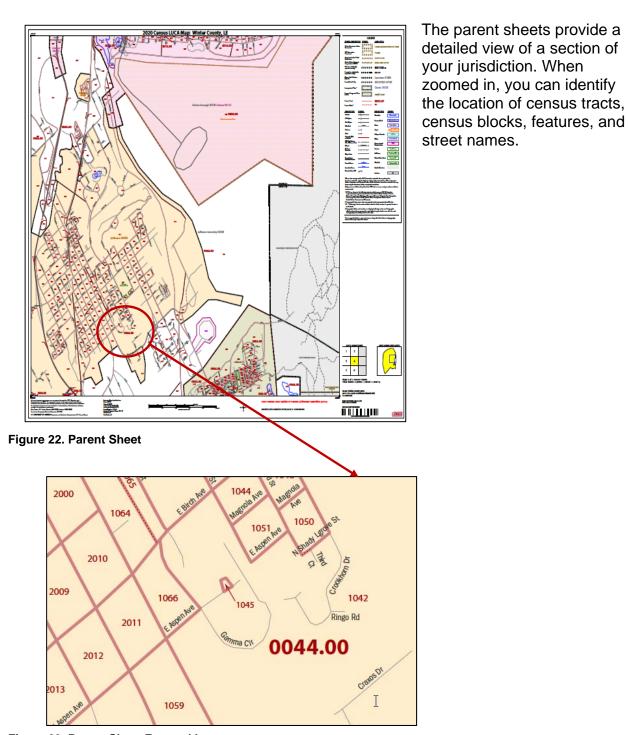

Figure 23. Parent Sheet Zoomed In

3.2.6 The Title13_Block Maps.exe File

This file contains the Title 13 small format block maps to update road features and map spots. The print size is legal, 8 ½ X 14. (You must use legal size, 8 ½ X 14-inch paper to ensure optimal scale and use.). Print only those maps that you need for updates and return them with your updated address list.

3.2.6.1 Opening the Title 13 Block Maps

 Double-click the file named Title13_BlockMaps.exe to extract the small format block maps.

Figure 24. Command Prompt Screen

A command prompt will open and ask for your password. Enter the password sent to you by the Census Bureau. (Your password is invisible and does not appear as you type.) The small format block maps will extract to the "maps" folder.

• The following list of files opens in the folder:

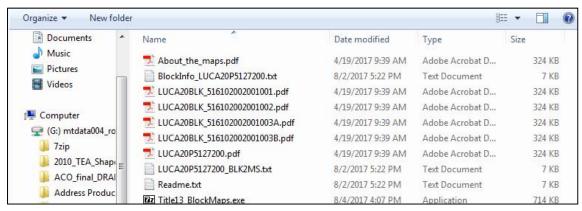

Figure 25. List of Files for the Title13 Block Maps

3.2.6.2 The BlockInfo_LUCA20<EntType><EntCode>.txt File

The **BlockInfo_LUCA20<EntType><EntCode>.txt** file is a semicolon delimited text file that includes basic information for each block in the participant entity. Follow the instructions in **Section 3.2.6.1** to open the file.

File Name Examples:

 ${\sf BlockInfo_LUCA20C88003.txt}$

BlockInfo_LUCA20M881731791.txt

BlockInfo_ LUCA20R0010.txt

Each record includes information specific to that block: block GEOID; state code; county code; census tract code; related place code; related MCD code; related Federal American Indian Reservation code; parent sheet map scale; block map file name; and total number of map sheets.

Example:

BLK_GEOID;State;County;Tract;Place;MCD;FAIR;ParentScale;MapFilename;TotalSheets 500039710001021;50;003;9710.00;53125;04825;;1419;LUCA20BLK_500039710001021.pdf;1 500039710001022;50;003;9710.00;53125;04825;;980;LUCA20BLK_500039710001022.pdf;6

3.2.6.3 The LUCA20BLK<FullBlockCode>.pdf File

The large format and small format PDF block maps use current block, therefore the "full block code" may include alpha block suffixes. Each record includes the state code, county code, census tract code, and census block code.

File Name Examples:

LUCA20BLK 880350403051064.pdf

LUCA20BLK 880350403051063.pdf

LUCA20BLK_880350403051062A.pdf—with alpha block suffix

LUCA20BLK_880350403051062B.pdf—with alpha block suffix

 To view a block map, click on the PDF file for the block number you need to review and/or update.

3.2.6.4 Multi-sheeted (Bundled) PDF Block Maps Page 1 of 3

Figure 26. Two Sheets Required to Display One Block (1000)

Page 1 of 3–a small format block map file may contain a single block or may contain multi-sheeted (bundled PDF) images within a single block. For a multi-sheeted block, the first map displays an index map. In this illustration, census tract 0054.00, block 1000, requires two sheets to display individually. (These are larger area blocks. Some large census blocks may require up to 50 or more sheets.)

For multi-sheeted blocks, select only the sheet that you need to print to make your updates.

The small format block maps contain Title 13 map spots as shown below:

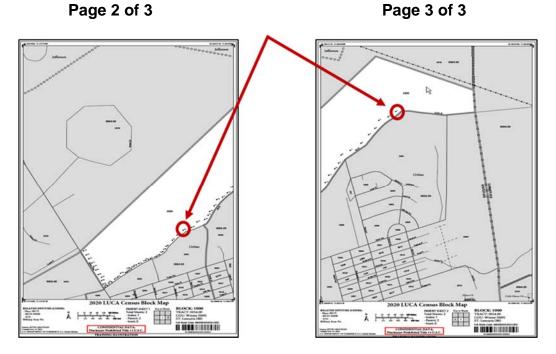

Figure 27. Pages 2 and 3 Showing the Individual Images of Block 1000 (Training—Fictitious Information)

Landscape Orientation

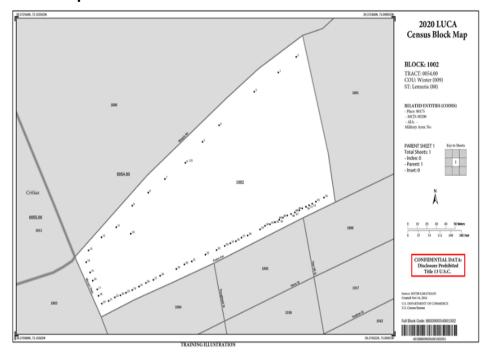

Figure 28. Landscape Map Image Example (Training—Fictitious Information)

The PDF block maps are portrait orientation, as shown above, or landscape orientation depending on the shape and orientation of the block. For multiunit structures, the map spot number includes the number of units in parentheses. For example, 6 (4) indicates map spot 6 contains 4 units.

3.2.6.5 Inset Sheets

Inset sheets show the detail of congested areas on parent sheets. Inset sheets are:

- Highlighted on the parent sheet with a fill pattern.
- Identified with an alpha character such as H.
- May contain multi-sheeted images
- Identified with an alpha/numeric character such as H1, H2, etc.

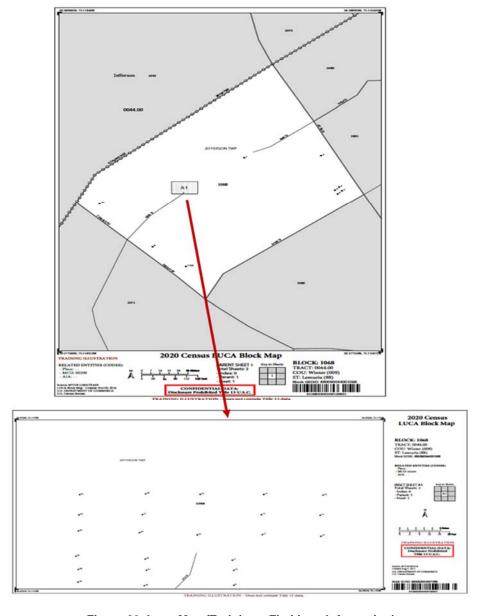

Figure 29. Inset Map (Training—Fictitious Information)

3.2.6.6 Printing the PDF Small Format Block Maps

To print a block map for updates, select **File**, then **Print**, or choose the printer icon. Use the full size block map for making your updates. This ensures that the correct state, county, census tract, and census block are shown in the map margin. You must use legal size, 8 ½ x 14 paper, to ensure optimal scale and use. Refer to the file, **About_the_maps.pdf**, for additional printing tips.

Figure 30. Printing Small Format Block Maps

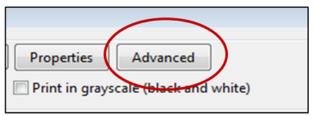

Figure 31. Advance Printing

If you have trouble printing, for example, some areas such as water features print black, select Advanced from the print screen.

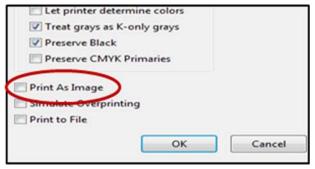

Figure 32. Print As Image

Select the 'Print As Image' and click OK.

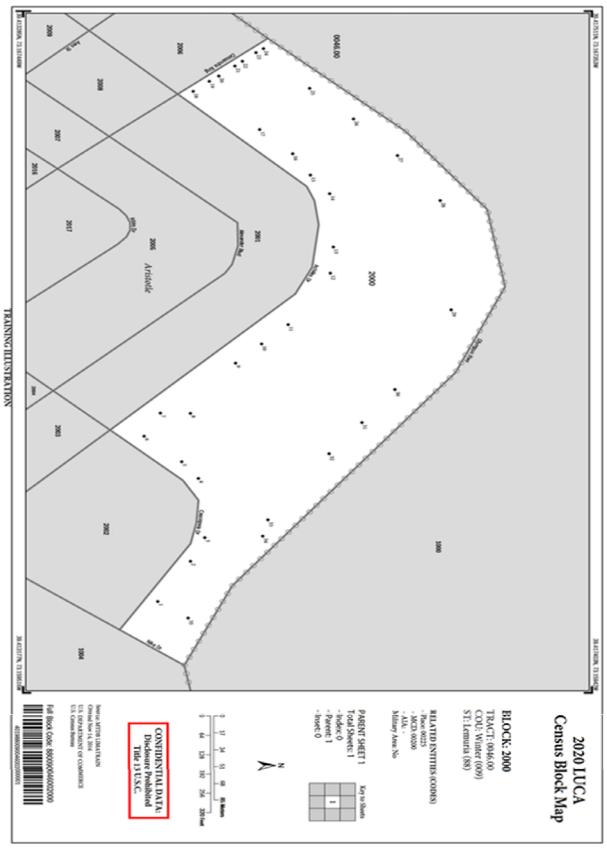

Figure 33. Small Format PDF Block Map (Training—Fictitious Information)

CHAPTER 4. REVIEWING AND UPDATING THE ADDRESS LIST, ADDRESS LIST ADD PAGE, AND PAPER MAPS

4.1 Adding Residential Addresses to the Address List Add Page

Use the Address List Add Page to add **residential addresses** for your jurisdiction not shown on the Census Address List or to add addresses deleted from the Census Address List and added to incorporate corrections that are not editable on the Census Address List. Make sure to print all entries completely and legibly.

When adding an address, you must include the location of the housing unit or group quarters structure by providing either the census geographic codes (i.e., state county code, census tract number, and census block number) or map spot location (by placing a dot on the map or by providing structure latitude/longitude coordinates on the Address List Add Page. You can find the geographic codes on your LUCA materials.

If you choose to add structure coordinates, provide a minimum of eight characters including the decimal, e.g., 42.58953 for latitude and minimum of nine characters for the longitude including the negative and decimal, e.g., -87.58953.

4.2 Adding Records with Similar Information

When adding more than two addresses where the information is the same, you can print the information in the first and last entry of each column then draw an arrow down to indicate the similar information. The exceptions to this are the **Apt/Unit Number** (4f) since you must enter each individual unit number for multiunit structures and when adding individual **Unique Map Spot Numbers** (5).

Note: You may draw an arrow down in column 4a, Complete Address Number, only if the house number is the same for all buildings or units. See Figure 35. Adding New City Style Addresses for a New Street (Training—Fictitious Information).

4.3 Adding Residential City Style Addresses to the Address List Add Page

When adding addresses to multiple pages, be sure to enter the appropriate **Line Number** in column 1 for each address. For example, you can add four addresses to each page of the Address List Add Page. Column 1 on page one begins with 1 and ends with 4.

On the next page, page two, enter 5 in column 1, **Line Number** and end with 8. Continue adding the line number sequence for each page as needed.

Note: Multiunit identifiers are required for all new added addresses and address updates for multiunit structures for LUCA. The Census Bureau will not process an address without a multiunit identifier.

The following are a few examples of adding residential city style addresses to the Address List Add Page:

- Adding new addresses for a new street.
- Adding addresses for a new group quarters multiunit structure.
- Adding addresses for a new multiunit structure.

4.3.1 Scenario: Adding New Addresses for a New Street

During your review, you may find addresses missing from the Address List located on streets that are partially or entirely missing from the maps. See **Figure 35** and Error! Reference source not found. for adding new addresses for a new street to the Address List Add Page and **Figure 37** and **Figure 38** for adding to new streets to the small format paper maps. The paper map examples are PDF small format maps using the zoom feature for clarity. When updating the small format maps, please use the full size, 8 ½ X 14, full size map. Refer to **Chapter 5, TIGER Partnership Shapefiles** if you

are using shapefiles.

Olisan St is a new street with ten newly constructed housing units in census tract 0054.00, census block 2001. The addresses are missing from the Address List and the street is missing from the map.

The address ranges⁴ for this street are 101 through 109 on the east side of the street and 100 through 108 on the west side of the street.

The address breaks⁵ are between 703 and 705 on Nale Pl and 406 and 408 on Larme Ave.

On the Address List Add Page:

 Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.

⁴ **Address ranges** are the lowest and highest address numbers used to identify structures along each side of a street segment that has city style addresses. Usually one side of the street has even address number and the opposite side has odd address numbers.

⁵ **Address breaks** are the city style addresses on each side of a boundary or at an intersection of a street with another street or feature.

Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)

Enter the information in section 2, Census Geographic Location of Address, including
the State County Code (2a) number, Census Tract Number (2b), and Census Block
Number (2c). If there are multiple entries, print the information in the first and last lines
needed and draw an arrow down from the first entry to the last entry.

Note: If you choose, you may enter the optional structure latitude and longitude coordinate information in addition to or rather than the State County Code, Census Tract Number, and Census Block Number in section 4, space permitting. See Figure 37. Adding New City Style Addresses for a New Street with Lat/Long Structure Coordinates and Unique Map Spot Numbers (Training—Fictitious Information).

- Enter each individual house number in the Complete Address Number (4a) column.
- Enter the **Complete Street Name** (4b) in the first and last lines needed and draw an arrow down from the first entry to the last entry.
- Enter the **Mailing ZIP Code** (4g) in the first and last lines needed and draw an arrow down from the first entry to the last entry.
- Optional: If you know the approximate location of each housing unit you are adding, you may assign each individual address a **Unique Map Spot Number** (5) such as A1, A2, A3, etc. Each map spot number must correspond to the address's location if you are using the paper map.

Refer to Figure 36. Adding New City Style Addresses for a New Street and Unique Map Spot Numbers (Training—Fictitious Information) and Figure 39. Adding a New Street and Unique Map Spot Numbers on the Small Format Paper Map (Training—Fictitious Information).

- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

Repeat this procedure for all the Address List Add Page sheets needed. See **Figure 35**. **Adding New City Style Addresses for a New Street (Training—Fictitious Information)**.

Figure 37. Adding New City Style Addresses for a New Street with Lat/Long Structure Coordinates and Unique Map Spot Numbers (Training—Fictitious Information)

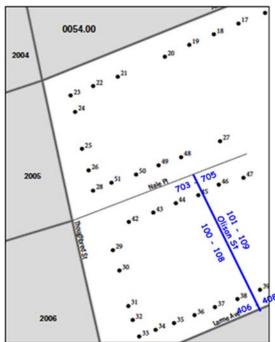

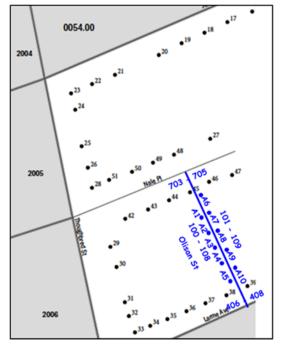

Figure 38. Adding a New Street on the Small Format Paper Map

(Training—Fictitious Information)

On the Small Format Paper Map:

- 1. Using a colored pencil, draw the location of the new street on the map.
- 2. Print the street name. In this example, Olisan
- 3. Print the address ranges for each side of the new street. For this example, 101-109 on the east side of Olisan St and 100-108 on the west side.
- Print the address breaks where Olisan St. intersects Nale PI (703-705) and Larme Ave (406-408) as shown in the example.

On the Small Format Paper Map:

- 1. Optional: If you know the approximate location of each housing unit you are adding, you may assign each individual address a unique map spot number, A1, A2, A3, A4, etc.
- 2. Label each map spot with its associated unique map spot number as you recorded in column 5 on the Address List Add Page beginning with A1, A2, A3, A4 etc.

Figure 39. Adding a New Street and Unique Map Spot Numbers on the Small Format Paper Map (Training—Fictitious Information)

4.3.2 Scenario: Adding a New Group Quarters Multiunit Structure Addresses to the Address List Add Page

Although adding a group quarters address is similar to adding a housing unit, group quarters addresses require a group quarters name, facility name, and a GQ flag. This example demonstrates how to add a group quarters address that contains three individual buildings.

Aristotle University constructed three new residence halls, Pandora Hall, Buildings 1, 2, and 3 at 225, 227, and 229 Achilles Dr.

On the Address List Add Page:

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1 for each building.
- Enter the information in section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c). Enter the same information in the last line needed and draw an arrow down.

Note: If you choose, you may enter the optional structure latitude and longitude coordinate information in addition to or rather than the STATEFP, COUNTYFP, TRACT, and BLOCK in section 4, space permitting. Refer to **Figure 42**.

• Enter a "Y" in column 3, Enter "Y" if this is a Group Quarters, to flag that this is a group quarters.

Note: If you enter a "Y" in column 3, you must provide a group quarters name (column 4c) and a facility name (column 4d) if the group quarters are associated with a facility (e.g. Group Quarters Name – Pandora Hall; Facility Name – Aristotle University). The Census Bureau will not process an identified group quarters address record without a group quarters name.

- Enter the address number for each building, 225, 227, and 229 in column 4a, **Complete Address Number**, in the first and last lines needed and draw an arrow down.
- Enter the street name, Achilles Dr, in column 4b, Complete Street Name for each building.
- Enter the name of the group quarters in column 4d, Group Quarters Name. In this
 example, Pandora Hall and the building number.
- Enter the **Facility Name** in column 4e for each building, if the group quarters is associated with a facility. In this example, the facility is Aristotle University.
- Enter the **Mailing ZIP Code** (4g) in the first and last lines needed and draw an arrow down from the first entry to the last entry.
- Optional: If you know the approximate location of each building you are adding, you may assign each building a unique map spot number (e.g., A1, A2, etc.) in column 5. Each

map spot number added on the Address List must correspond to the building's location if you are using the small format paper map.

Refer to Figure 41. Adding New City Style Addresses for GQ Multiunit Structures and Map Spots (Training—Fictitious Information), and Figure 43. Identifying New GQ Multiunit Structures with Map Spots on the Small Format Paper Map (Training—Fictitious Information).

- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

Refer to Figure 40. Adding New City Style Addresses for GQ Multiunit Structures to the Address List Add Page (Training—Fictitious Information).

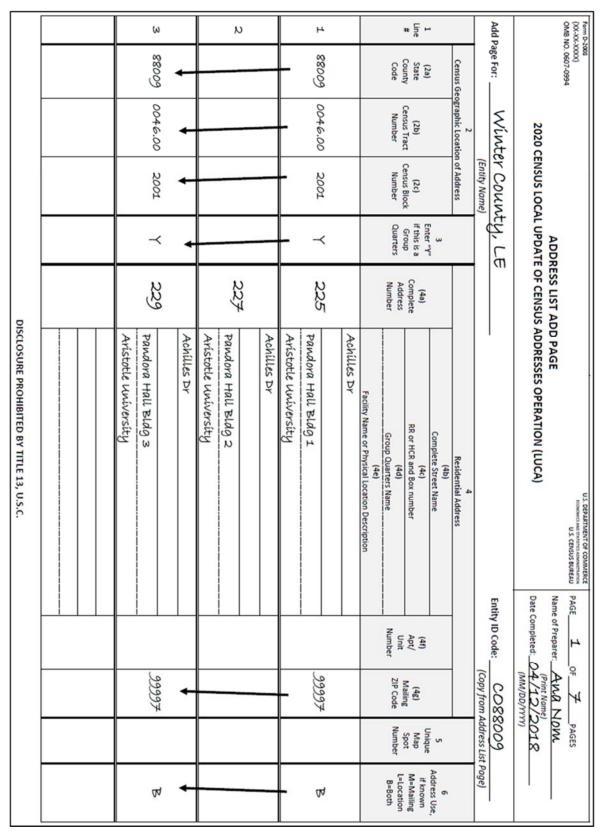

Figure 40. Adding New City Style Addresses for GQ Multiunit Structures to the Address List Add Page (Training—Fictitious Information)

Figure 42. Adding New City Style Addresses for GQ Multiunit Structures with Lat/Long Structure Coordinates (Training—Fictitious Information)

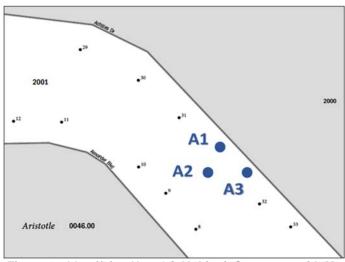

Figure 43. Identifying New GQ Multiunit Structures with Map Spots on the Small Format Paper Map (Training—Fictitious Information)

On the Small Format Map:

- Optional: If you know the approximate location of each address you are adding, you may assign each individual address a unique map spot number, A1, A2, A3, etc.
- 2. Label each map spot with its associated unique Map Spot Number as you recorded in column 5 on the Address List Add Page beginning with A1, A2, A3, etc.

4.3.3 Scenario: Adding Addresses for New Multiunit Buildings to the Address List Add Page

You must provide unit identifiers (e.g. Apt 1, Apt 2, Unit A, Unit B) for multiunit buildings. Multiunit buildings include large structures such as a high-rise building, smaller structures such as buildings with 3-4 units, and large houses subdivided into apartments.

A new two-story multiunit building in census tract 0054.00, block 1002 located at 2014 Maople Rd contains four apartments, two on the first floor and two on the second floor. The addresses are not listed on the Address List.

On the Address List Add Page:

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)
- Enter the information in section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c). Enter the same information in the last line and draw an arrow down. Enter the house number in the first and last line needed in the Complete Address Number (4a) column and draw an arrow down.

Note: If you choose, you may enter the optional structure latitude and longitude coordinate information in addition to or rather than State County Code, Census Tract Number, and Census Block Number in section 4, space permitting. Refer to Figure 46. Adding City Style Addresses for a New Multiunit Structure with Lat/Long Structure Coordinates (Training—Fictitious Information).

- Enter the street name in the first and last lines needed in the **Complete Street Name** (4b) and draw an arrow down.
- Enter the **Apt/Unit Number** (4f) for each apartment or unit.

Note: You must provide unit identifiers (e.g. Apt 1, Apt 2, Unit A, Unit B) for multiunit buildings. Ensure that all your apartment buildings, especially small multiunit buildings (3-4 units), such as large houses subdivided into apartments, have a separate address line for each unit that includes the basic street address and the individual unit designation.

- Enter the Mailing ZIP Code (4g) in the first and last lines needed and draw an arrow down.
- Enter the **Unique Map Spot Number** (5)—**Optional**, if the approximate location is known. See the note below.

Note: You may add a unique map spot number to the Address List Add Page for the newly constructed apartment building. The unique map spot represents the structure and all of the units within it, refer to **Figure 45**. If you add a unique map spot number on the Address List Add Page, you must identify the map spot location on the small format paper map, refer to **Figure 47**.

- Enter the Address Use (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

 On the next page of the Address List Add Page, repeat the instructions until all of the buildings and their individual units are added.

Refer to Figure 44. Adding City Style Addresses for a New Multiunit Structure to the Address List Add Page (Training—Fictitious Information).

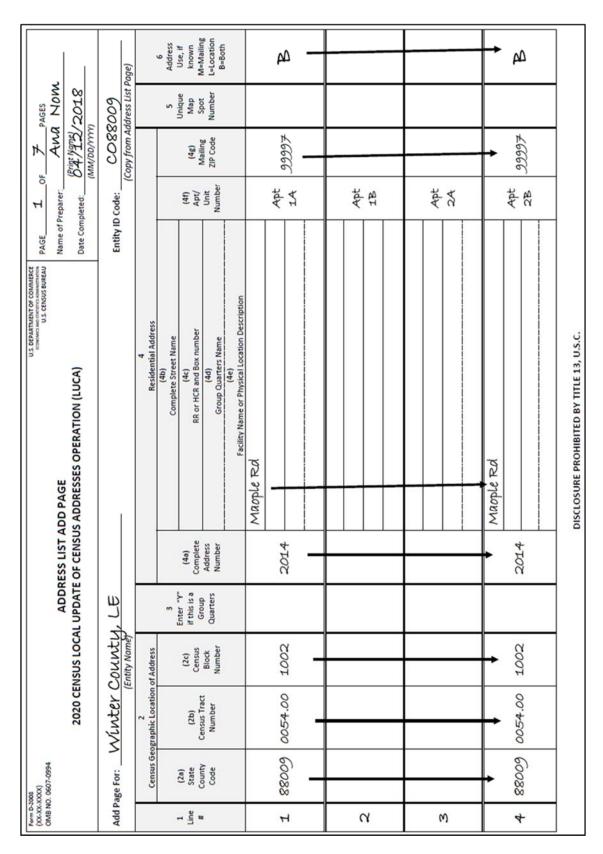

Figure 44. Adding City Style Addresses for a New Multiunit Structure to the Address List Add Page (Training—Fictitious Information)

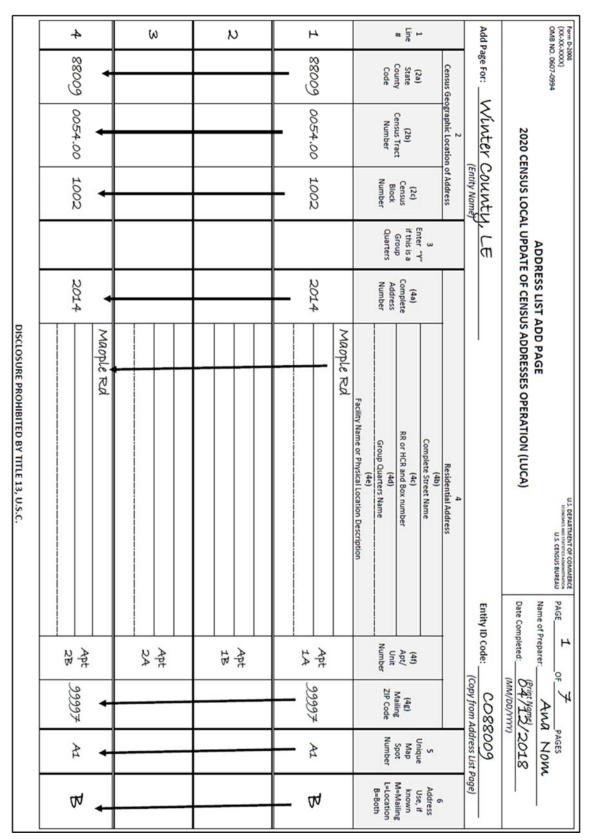

Figure 45. Adding City Style Addresses for a New Multiunit Structure and Map Spots (Training—Fictitious Information)

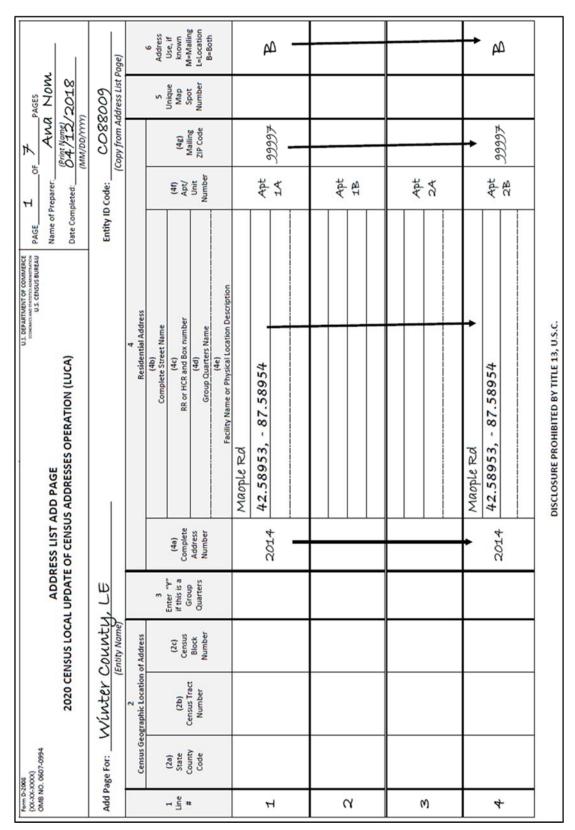

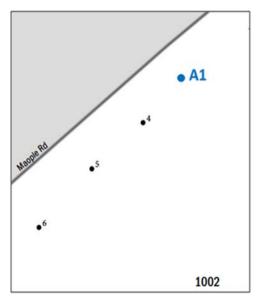

Figure 46. Adding City Style Addresses for a New Multiunit Structure with Lat/Long Structure Coordinates (Training—Fictitious Information)

On the Small Format Paper Map:

- 1. Optional: If you know the approximate location of the multiunit unit structure you are adding, you may assign a unique map spot number, such as A1.
- Label the map spot with its associated Unique Map Spot Number as you recorded in column 5 on the Address List Add Page.

Figure 47. Identifying a New Multiunit Structure on the Small Format Paper Map (Training—Fictitious Information)

4.4 Updating Addresses on the Census Address List

Action Codes

There are four action codes used to make updates to the Census Address List. You can make updates to **residential** addresses only. You must include the appropriate action code with each address record that you update. The Census Bureau will process only those address records that contain an action code.

- **C**—Correct this address.
- D—Delete this address.
- **J**—Address is not in this jurisdiction.
- N—Address is nonresidential.

The C Action Code

Print a "C" in the Action Code, column 3, on the Census Address List for the following situations:

- Incorrect state code.
- Incorrect county code.
- Incorrect census tract number.
- Incorrect census block number.
- Incorrect street name (including street directional and street type information).
- Incorrect ZIP Code.

The D Action Code

Do not make corrections to any other columns when entering the "D" action code.

Print a "**D**" in the **Action Code**, column 3, on the Address List for the following situations:

- Housing unit or multiunit structure no longer exists, is uninhabitable, or is a duplicate.
- Street or addresses along a street that no longer exists.

Print a "**D**" in the **Action Code**, column 3, on the Census Address List then use the Address List Add Page to add corrected addresses for the following situations:

- Incorrect house number.
- Incorrect apartment or unit number.
- Single housing unit converted to a multiunit structure.
- Multiunit structure converted to a single housing unit.
- Single housing unit converted to a group quarters.
- Group quarters converted to a single housing unit.

The J Action Code

Enter a "J" in the **Action Code** (3) column for residential addresses that are not in your jurisdiction. **Do not make corrections** to any other columns for an address not in your jurisdiction.

The N Action Code

Print an "N" in the Action Code, column 3, on the Census Address List for addresses that are listed on the Address List but are used for any purpose other than residential such as:

- Businesses.
- Schools.
- Churches.
- Government offices.

Before entering an "N" action code, ensure that the structure does not contain a housing unit. Some structures can contain both residential and nonresidential units even though they have a single address such as an apartment over a store or a home with an office. **Do not make corrections** to any other columns for nonresidential addresses.

4.4.1 Correcting Addresses (The C Action Code)

The following is a list of a few examples using the "**C**" Action Code:

- Correcting a street and addresses located in an incorrect block.
- Correcting an address located in an incorrect block.
- Correcting a street name.

4.4.1.1 Scenario: Correcting the Location of a Street and its Associated Addresses

Correcting the location of a street located in an incorrect census block is a two-step process. First correct affected address on the Census Address List using the instructions below, then identify the correct location of the street on the map.

The Census Address List shows 100 through 117 S Holdener St, map spots 38-52, as located in census block 1003. According to local sources, S Holdener St is located south of Pampas St in census block 1009.

On the Census Address List:

- Print a "C" in the Action Code (3) column for the first and last block number that needs correction.
- Draw an arrow down from the first entry to the last entry.
- In the Census Block (4c) column, cross out the incorrect block number and print the correct block number above it. In this example, cross out 1003 and print 1009 above it.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Census Address List sheets containing the block number that needs correction.

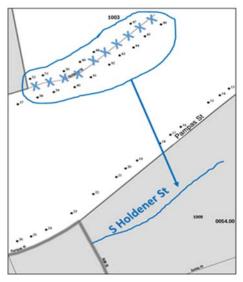

Refer to Figure 48. Correcting the Location of a Street and its Associated Addresses on the Census Address List.

Indicate the correction on the paper map.

See Figure 49. Identifying the Location of a Street and its Associated Addresses on the Small Format Paper Map (Training—Fictitious Information) and Figure 50. Identifying the Location of a Street and its Associated Addresses on the Small Format Paper Map with Address Ranges and Address Breaks (Training—Fictitious Information).

Figure 48. Correcting the Location of a Street and its Associated Addresses on the Census Address List

- Using a colored pencil, cross out the incorrect location of S Holdener St with a series of "Xs." Circle the entire street to include all the affected map spots that need to be moved with the street.
- 2. Redraw S Holdener St in its correct census block, 1009, and print the street name above it.
- 3. Draw an arrow to the correct location of S Holdener St.

Figure 49. Identifying the Location of a Street and its Associated Addresses on the Small Format Paper Map (Training—Fictitious Information)

Identifying the Location of a Street and its Associated Addresses on the Small Format Paper Map with Address Ranges and Address Breaks:

- 1. **Optional:** At this location, S Holdener St includes an even numbered address range⁶ from 100 through 114 on the north and an odd numbered address range from 101 through 117 on the south.
- 2. Print the address ranges above and below the S Holdener St.
- Print the address breaks where S Holdener St intersects Aldin St between address numbers 101 and 103⁷.

Figure 50. Identifying the Location of a Street and its Associated Addresses on the Small Format Paper Map with Address Ranges and Address Breaks (Training—Fictitious Information)

⁶ **Address ranges** are the lowest and highest address numbers used to identify structures along each side of a street segment that has city style addresses. Usually one side of the street has even address numbers and the opposite side has odd address numbers.

⁷ Address breaks are the city style addresses on each side of a boundary or at an intersection of a street with another street or feature.

4.4.1.2 Scenario: Correcting an Address Located in an Incorrect Census Block

During your address review, you may find an address (house number/street name) is correct but the structure is located in an incorrect census block.

The Census Address List shows 411 Alexander Blvd located in block 2001. Local sources indicate that 411 Alexander Blvd is located in block 2005.

On the Census Address List:

- Print a "C" in the Action Code (3) column.
- In the **Census Block** (4c) column, cross out the incorrect block number and print the correct block number above it. In this example, cross out 2001 and print 2005 above it.
- Optional: If you know the approximate location of the address in the correct block, cross out the map spot number in the **Map Spot Number** (8) column and print a unique map spot number above it. In this example, the assigned map spot number is C1, representing a correction.

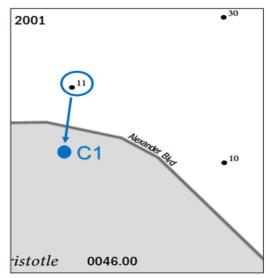

Refer to Figure 51. Correcting an Address Located in an Incorrect Block on the Census Address List.

• Indicate the correction on the small format paper map.

Refer to Figure 52. Correcting an Address Located in an Incorrect Block on the Small Format Paper Map (Training—Fictitious Information).

Figure 51. Correcting an Address Located in an Incorrect Block on the Census Address List

- Using a colored pencil, circle the incorrect map spot of the address. In this example, 411 Alexander Blvd, map spot 11.
- 2. Draw a colored circle to represent the map spot in the correct location.
- 3. Draw an arrow down from the incorrect map spot to the correct location.

Figure 52. Correcting an Address Located in an Incorrect Block on the Small Format Paper Map (Training—Fictitious Information)

4.4.1.3 Scenario: Correcting an Incorrect Street Name

Incorrect street names on the Census Address List may happen for a variety of reasons. For instance, they may occur when the Census Bureau receives the USPS Delivery Sequence File (DSF)⁸ that contains an incorrect street spelling or as an incorrect entry during Census Bureau field operations.

The Census Address List and map incorrectly shows Nale PI instead of Nail St, the correct street name.

On the Census Address List:

- Print a "C" in the **Action Code** (3) column for the first and last addresses that are affected by the street name correction.
- Draw an arrow down from the first entry to the last entry.
- In the **Complete Street Name** (4b) column, cross out the incorrect name, in this example, Nale PI, and print the correct name, Nail St, above it for the first street name and the last street name that needs correction.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Address List sheets containing the street name that needs correction.

See Figure 53. Correcting a Street Name on the Census Address List. Correct the street name on the small format paper maps as shown in Figure 54. Correcting a Street Name on the Small Format Paper Map (Training—Fictitious Information).

⁸ A computerized file containing all delivery point address serviced by the USPS. The USPS updates the DSF continuously as its letter carriers identify addresses for new delivery points or changes in the status of existing addresses.

Figure 53. Correcting a Street Name on the Census Address List

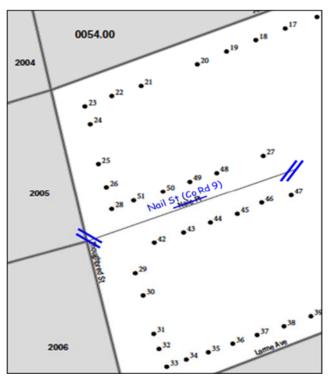

Figure 54. Correcting a Street Name on the Small Format Paper Map (Training—Fictitious Information)

- Using a colored pencil, cross out the incorrect name, Nale St and print the correct name, Nail St, above it.
- Use double hatch marks to show the extent of the name change. In this instance, the entire street needs correction.
- 3. If there is an alternate street name, print the alternate street name in parentheses. For example, Nail St (Co Rd 9).

4.4.1.4 Scenario: Correcting a Street Name that Extends Multiple Blocks

Identify all the Census Address List sheets containing the addresses located along the incorrect street name for each block affected by the correction.

On the Census Address List:

- Print a "C" in the **Action Code** (3) column for the first street name and last street name that needs correction.
- Draw an arrow down from the first entry to the last entry.
- In the **Complete Street Name** (4b) column, cross out the incorrect name and print the correct street name above it for the first street name and last street name that needs correction.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Address List sheets containing the street name that needs correction.

On the Small Format Paper Map:

- 1. Print all the block maps containing the incorrect street name for each block affected by the street name correction.
- 2. On each sheet, use double hatch marks to show the extent of the name change.
- 3. If there is an alternate street name, print the alternate street name in parentheses. Refer to **Figure 54**.

4.4.2 Deleting Addresses (The D Action Code)

Enter a "**D**" in the **Action Code** (3) column to delete an address. Be **very careful** when using this action code. Before deleting an address, ensure that the housing unit or group quarters does not exist, is uninhabitable, is a duplicate address, or needs correction in a field that is not editable. There are situations where a "**C**" action code is not permissible. In these situations, flag the incorrect record for deletion, "**D**" action code, and add the correct version of the address record to the Address List Add Page using the "**A**" action code.

Duplicate addresses are those incorrectly listed twice on the Census Address List for the same residential address. For example, the Census Address List lists 101 Main St and 101 S Main St. Your local address sources indicate that there is a 101 S Main St but no 101 Main St. After confirming that 101 Main St does not exist, you would enter a "D" in the **Action Code** (3) column for 101 Main St.

Do not make corrections to any other columns on the Census Address List for a deleted address.

The following is a list of a few examples using the "**D**" Action Code shown in this section:

- Deleting addresses that no longer exist.
- Deleting an incorrect house number and adding the corrected address to the Address List Add Page.
- Deleting incorrect apartment/unit numbers and adding the corrected addresses to the Address List Add Page.
- Deleting a single housing unit converted to a multiunit structure on the Census Address List and adding multiunit address to the Address List Add Page.
- Deleting addresses for a multiunit converted to a single housing unit and adding the single housing unit to the Address List Add Page.
- Deleting a group quarters address converted to a single housing unit and adding the single housing unit address to the Address List Add Page.
- Deleting a single housing unit address converted to a group quarters and adding the group quarters address to the Address List Add Page.

4.4.2.1 Scenario: Deleting Addresses that no Longer Exist on a Section of a Street on the Address List

This example is for a section of street that no longer exists. The housing units along the street section were demolished.

On the Census Address List:

A section of S Holdener St in census block 1003 no longer exists and the housing units along this section were demolished.

- Print a "**D**" in the **Action Code** (3) column for the first and last addresses that need deletion.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Census Address List sheets containing the addresses that need deletion.

Refer to Figure 55. Deleting Addresses on the Census Address List for a Section of a Deleted Street.

• Identify the street that no longer exists on the small format paper map.

Refer to Figure 56. Deleting a Section of a Street and Addresses that No Longer Exist on the Small Format Paper Map (Training—Fictitious Information).

Figure 55. Deleting Addresses on the Census Address List for a Section of a Deleted Street

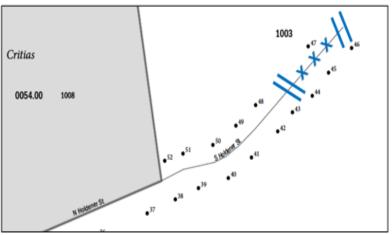

Figure 56. Deleting a Section of a Street and Addresses that No Longer Exist on the Small Format Paper Map (Training—Fictitious Information)

- Use a colored pencil to "X" out the section of the street that no longer exists.
- Use double hatch marks to define the extent of the deleted segment when deleting only part of the street.

4.4.2.2 Scenario: Deleting the Addresses on the Address List for an Entire Street that no Longer Exists

In this example, all of the housing units along a street were demolished the entire street no longer exists.

All of the houses on Nale PI in census block 2001 were demolished, and the entire street no longer exists.

On the Census Address List:

- Print a "D" in the Action Code (3) column for the first and last addresses that no longer exist.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Census Address List sheets containing the addresses that no longer exist.

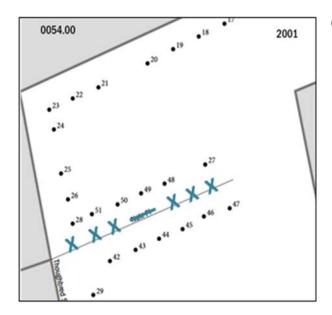

Refer to Figure 57. Deleting Addresses that no Longer Exist on the Census Address List.

Identify the street that no longer exists on the small format paper map.

Refer to Figure 58. Deleting a Street and Addresses that no Longer Exist on the Small Format Paper Map (Training—Fictitious Information).

Figure 57. Deleting Addresses that no Longer Exist on the Census Address List

1. Using a colored pencil, "X" out the entire street and put a line through the name.

Figure 58. Deleting a Street and Addresses that no Longer Exist on the Small Format Paper Map (Training—Fictitious Information)

4.4.2.3 Scenario: Incorrect House Number(s)

To correct an incorrect house number, use the "**D**" action code on the Census Address List then add the correct address to the Address List Add Page.

The Census Address List shows seven incorrect house numbers along Ionia Ave, 102 through 114. According to your local sources, the house numbers are actually 1002 through 1014.

On the Census Address List:

- Print a "D" in the **Action Code** (3) column for the first and last incorrect house number addresses that need deletion.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Census Address List sheets containing the incorrect house numbers that need deletion.

Refer to Figure 59. Deleting an Incorrect House Number on the Census Address List.

Add the correct addresses to the Address List Add Page.

Refer to Figure 60. Adding Corrected House Numbers to the Address List Add Page (Training—Fictitious Information).

Figure 59. Deleting an Incorrect House Number on the Census Address List

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)
- Enter the information in section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c). If there are multiple entries, print the information in the first and last lines needed.
- Draw an arrow down from the first entry to the last entry.
- Enter the correct house number for each address in the **Complete Address Number** (4a) column.
- Enter the street name in the **Complete Street Name** (4b) column in the first and last lines needed.
- Draw an arrow down from the first entry to the last entry.
- Enter the **Mailing ZIP Code** (4g) in the first and last lines needed and draw an arrow down from the first entry to the last entry.
- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

Repeat this procedure for all the Address List Add Page sheets needed.

Refer to Figure 60. Adding Corrected House Numbers to the Address List Add Page (Training—Fictitious Information).

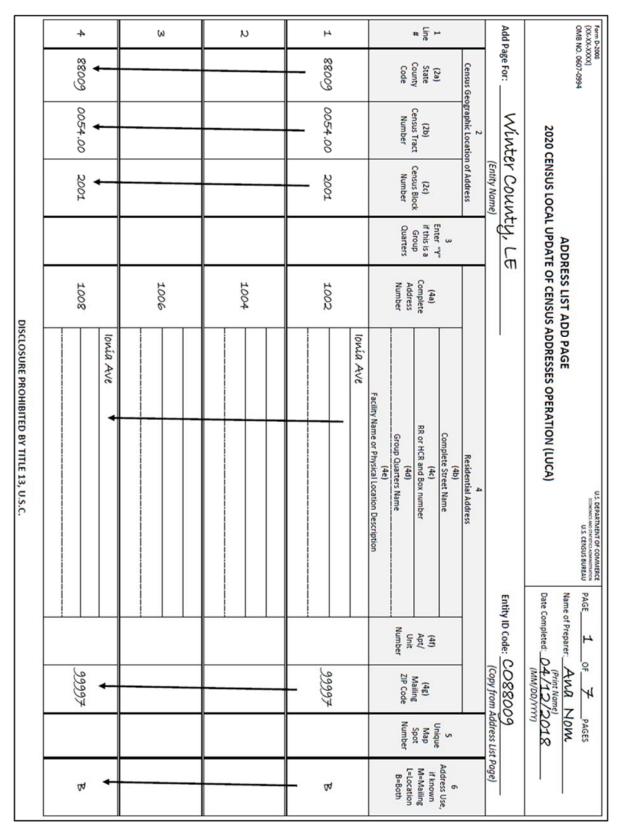

Figure 60. Adding Corrected House Numbers to the Address List Add Page (Training—Fictitious Information)

4.4.2.4 Scenario: Incorrect Apartment or Unit Numbers

To correct incorrect apartment or unit numbers, use the "**D**" action code in the Action Code column to delete the incorrect address for each unit on the Census Address List. Enter the correct address and apartment or unit number for each unit using the Address List Add Page.

The Census Address List incorrectly shows the apartment numbers for the 12 apartment, three-story multiunit structure located at 3567 Achilles Dr. Apartment numbers 1 – 12 need correction to 101 - 104, 201 - 204, and 301 - 304.

On the Address List:

- Print a "D" in the **Action Code** (3) column for the first and last addresses that need correction.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Address List sheets containing the addresses that need correction.

Refer to Figure 61. Deleting Incorrect Apt/Unit Numbers on the Census Address List

Add the correct addresses to the Address List Add Page.

Refer to Figure 62. Adding Corrected Apt/Unit Numbers to the Address List Add Page (Training—Fictitious Information).

Figure 61. Deleting Incorrect Apt/Unit Numbers on the Census Address List

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)
- Enter the information in section 2, Census Geographic Location of Address, including
 the State County Code (2a) number, Census Tract Number (2b), and Census Block
 Number (2c). If there are multiple entries, print the information in the first and last lines
 needed and draw an arrow down from the first entry to the last entry.
- Enter the house number in the **Complete Address Number** (4a) column in the first and last lines needed.
- Draw an arrow down from the first entry to the last entry.
- Enter the street name in the Complete Street Name (4b) column in the first and last lines needed.
- Draw an arrow down from the first entry to the last entry.
- Enter the correct apartment or unit number for each address in the Apt/Unit Number (4f) column.
- Enter the Mailing ZIP Code (4g) in the first and last lines needed.
 - Draw an arrow down from the first entry to the last entry.
- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

Repeat this procedure for all the Address List Add Page sheets needed.

Refer to Figure 62. Adding Corrected Apt/Unit Numbers to the Address List Add Page (Training—Fictitious Information).

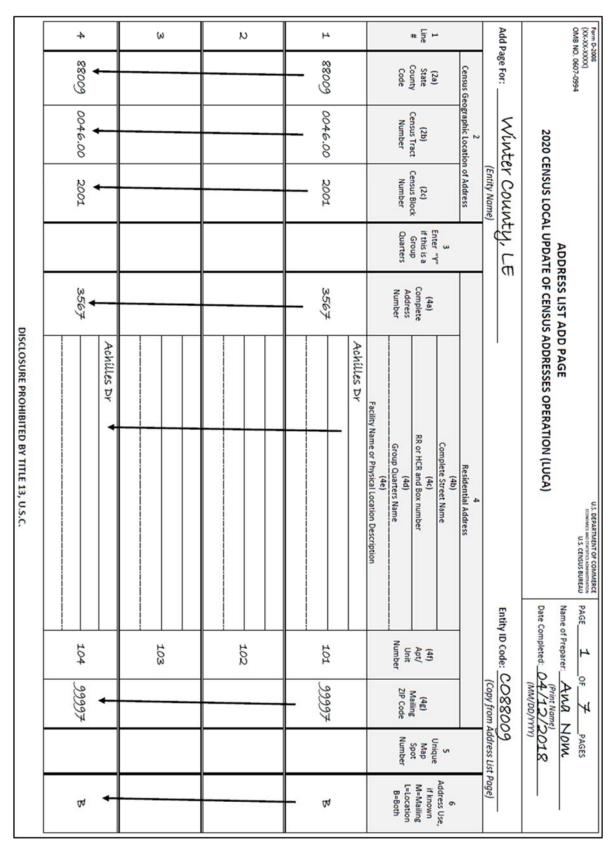

Figure 62. Adding Corrected Apt/Unit Numbers to the Address List Add Page (Training—Fictitious Information)

4.4.2.5 Scenario: Single Housing Unit Converted to a Multiunit Structure

Use the "**D**" action code to delete a single housing unit converted to a multiunit structure. On the Address List Add Page enter the address information including the required unit identifier for each unit.

The single housing unit at 105 Minoan Pkwy recently converted to a multiunit structure containing two apartments, apartments 105 A and 105 B.

On the Census Address List:

• Print a "**D**" in the **Action Code** (3) column for the converted housing unit address, 105 Minoan Pkwy.

Refer to Figure 63. Deleting a Single Housing Unit Address Converted to a Multiunit Structure on the Address List.

Add the new addresses to the Address List Add Page.

Refer to Figure 64. Adding Multiunit Addresses Converted from a Single Housing Unit to the Address List Add Page (Training—Fictitious Information).

Figure 64. Adding Multiunit Addresses Converted from a Single Housing Unit to the Address List Add Page (Training—Fictitious Information)

4.4.2.6 Scenario: Multiunit Structure Converted to a Single Housing Unit

Use the "**D**" action code to delete the individual addresses for a multiunit structure converted to a single housing unit. Add the address for the single housing unit to the Address List Add Page.

The multiunit structure at 112 Friona Ave that contained four apartments, converted to a single housing unit.

On the Census Address List:

- Print a "D" in the Action Code (3) column for the first and last addresses.
- Draw an arrow down from the first entry to the last entry.
- Repeat this procedure for all the Census Address List sheets needed.

Refer to Figure 65. Deleting Addresses for a Multiunit Conversion to a Single Housing Unit on the Census Address List.

Add the address for the single housing unit to the Address List Add Page.

Refer Figure 66. Adding a Single Housing Unit Address to the Address List Add Page (Training—Fictitious Information).

Figure 69. Deleting the Address of a Single Housing Unit Converted to a Group Quarters

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)
- Enter the information in Section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c). If there are multiple entries, print the information in the first and last lines needed and draw an arrow down from the first entry to the last entry.
- Enter "Y" in column 3, Enter "Y" if this is a Group Quarters.

Note: If you enter a "**Y**" in column 3, you must provide a group quarters name (column 4d) and a facility name (column 4e) if the group quarters are associated with a facility (e.g. GQ Name – Dobbs Hall; Facility Name – University of Illinois). The Census Bureau will not process an identified group quarters address record without a group quarters name.

- Enter the house number for the address in the **Complete Address Number** (4a) column.
- Enter the street name in the **Complete Street Name** (4b) column.
- Enter the **Group Quarters Name** (4d). If the group quarters are associated with a facility, provide the facility name
- Enter the **Mailing ZIP Code** (4g).
- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

Refer to Figure 70. Adding an Address for a Group Quarters Converted from a Single Housing Unit Address (Training—Fictitious Information).

Figure 70. Adding an Address for a Group Quarters Converted from a Single Housing Unit Address (Training—Fictitious Information)

4.5 Non-City Style Addresses

The Census Bureau classifies addresses that do not include a house number and/or a street name as non-city style addresses. Non-city style addresses also may include an incomplete house number or street name address. Frequently used non-city style mailing addresses that are included on the Census Address List are:

- Physical location description.
- Rural route and box number.
- Highway contract route and box number.

Non-city style addresses often do not follow any numeric sequence and may not be associated with the name of the street or highway on which they are located. For this reason, the Census Bureau uses different methods to compile the list of addresses for inclusion into the address list, such as a physical location description (BRICK HSE w/ATTACHED GARAGE ON RIGHT), structure points (geographic coordinates), and census geographic codes (state code, county code, census tract number, census block number).

Rural routes and highway contract routes are mailbox delivery routes served by rural carriers to deliver and collect mail from roadside mailboxes. In addition to the route and box numbers, these addresses may also include a complete address number, complete street name, and location description, or any combination used for emergency location services, such as police, fire, and rescue (E-911 addresses). In some instances, the complete address number and box number are identical. In other instances, the rural or highway contract route and box number and the complete address number are different.

Since PO Box numbers and general delivery addresses are mailing addresses only and not associated with a housing unit or housing unit location, the Census Bureau cannot accept them through the LUCA operation.

4.5.1 Adding Non-city Style Addresses to the Address List Add Page

The most common non-city style addresses on the Census Address List are the physical location description and identifying map spot, and rural route and highway contract route and box numbers. The following instructions provide a few examples of how to add non-city style addresses missing on the Census Address List.

4.5.1.1 Scenario: Adding New Physical Location Description Addresses to the Address List Add Page

To add a new physical location description address to the Address List Add Page, in addition to a well-defined location description you must provide:

- Geocodes and a map spot on the paper map, and/or
- The latitude and longitude of the housing unit or group quarters structure.

One area of Winter County uses PO Boxes at the local post office to receive their mail. There is no city style (E-911 address, e.g., house number and street name) location addresses or mailbox delivery addresses. The only way to locate the housing unit structures in this area are with a physical location description.

The area north of Aca St includes three new housing units. The physical location descriptions and their identifying map spots are missing from the Address List and map.

On the Address List Add Page:

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)
- Enter the information in section 2, Census Geographic Location of Address, including
 the State County Code (2a) number, Census Tract Number (2b), and Census Block
 Number (2c). If there are multiple entries, print the information in the first and last lines
 needed and draw an arrow down from the first entry to the last entry.

Note: If you choose, you may enter the structure latitude and longitude coordinate information in addition to or rather than the State County Code, Census Tract Number, and Census Block Number in Section 4, space permitting. Refer to **Figure 72**.

- Enter the Complete Street Name (4b) for each new location description address, if known.
- Identify each new housing unit with a **Physical Location Description** (4e). Provide a well-defined description.
- Enter the **Mailing ZIP Code** (4g) in the first and last lines, if known. Draw an arrow down from the first entry to the last entry.
- Enter a Unique Map Spot Number in column 5 for each new location description address.
- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

See Figure 71. Adding New Physical Location Description Addresses (Training—Fictitious Information) and Figure 72. Adding New Physical Location Description Addresses with Lat/Long Structure Coordinates and Map Spots (Training—Fictitious Information).

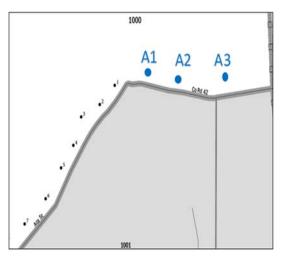

- You must identify each new housing unit on the small format paper map with its corresponding unique map spot number.
- If you know the latitude and longitude of each address, you may enter the coordinates in section 4, or where space permits.

Figure 72. Adding New Physical Location Description Addresses with Lat/Long Structure Coordinates and Map Spots (Training—Fictitious Information)

On the Small Format Paper Map:

- 1. You must provide the approximate location of each address you are adding. You may assign each individual address a unique map number, A1, A2, A3, etc.
- 2. Label each map spot with its associated unique Map Spot Number as you recorded in column 5 on the Address List Add Page beginning with A1, A2, A3, etc.

Figure 73. Identifying New Physical Location Description Addresses with Map Spots on the Small Format Paper Map (Training—Fictitious Information)

4.5.1.2 Scenario: Adding Rural Route and Box Number Addresses to the Address List Add Page

Because rural routes and highway contract routes are mailbox delivery routes served by rural carriers to deliver and collect mail from roadside mailboxes, adding these types of addresses must include additional information to locate the housing unit or group quarters. In addition to the rural route or highway contract number and box number address, you must provide:

 Map spot on the map, and/or housing unit or group quarters structure latitude and longitude.

And one of the following:

- City style address (E-911 address e.g., house number and street name).
- Location description.

All of the mailing addresses in Winter County are rural route and box number. Several addresses along Olympus Hwy in tract 0046.00, block 2000, are missing on the Census Address List. These include RR 3 Box 289, RR 3 Box 290, RR 3 Box 293, and RR 3 Box 294. This scenario includes a street name, map spot numbers, and an example for adding the structure latitude and longitude.

On the Address List Add Page:

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1. (If you need multiple pages, begin the first page with 1 and end with 4 in the Line Number column, on the second page begin with 5 and end with 8. Continue adding the line number sequence on each page.)
- Enter the information in section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block

Number (2c). If there are multiple entries, print the information in the first and last lines needed and draw an arrow down from the first entry to the last entry.

Note: If you choose, you may enter the structure latitude and longitude coordinate information in addition to or rather than State County Code, Census Tract Number, and Census Block Number in section 4, space permitting. Refer to **Figure 75**.

- Enter the RR or HCR and Box Number (4c) for each address.
- Enter the **Mailing ZIP Code** (4g) in the first and last lines, if known.
- Draw an arrow down from the first entry to the last entry.
- Enter a Unique Map Spot Number in column 5 for each address.
- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

You may print the **Address Use** in the first and last lines needed and draw an arrow down if the address use is the same.

- Identify each housing unit on the paper map with its corresponding unique map spot number as shown in Figure 73. Identifying New Physical Location Description Addresses with Map Spots on the Small Format Paper Map (Training—Fictitious Information).
- You must identify each new housing unit on the small format paper map with its corresponding unique map spot number.

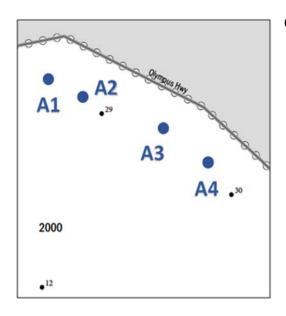

Refer to Figure 74. Adding Rural Route and Box Number Addresses (Training—Fictitious Information) and Figure 76. Identifying Missing Addresses with Map Spots on the Small Format Paper Map (Training—Fictitious Information).

- You must provide the approximate location of each address you are adding. You may add each individual address a unique map spot number, A1, A2, A3, A4, etc.
- Label each map spot with its associated unique Map Spot Number as you recorded in column 5 on the Address List Add Page beginning with A1, A2, A3, etc.

Figure 76. Identifying Missing Addresses with Map Spots on the Small Format Paper Map (Training—Fictitious Information)

4.5.2 Correcting Addresses for Non-city Style Addresses Using the C Action Code

The following corrections to non-city style addresses are the same as city style addresses described in **Section 4.4**.

Print a "C" in the **Action Code**, column 3, on the Address List for the following situations:

- Incorrect state code.
- Incorrect county code.
- Incorrect census tract number.
- Incorrect census block number.
- Incorrect street name (including street directional and street type information).
- Incorrect ZIP Code.
- Incorrect structure latitude.
- Incorrect structure longitude.

4.5.2.1 The D Action Code for Non-city Style Addresses

Enter a "**D**" in the Action Code column to delete an address. Be very careful when using this action code. Before deleting an address, ensure that the housing unit or group quarter does not exist, is uninhabitable, is a duplicate address, or needs corrected in a column that is not editable. **Do not make corrections** to any other columns when entering the "**D**" action code.

Print a "**D**" in the **Action Code**, column 3, on the Address List for the following situations:

- Deleting an address that no longer exists, is uninhabitable, or is a duplicate.
- Deleting a street or addresses along a street that no longer exists.
- Deleting an incorrect non-city style mail delivery address (RR and Box number or HCR and Box number) then adding the correct house number to the Address List Add Page.
- Deleting an incorrect apartment or unit number address then adding the correct address and apartment or unit number to the Address List Add Page.
- Deleting a single housing unit converted to a multiunit structure then adding the address to the Address List Add Page.
- Deleting a multiunit structure converted to a housing unit then adding the address to the Address List Add Page.
- Deleting a single housing unit converted to a group quarters then adding the address to the Address List Add Page.
- Deleting a group quarters converted to a single housing unit then adding the address to the Address List Add Page.

4.5.2.2.1 Scenario: Deleting a Physical Location Description Address on the Address List

To update a physical location description and map spot address you need to delete the address on the Census Address List and add the updated address to the Address List Add Page. In addition to the required state and county codes, and census tract and block codes, provide a **well-defined description** of the housing unit location. If the location is the same, enter the map spot number from the Address List to the Address List Add Page, column 5, **Unique Map Spot Number**.

A section north of Aca St in census tract 0054.00, block 1000 developed over the last several years. The tan trailer identified by map spot number 1 in column 8, no longer exists but was replaced with a brown Tutor style house with beige trim and an attached two-car garage.

• Print a "D" in the **Action Code** (3) column for the location description address that no longer exists.

Refer to Figure 77. Deleting a Location Description Address that no Longer Exists on the Census Address List.

Add the new physical location description address to the Address List Add Page.

Figure 77. Deleting a Location Description Address that no Longer Exists on the Census Address List

On the Address List Add Page:

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate Line Number in column 1.
- Enter the information in Section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c).
- Enter the Complete Street Name (4b) for the corrected physical location description address.
- Identify the corrected housing unit with a Physical Location Description (4e). Provide a
 well-defined description.
- Enter the **Mailing ZIP Code** (4g).
- Enter the **Unique Map Spot Number** (5) as shown on the Census Address List, if the location is the same.
- If the structure latitude and longitude are listed on the Census Address List, you may enter them in section 4.
- Enter the **Address Use** (6), if known:
 - **M**—mailing purposes.
 - L—location purposes, including emergency services, or
 - **B**—both mailing and location purposes.

Refer to Figure 78. Adding a Corrected Physical Location Description Address (Training—Fictitious Information).

Figure 78. Adding a Corrected Physical Location Description Address (Training—Fictitious Information)

4.6 Ungeocoded Addresses—Counties Only

The Census Address List for county participants may contain ungeocoded addresses that are missing census tract and census block codes. Ungeocoded addresses are located at the end of the address list. You may use the "C," "D," "N," and "J" action codes to include geocodes (census tract and census block) for correcting addresses (C), deleting addresses (D), identifying nonresidential addresses (N), and identifying addresses not in your jurisdiction (J). When entering the "D," "N," and "J" action codes make no other entries.

The following scenario describes how to include geocodes for ungeocoded addresses using the "C" action code and identify their location on the map. Although these addresses include state and county codes, the Census Bureau further geocodes these addresses to include the census tract and census block. In some cases, where the Census Bureau does not have new roads or road names in TIGER, these addresses could remain ungeocoded to the correct census tract or block. The Census Address List for state and county participants may contain ungeocoded addresses that could indicate areas of new growth where the Census Bureau may be missing the corresponding road features.

4.6.1 Adding Geocodes for Ungeocoded Addresses

If your county receives ungeocoded addresses, they are listed on the last page(s) of your Census Address List. Please provide the census tract and census block for ungeocoded addresses, if known, to ensure that the Census Bureau can enumerate each housing unit in the correct location.

4.6.1.1 Scenario: Adding Geocodes for Ungeocoded Addresses on the Census Address List

The Census Address List for Winter County contains several new city style addresses that are missing geocodes.

- Print a "C" in the **Action Code** (3) column for the first and last addresses that need geocodes added.
- Draw an arrow down from the first entry to the last entry.
- Print the census tract number in the **Census Tract** (4b) column and the census block number in the **Census Block** (4c) column and draw an arrow down in each column from the first entry to the last entry.
- Optional: If you know the approximate location of each address, assign a unique Map Spot Number in column 8.

Note: If you choose, you may enter the optional structure latitude and longitude coordinate information, if known, in addition to or rather than the TRACT and BLOCK in section 4, space permitting or in column 10, Map Spot Coordinates. Refer to **Figure 81** and **Figure 82**. You must add a minimum of five digits after the decimal point.

Refer to Figure 79. Ungeocoded Addresses on the Census Address List (Counties Only) and Figure 80. Adding Geocodes for Ungeocoded Addresses on the Census Address List (Counties Only).

Figure 82. Geocoding Ungeocoded Addresses on the Census Address List with Lat/Long Structure Coordinates and Map Spots (Counties Only)

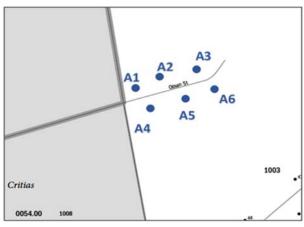

Figure 83. Adding Unique Map Spot Number on the Small Format Paper Map (Training—Fictitious Information)

On the Small Format Paper Map: Take yellow out and the number

- Optional: If you know the approximate location of each address you are geocoding, you may assign each individual address a unique map spot number, A1, A2, A3, etc.
- 2. Label each map spot with its associated unique Map Spot Number as you recorded in column 8 on the Census Address List beginning with A1, A2, A3, etc.

4.6.2 Deleting Ungeocoded Addresses on the Census Address List:

If you find ungeocoded addresses that need deletion:

Print a "D" in the Action Code (3) column to delete an address.

Do not make corrections to any other columns on the Address List for a deleted address.

4.7 Transitory Location Addresses

Transitory Locations (TLs) are sites that contain movable or mobile housing, or portable housing units, including boats, motorized recreational vehicles (RVs), tents, trailers that are pulled by cars or trucks, or any other type of portable housing used as a living quarters.

The Enumeration of Transitory Locations (ETL) is a census operation designed to provide coverage for enumeration for locations where people live in non-traditional housing that is transient or movable in nature. The types of TLs that are included in the ETL include:

- RV parks
- Marinas
- Campgrounds

Although you may find TLs that are not named on your address list, a few examples of named TL addresses include:

- Mermaid's Marina, 23 South Main Street, 99997.
- The Royal Winter Campground, 76 Alexander Blvd, 99997.

Individual addresses at TLs are identified as Transitory Unit (TU) addresses. The MAF may include TU addresses as housing units (HUs). TU addresses identified as HUs pass the address filter as residential housing units and therefore may be included on your Census Address List. Individual TU addresses include:

- Pads
- Sites
- Slips
- Units
- Rooms

Examples of TU addresses include:

- Mermaid's Marina, Slip 63, 23 South Main Street, 99997.
- The Royal Winter Campground, Site 234, 76 Alexander Blvd, 99997.

The Census Bureau will not accept individual TU addresses for pads, sites, slips, units, or rooms for LUCA. TU addresses are identified and documented during the ETL.

You may delete an existing TU address if you are certain that the address is a TU or does not exist. Do not make corrections to any other fields on the Census Address List for a deleted address.

• Enter a "D" in the Action field for the address(es) that need deletion.

No other action is required.

Updating Transitory Location Addresses

There are several updates you may make to TL addresses including:

- Adding missing TL addresses. These include main office addresses only, located at the TI
- Updating incorrect TL addresses by deleting and adding the correct TL address.
- Deleting TL addresses that no longer exist or are uninhabitable.

4.7.1 Scenario: Adding a Transitory Location Address

A new RV park, Winters RV Park, opened at 211 Jeffras Drive.

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1.
- Enter the information in section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c).

Note: If you choose, you may enter the optional structure latitude and longitude coordinate information in addition to or rather than State County Code, Census Tract Number, and Census Block Number in section 4, space permitting.

- Enter the house number in the **Complete Address Number** (4a) column.
- Enter the street name in the Complete Street Name (4b) column.
- Enter the TL name in the **Group Quarters Name** (4d) column. In this instance, do not enter a Y in the Group Quarters column (3).
- Enter TL in the Facility Name or Physical Location Description (4e) column.
- Enter the **Mailing ZIP Code** (4g).
- Enter the **Unique Map Spot Number** (5)—**Optional**, if the approximate location is known. See the note below.

Note: You may add a unique map spot number to the Address List Add Page for the newly constructed office building. If you add a unique map spot number on the Address List Add Page, you must identify the map spot location on the small format paper map. Refer to **Figure 83**.

Refer to Figure 84. Adding a New City Style Address for a TL (Training—Fictitious Information).

						1 88009 00				Code	Line State		2 Census Geographic Location of Address		Add Page For:		(XX-XX-XXXXX) OMB NO. 0607-0994

Figure 84. Adding a New City Style Address for a TL (Training—Fictitious Information)

4.7.2 Scenario: Correcting a Transitory Location Address

To correct an incorrect TL address, you must first delete the incorrect address using the "D" action code, then add the entire corrected address to the Address List Add Page.

During your address review, you notice that the main office address for John's RV Park and Campground listed on the Census Address List is now Sleepy's RV Resort and Campground. This RV resort and campground continues to rent spaces for transients.

On the Census Address List:

• Print a "D" in the Action Code (3) column for the address that needs correction. Refer to Figure 85. Correcting a TL Address on the Address List.

			=	nresidentia	N – Address is Nonresidential	Action Codes D - Delete this address J - Address is not in this Jurisdiction	C – Correction to this address	orrection	טרא כ-כ	AMPLE OF	-FOR EXA	FICTITIOUS INFORMATION —FOR EXAMPLE ONLY	US INFOR	FICTITIO

Figure 85. Correcting a TL Address on the Address List

On the Address List Add Page:

- Enter the appropriate heading information including your entity name, entity ID code, page number, name of the preparer (preparer required to have signed Confidentiality Agreement Form), and the date.
- Enter the appropriate **Line Number** in column 1.
- Enter the information in section 2, Census Geographic Location of Address, including the State County Code (2a) number, Census Tract Number (2b), and Census Block Number (2c).
- Enter the correct house number in the **Complete Address Number** (4a) column.
- Enter the street name in the **Complete Street Name** (4b) column.
- Enter the TL name in the **Group Quarters Name** (4d) column. In this instance, do not enter a Y in the Group Quarters column (3).
- Enter TL in the Facility Name or Physical Location Description (4e) column.
- Enter the **Mailing ZIP Code** (4g).
- Enter the **Unique Map Spot Number** (5)—**Optional**, if the approximate location is known. Refer to **Figure 83**.

Refer to Figure 86. Adding a Corrected TL Address to the Address List Add Page (Training—Fictitious Information).

Figure 86. Adding a Corrected TL Address to the Address List Add Page (Training—Fictitious Information)

4.4.1 Scenario: Deleting a Transitory Location Address

The main office and the campground located at 101 Pampas Place no longer exists.

• Enter a "D" in the **ACTION** field for the address(es) that needs deletion.

No other action is required.

4.8 Nonresidential Addresses (The N Action Code)

Enter an "N" in the **Action Code** (3) column for addresses that are listed on the Census Address List but are used for any purpose other than residential such as:

- Businesses
- Schools
- Churches
- Government offices

You may use the "N" Action Code for city style, non-city style, and ungeocoded addresses that are nonresidential.

Note: Before entering an "**N**" action code, ensure that the structure does not contain a housing unit. Some structures can contain both residential and nonresidential units even though they have a single address such as an apartment over a store or a home with an office. **Do not make corrections** to any other columns for nonresidential addresses.

4.8.1 Scenario: Identifying a Nonresidential Address

The housing unit at 202 Cassiopeia Dr is now a business, a nonresidential address.

Updating the Census Address List:

• Print an "N" in the Action Code (3) column.

Do not make corrections to any other columns.

Refer to **Figure 87. Identifying a Nonresidential Address**. You do not need to make map updates in this instance.

4.9 Addresses Not in Your Jurisdiction (The J Action Code)

Enter a "J" in the **Action Code** (3) column for a residential address that is not in your jurisdiction. You may use the "J" **Action Code** for any city style, non-city style, or ungeocoded address not in your jurisdiction.

4.9.1 Scenario: Identifying an Address Not in Your Jurisdiction

Two housing units at 3526 and 3528 Pueblo Trail are not in your jurisdiction.

Updating the Census Address List:

• Print a "J" in the **Action Code** (3) column. There are no other corrections needed.

Do not make corrections to any other columns.

Refer to **Figure 88. Identifying an Out of Jurisdiction Address**. You do not need to make map updates in this instance.

CHAPTER 5. TIGER PARTNERSHIP SHAPEFILES

As part of the LUCA registration process, the Census Bureau offered LUCA participants the opportunity to choose shapefiles as their product preference map format. The Census Bureau provides county-based Environmental Systems Research Institute⁹ (Esri) shapefiles. The shapefiles, created from the MAF/TIGER system, allow participants to submit map feature updates electronically. Participants that submit shapefiles with feature updates must follow Census Bureau instructions discussed in this chapter.

5.1 Shapefile Background

In order to submit digital feature information, you must have a Geographic Information System (GIS) capable of importing Esri shapefiles, editing the features, and exporting layers back into Esri shapefile format. Subsequent sections within this chapter provide details on these three steps.

The Census Bureau's TIGER Partnership shapefiles contain numerous sets of shapefiles, but do not contain structure point (map spots) shapefiles. To geocode addresses to the census blocks, the Census Bureau provides a 2010 tabulation block shapefile (tabblock2010). All linear features in the Census Bureau's MAF/TIGER system are contained in the "edges" shapefile. Participants use the "edges" shapefile to add and delete features as well as change feature attribution. This chapter provides examples of edits to the edges shapefile.

5.1.2 Shapefile Setup

The TIGER Partnership shapefiles provided by the Census Bureau are in the following un-projected geographic-based coordinate system:

- GCS NAD83
- Angular Unit: Degree (0.017453292519943299)
- Prime Meridian: Greenwich (0.000000000000000000)
- Datum: D North American 1983
- Spheroid: GRS_1980
- Semi-major Axis: 6378137.000000000000000000
- Semi-minor Axis: 6356752.31414035610000000
- Inverse Flattening: 298.257222101000020000

If you selected the paper address list and digital maps, the disc you received contains the non-Title 13 Address Count List and the TIGER Partnership shapefiles in a folder

⁹ All shapefiles provided by the Census Bureau are in Environmental Systems Research Institute (Esri) format. The use of brand names does not represent an endorsement of a company or its products by the U.S. government. Due to the wide use of Esri products by our partners in the GIS community, and ubiquitous use of the shapefile format as a medium for GIS data exchange, the Census Bureau provides data in shapefile format.

named "shape." Upon completion of the initial setup of files by launching the executable file to place the contents of the disc in the specific folder you created, open the file and ensure the file contains the shapefiles for your entity. If your entity spans more than one county or state, save the shapefile for each state and county to the specific folder you created during the launching of the executable file. If data is missing or you encounter an error with the files, please immediately contact the Geographic Partnership Support Desk toll-free at 1-844-344-0169 or send an email to GEO.2020.LUCA@census.gov.

Please feel free to re-project these shapefiles into your local coordinate system projection; however, the Census Bureau requests you convert the submission back to GCS NAD83 prior to submission. Most GIS software packages contain projection wizards, or something similar, allowing the user to transform file coordinate systems and projections. For example, if your office uses ArcGIS to update files, please activate and utilize ArcGIS's "Projection Utility Wizard" extension.

TIGER Partnership shapefiles contain defined projection information in the *.PRJ file. Since ArcGIS accesses the *.PRJ file for projection information, there is no need to define these parameters before changing the file coordinate system.

5.1.3 Editing Features in the Edges Shapefile

After performing the set up guidelines and reviewing the Census Address List as well as the features in the edges shapefile, if you determine that the Census Bureau needs to add or delete features or modify attribution of features, **you must submit your modifications in a separate shapefile**.

Note: Although the primary purpose of LUCA is to update the Census Address List, it may be necessary to update spatial features that correspond to address updates. Due to the limited time to provide LUCA updates, participants should focus on providing road updates that impact addresses such as new roads.

- To add a new or missing feature, digitize or copy the feature into the edges shapefile and update the MTFCC, FULLNAME, and CHG_TYPE attribution fields.
- To move or correct the shape of a feature, first mark the feature for deletion by updating the CHG_TYPE field then add the feature and necessary attribution updates (MTFCC, FULLNAME, and CHG_TYPE) in its proper location. Movement and correction of the shape of a feature is a delete/add scenario.
- To mark a feature, or part of a feature, for deletion, update the CHG_TYPE attribution field for the section of edge to delete, but do not delete the actual feature from the shapefile.

In each of these instances, use the appropriate change type code located in the coding scheme as shown in **Table 5** to identify the type of feature modification in the CHG_TYPE field of the edges shapefile. Specific examples of these updates in **Section 5.1.4 Change Type Codes and Example of Edges Shapefile Corrections**.

Note: The Census Bureau encourages the use of imagery during your review to assist with the proper spatial placement of features.

Table 4 contains a portion of the edges shapefile data dictionary that define important attribute information contained in the edges shapefile. Refer to **Appendix L, Shapefile Layouts**, for a complete layout.

Field **Description** Length Type **TLID** Permanent edge ID 10 Integer **MTFCC** 5 MAF/TIGER Feature Class Code String **FULLNAME** Feature name 120 String CHNG TYPE 4 String Type of linear feature update

Table 4: Edges Shapefile Data Dictionary

- **TLID** is the unique TIGER/Line® ID for the feature segment and is not editable. Leave this field blank if adding a new feature.
- The MAF/TIGER Feature Class Code or MTFCC identifies the most noticeable characteristic of a feature. This field is required when adding new features. Participants can modify this field if the current MTFCC is incorrect. The MTFCC is a 5-character code. The first character is a letter describing the feature class. For example, S1400 identifies streets and roads. Refer to Appendix K for the MAF/TIGER Feature Classification table.
- **FULLNAME** is the feature name. This field is editable and is required when adding new or missing features.
- **CHNG_TYPE** identifies the type of feature modification. This field is required in order to identify all of the edges with proposed changes. See **Table 5** for the change type codes and their descriptions.

5.1.4 Change Type Codes and Example of Edges Shapefile Corrections

This section discusses the three change type codes and provides examples of each. Each update to the edges shapefile must contain one of the three "change type" codes listed in **Table 5**. Record the change type code within the CHNG_TYPE field in the edges shapefile attribute table for each feature in which an update occurs.

Table 5: Change Type Codes for Feature Corrections

Code	Description
AL	Add Line
CA	Change Attribute
DL	Delete Line

ADD LINE

- Code—AL
- Used to flag a new road feature added to the edges shapefile.
- Provide the features name in the FULLNAME field and appropriate feature class code in the MTFCC field.

CHANGE ATTRIBUTE

Change Name

- Code—CA
- Used to flag a feature to denote a name change.
- Provide the feature's new or corrected name in the FULLNAME field.

Change MTFCC

- Code—CA
- Used to flag a feature to denote a change to the feature class code (e.g., a local road, S1400, mistakenly coded as a highway, S1200).

DELETE LINE

- Code—DL
- Used to flag a feature for deletion.
- Do not actually delete the feature from the edges shapefile and make no other changes to the feature or attribution.

5.1.5 Examples

The following are examples of change type codes for feature additions, deletions, and attribute corrections.

5.1.4.1 Scenario: Adding a Feature to the Edges Layer

Crystal Ave is a new street. It is missing from the edges shapefile and needs to be added.

- Start an Editing session on the edges shapefile.
- Open the "Create Features" window in the Editor tool, which you can find under Editing Windows.

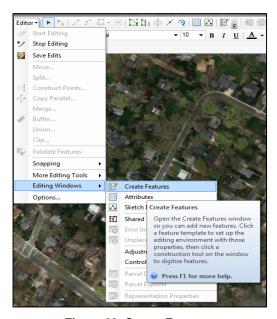

Figure 89. Create Features

Click the "Line" under Construction Tools. You will now be able to draw your road.

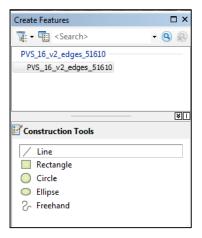

Figure 90. Line Tool

- Digitize the missing street into the edges shapefile. The Census Bureau strongly recommends using imagery (from ArcGIS or local sources) to ensure the accuracy of the road placement and digitizing at an appropriate scale (1:2,400 for instance).
- To digitize (in ArcGIS), left click with your mouse at the starting point (node) and draw until the road is complete. Once finished, double left click the mouse to complete the creation of a new line in the attribute table.

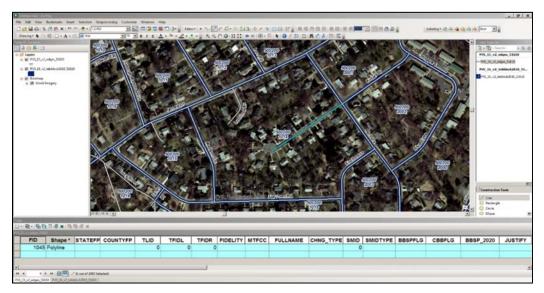

Figure 91. Digitizing a New/Missing Street

In the edges shapefile attribute table:

- For the newly created street, enter the appropriate feature class code in the **MTFCC** field. In this example, S1400 is the correct choice.
- Enter Crystal Ave in the FULLNAME field.
- Enter AL in the CHNG TYPE field.
- Leave all other fields blank.
- Click "Save Edits", then "Stop Editing" in the Editing Toolbar.
- The map and attribute table should resemble the example below:

Figure 92. Map and Attribute Table for Adding a New/Missing Street

Although the street name in the examples may differ, refer to **Section 0**, **The following are a few examples of adding** residential city style addresses to the Address List Add Page:

- Adding new addresses for a new street.
- Adding addresses for a new group quarters multiunit structure.
- Adding addresses for a new multiunit structure.

Scenario: Adding New Addresses for a New Street for instructions on the corresponding address list updates.

5.1.4.2 Scenario: Correcting a Feature Name

The Census Address List and shapefile incorrectly identifies a street as Mound Rd rather than Mountain St, the correct street name.

- Start an editing session on the edges shapefile.
- Select all segments of Mound Rd in the edges shapefile.

In the edges shapefile attribute table:

- Edit the **FULLNAME** field, in this case correcting it from Mound Rd to Mountain St.
- Enter CA in the CHNG TYPE field.
- Save your edits.
- The map and attribute table should resemble the example below:

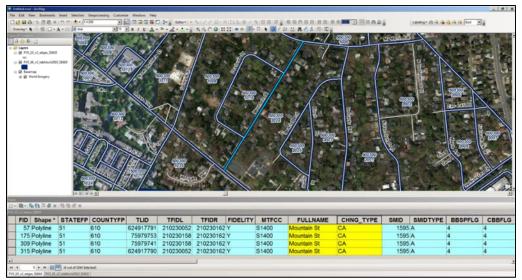

Figure 93. Map and Attribute Table for Correcting a Street Name

Although the street names in the examples may differ, refer to **Section 4.4.1.3**, **Scenario: Correcting an Incorrect Street Name** for instructions on the corresponding address list updates.

5.1.4.3 Scenario: Changing the MTFCC of an Existing Feature

A local road, Oak St, is miscoded with a highway feature class code.

- Start an editing session on the edges shapefile.
- Select all segments of Oak St in the edges shapefile.

In the edges shapefile attribute table:

- Change the code in the MTFCC field from S1200 to S1400.
- Enter CA in the CHNG TYPE field.
- Save your edits.
- The attribute table should resemble the example below:

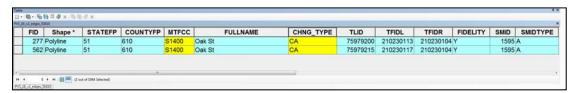

Figure 94. Attribute Table for Correcting MTFCC

5.1.4.4 Scenario: Deleting a feature

The Census Address List and edges shapefile contain Donahue St; however, local sources and knowledge confirm the road and houses were never constructed.

- Start an editing session on the edges shapefile.
- Select the segment of Donahue St in the edges shapefile that no longer exists.

In the edges shapefile attribute table:

- Enter DL in the CHNG_TYPE field for the selected segment of Donahue St that no longer exists.
- Save your edits.

The attribute table should resemble the image below:

Figure 95. Attribute Table for Deleting a Road Feature

Although the street name in the examples may differ, refer to Section 4.4.2.1 Scenario: Deleting Addresses that no Longer Exist on a Section of a Street on the Address List and Section 4.5.2.2.1 Scenario: Deleting a Physical Location Description Address on the Address List for instructions on deleting the addresses from the address list.

5.1.4.5 Scenario: Correcting the Location of a Street Located in an Incorrect Census Block

The Census Address List and edges shapefile incorrectly show Court St located north of Brass Alley. According to local sources, Court St is located south of Brass Alley. Add Court St in the correct location in the edges layer and mark the incorrect Court St segment for deletion.

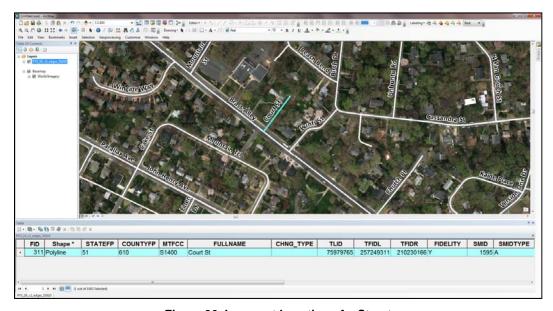

Figure 96. Incorrect Location of a Street

- Start an editing session on the edges shapefile.
- Digitize Court St into the correct location
- Ensure the feature is spatially accurate by utilizing imagery as a reference.

In the edges shapefile attribute table:

For the new, correct feature:

- Enter the appropriate **MTFCC** code for the new street. In this example, S1400 is the correct choice.
- Enter Court St in the FULLNAME field.
- Enter AL in the CHNG TYPE field.
- Leave all other fields blank.

For the incorrect feature:

- Enter DL in the CHNG_TYPE field to flag the incorrect segment(s) of Court St for deletion.
- Save your edits.
- The map and attribute table should resemble the example below. The line for Court St marked for deletion is above Brass Alley and the newly added line for Court St is below Brass Alley. Both features are visible in the map and attribute table. The CHNG_TYPE field in the attribute table for the incorrect feature is marked with a "DL", while the correct feature has an "AL."

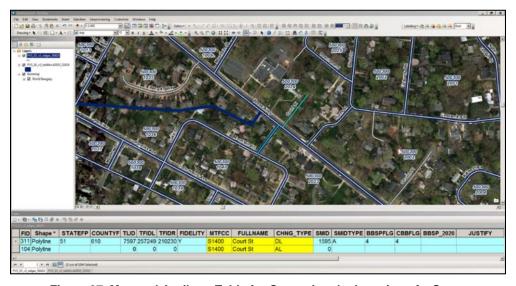

Figure 97. Map and Attribute Table for Correcting the Location of a Street

Although the street name in the examples may differ, refer to **Section 4.4.1.2**, **Scenario: Correcting an Address Located in an Incorrect Census Block** for instructions on the corresponding address list updates.

Below is a summary of the actions in the examples above. **Figure 98** displays the updated attribute table.

- Crystal Ave added.
- Court St added.
- Court St feature in the wrong block marked for deletion.
- Donahue St marked for deletion.
- Mound Rd changed to Mountain St.
- The MTFCC value for Oak St corrected.

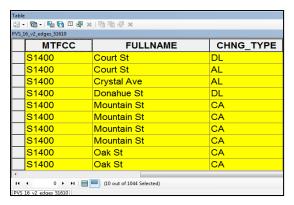

Figure 98. Summary of Actions

5.2 Preparing Your Edited Shapefile for Submission

Upon completion of your LUCA review and updates, follow the instructions in this section for preparing your edited shapefile for submission to the Census Bureau. Additional instructions for compiling your entire submission are included in **Chapter 7**.

- Ensure that your edges shapefile has all the desired additions and edits.
- Select all of the features with a value in the CHNG_TYPE field of the edges shapefile in order to export the selected features and their attributes into a new shapefile.
- Right click on the edges shapefile and select "Data", then "Export Data", as shown in the image below.

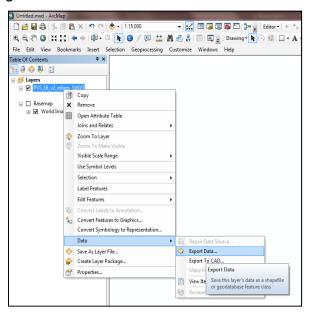

Figure 99. Export Data Selection

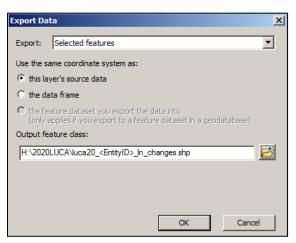

Figure 100. Export Data

- Ensure "Selected Features" remains set in the "Export" section of the "Export
 Data" window.
- Name the new shapefile "luca20_<EntityID>_In_changes.shp" where the EntityID is the entity identification code found on your LUCA materials (starts with two letters followed by a series of numbers).
- Save the shapefile to an easily accessible location on your computer.
- Click "OK" to export the shapefile.

The newly exported LUCA submission shapefile should resemble the map and attribute table below, only containing the edited features.

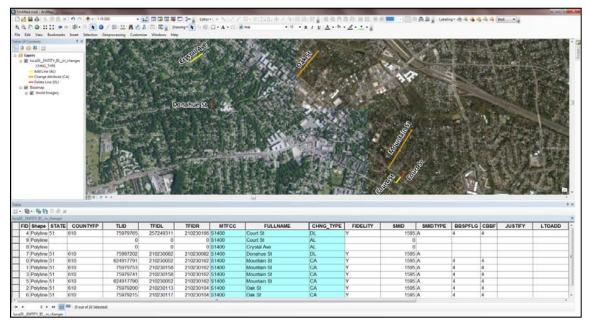

Figure 101. Edited Road Features for Submission

CHAPTER 6. SUBMITTING YOUR UPDATED MATERIALS

6.1 Preparing Your Updated LUCA Materials for Submission

After completing your review and update of the LUCA materials, return only those materials with updates to the National Processing Center at the address shown in **Figure 102**. Please include the *Inventory Form for the Return/Submission Materials (D-2011)* in **Appendix G** with your returned materials. Follow the procedures for shipping Title 13 materials discussed in this chapter and referenced in **Appendix A**, the *Confidentiality and Security Guidelines (D-2004)*.

If any issues arise with your LUCA submission, the Census Bureau will attempt to contact you to resolve or clarify the issues. Unless there is clarification prior to the LUCA deadline, your updates may not be incorporated in the MAF/TIGER database. Your updates are temporary until the verification operation provides confirmation.

If after your review, you determined that the Census Address List is correct and you have no address updates, please complete the form letter D-2079 included with your LUCA materials and return it in the enclosed pre-addressed, postage-paid envelope.

If you select that you do not want to receive LUCA Feedback materials, you must destroy or return all Title 13 address and map materials according to the procedures outlined in the *Confidentiality and Security Guidelines* in **Appendix A**.

6.1.1 Sorting the Paper Census Address List and Address List Add Page

All Census Address List and Address List Add Pages (and copies) are Title 13 materials. Ensure that you store all copies in a secure location.

- Separate the updated pages from the pages without updates.
- Make a copy of the updated pages of the address list and the Address List Add Page to use during the feedback phase of LUCA.
- Bundle **only the updated pages** to prepare for shipping. Organize the pages by:
- The Census Address List.
- The Address List Add Page.

Note: Return only those pages containing updates.

6.1.2 Sorting the Paper Maps for Submission

To return the printed PDF small format paper maps and any large format paper maps with updates to the Census Bureau:

- Separate the map sheets with updates from those without updates.
- Make a copy of all map sheets containing updates to keep for your records to use during the Feedback phase of LUCA scheduled to occur in August/September 2019.
- Return only those map sheets containing updates.

Note: All PDF small format maps with map spots are Title 13, U.S.C. address information. Keep all copies in a secure location. Follow the confidentiality and security guidelines for both paper and digital security.

6.1.3 Preparing the Shapefiles for Submission

- Navigate to the directory where you saved your shapefile changes.
- Zip the luca20_<EntityID>_In_changes.shp and all associated metadata and component file (.cpg,.dbf, .prj, .sbx, .shx, .shp, etc.) and name it: luca20_<EntityID>_In_changes_return.zip. There is no need to password protect this file because it does not contain any Title 13 information.

Note: Participants using Esri software should utilize ArcCatalog to ensure the necessary file components are bundled in the zip file appropriately. Participants using another GIS software must ensure all of the components are included in the zip file for accurate processing once received at the Census Bureau.

- Save a backup copy of your updated digital file(s) for your records and to use during the feedback phase of the program.
- Follow the instructions for mailing your CD/DVD as outlined in the next section, or you
 may submit your shapefile through the Secure Web Incoming Module (SWIM). See
 Section 6.1.6.

6.1.4 Completing the D-2011 Inventory Form for the Return/Submission of LUCA Updated Materials

If you are shipping your updated LUCA materials, please complete the *D-2011 Inventory Form for the Return/Submission of Materials* you received in your LUCA materials package and include it with your returned materials. A copy of the form is included in **Appendix H** and is available for download on the LUCA Web site at http://www.census.gov/geo/partnerships/luca.html.

If you are submitting your updated LUCA shapefiles through SWIM, the fillable *D-2011 Inventory Form for the Return/Submission of Materials* PDF form is included on your digital file disc as **LUCA20_inventory.pdf**. When you open this file:

- Complete the Entity ID and Government Name sections.
- Indicate which updated address list, maps, and submission method you are using (i.e., SWIM or Mail).
- If you are using SWIM, save and zip the form and name it **luca20_<EntityID>_inventory_return.zip**. Include the form with your SWIM submission.

If you are shipping any or all of your materials submission, you may use this form. Print the completed form and enclose it with your materials.

6.1.5 Shipping Your Title 13 LUCA Materials

- Include the *D-2011 Inventory Form for the Return/Submission of Materials*, **Appendix H**, in your returned package.
- Ship the Title 13 materials, double wrapping them using an inner and an outer envelope (or container), one within the other. These should be durable enough to prevent someone from viewing or tampering with the enclosed material.
- Label both sides of the inner envelope (or container) with the notice:
 "DISCLOSURE PROHIBITED BY Title 13, U.S.C."
- Place the inner envelope (or container) into the outer envelope.
- Use the mailing label that was included with the mail-out materials. If you have misplaced the mailing label, please contact the Census Bureau to have a replacement label sent to you.
- If you do not use the mailing label, ship using a service that provides tracking information, such as U.S. Postal Service trackable delivery, FedEx, United Parcel Service (UPS), or similar service. Retain the tracking number as proof of delivery.

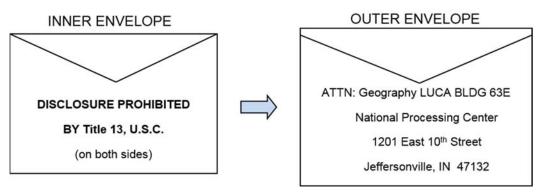

Figure 102. Mailing Envelopes

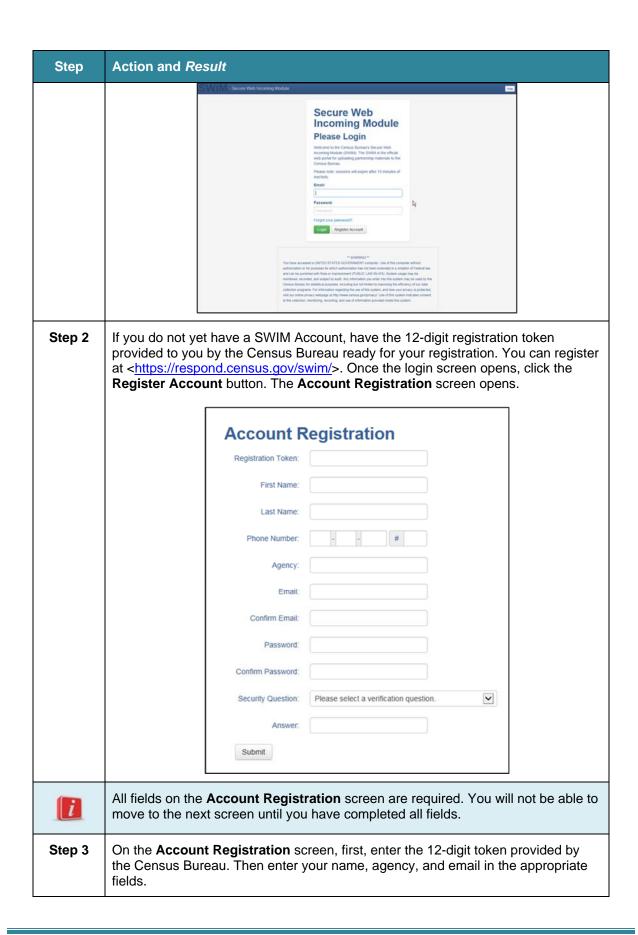

6.1.6 LUCA Secure Web Incoming Module (SWIM) Submission

You may submit your zipped shapefile updates through the SWIM, the official web portal for uploading partnership materials to the Census Bureau. The size limit for a SWIM upload of a zip file is 250 MB.

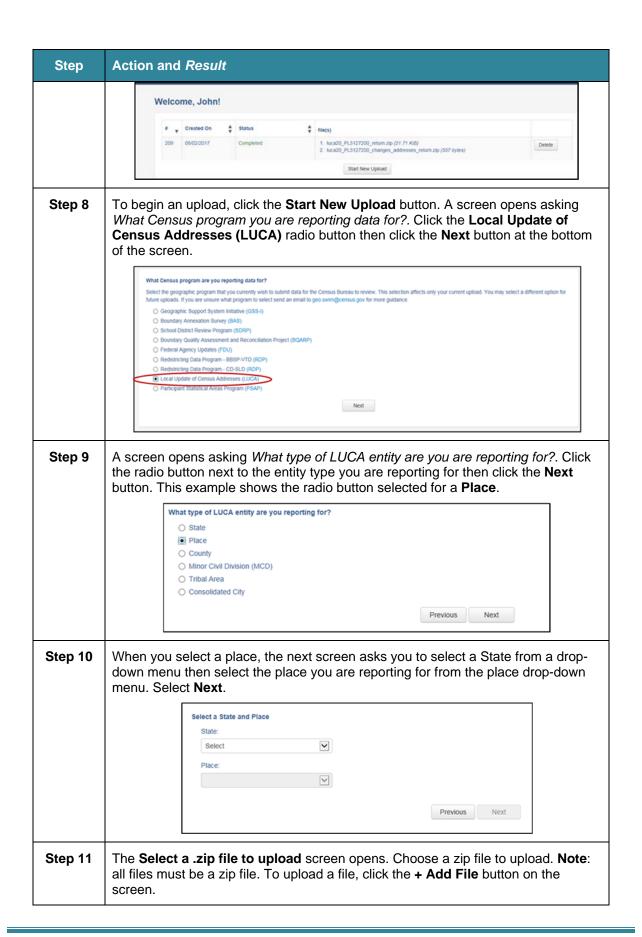

If you do not have a SWIM Account, you need the 12-digit registration token provided to you by the Census Bureau for your registration. Follow the instructions in Steps 2 through 5 in **Table 6** to register for your SWIM account.

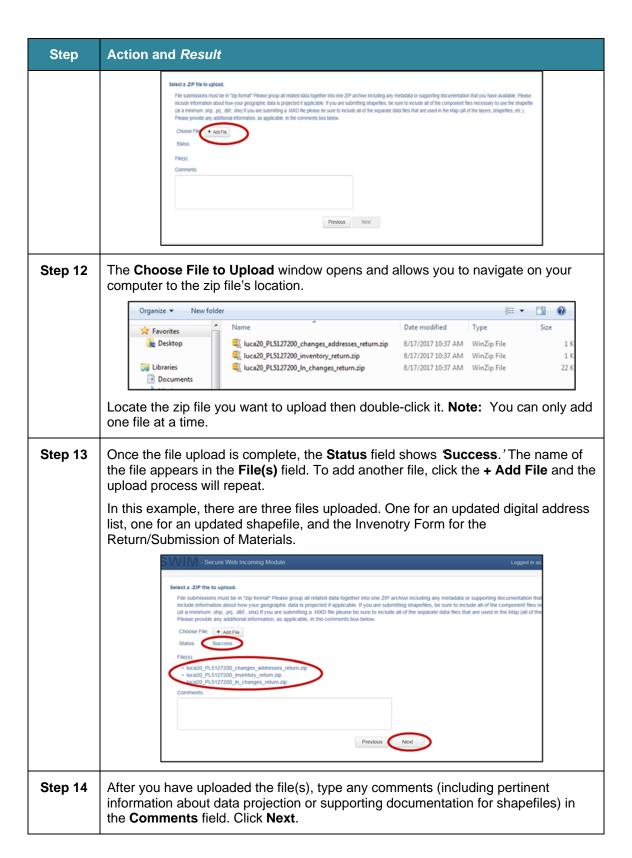

Step	Action and Result
Step 1	If you are a participant in another Census Bureau partnership program and already have a SWIM Account, access https://respond.census.gov/swim/ and enter your email address and password. Then click the Login button. The Welcome screen opens. Go to Step 7.

Table 6: SWIM Submission

Step Action and Result Step 4 Next, create a password. The passwords must meet the five criteria below: 1. It must be 8 characters in length 2. It must have at least one upper case character 3. It must have at least one lower case character 4. It must have at least one number 5. It must have at least one special character (valid special characters are: #,!, \$, *, &, ?, ~). Note: commas in the special characters list are for spacing purposes only; the comma is not a valid character for the password. Step 5 Set up a security question (click the arrow on the right of the Security Question box and select a question in the drop-down list, then enter an answer in the Answer box). When you have finished, click the Submit button. A screen opens to confirm that you have successfully registered. - Secure Web Incoming Module Success! Your account has been successfully registered. Go to Login. Step 6 On the **Confirmation** screen, click 'Login'. You will return to the login screen. **Secure Web Incoming Module** Please Login Step 7 On the Login screen, enter your email and password then click the green Login button. The Welcome screen opens. You will see the list of files you have previously uploaded, the creation date of the file, the name of the file, and its corresponding zip size. If you need to make modifications, click on the file you want to edit then select the Start New Upload button.

Step	Action and Result				
Step 15	The Thank You screen appears and confirms the receipt of your submission.				
	Thank You Your files have uploaded successfully. File(s): 1. luca20_PL5127200_changes_addresses_return.zip 2. luca20_PL5127200_inventory_return.zip 3. luca20_PL5127200_ln_changes_return.zip You may Log Out or return to the upload form, to submit more files.				
Step 16	To submit files for a different entity, click on the ' Upload Form ' link in the phrase "You may Log Out or return to the upload form, to submit more files." This choice returns you to the Welcome screen. To log out, click on Log Out . The Census Bureau will acknowledge the receipt of the uploaded file.				
i	SWIM sessions deactivate after 15 minutes of inactivity. Note: While working in SWIM, you may obtain help by clicking on the Help button on any screen. When you click the button, a screen opens with links to help resources. Secure Web Incoming Module Already Registered? Login Help The Secure Web Incoming Module (SWIM) is a single upload page for submitting all local geographic partnership data to the U.S. Census Bureau's Geography Division. Because of the wide variety of geographic partnership programs, the SWIM requires users to answer some basic questions about their data before submitting. These questions direct the incoming data to the right partnership program.				
	The general flow of questions is as follows: 1. What geographic partnership program you are submitting data for? 2. What level of government or organization is submitting the data? Many of our geographic programs allow partners from various levels of governments to submit data, which is represented as a geographic entity in the menu selection. For example, when submitting data on behalf of a state government, the submitting entity is the state, even if the data submitted pertains to some other entity within the state, such as a county. 3. What is the name of your entity? A user can select an entity's name from pre-populated drop-down boxes. After completing the above questions, the user must select a ZIP file to upload. Using a ZIP archive ensures an efficient upload of all submitted files. There are many compression software options where one can do this with relative ease. For more information about the Census Bureau's Geography Division, please visit our Geography Homepage. For more information about our geographic partnership programs at the Census, please visit our Partnerships Homepage. For a glossary of common Census Geography Terms and Concepts, please visit our Terms and Concepts page.				

CHAPTER 7. NEXT STEPS

Congratulations on the completion of your 2020 Census LUCA review. While this is a major first step, this does not conclude your LUCA participation, unless you do not wish to receive feedback. Once the Census Bureau receives your submission, they will process your files for validation. After validation concludes, the Census Bureau prepares the LUCA feedback materials for shipment to you in the summer of 2019.

If you agree with the Census Bureau's feedback materials, then your LUCA participation ends. The Census Bureau begins outreach to close out LUCA and confirm the destruction or return of all Title 13 materials. The Census Bureau must receive a signed *Destruction or Return of Title 13 Materials Form (D-2012)* which confirms your destruction (preferred method) or return of the Title 13 materials as required by law. This form was included with your original LUCA materials but is also included in this respondent guide as **Appendix I**. The *Confidentiality and Security Guidelines (D-2004)* in **Appendix A** outlines the process for both the destruction (preferred method) and the return of Title 13 materials.

If you disagree with the results of the Census Bureau's validation of your submission, you have 30 days from the receipt of the feedback materials to notify the LUCA Appeals Office, managed by the Office of Management and Budget (OMB), of your disagreement. They will work with you and the Census Bureau to resolve all disagreements. After a determination to accept or reject disputed addresses by the Appeals Office, the Census Bureau includes addresses accepted by the Appeals Office into the 2020 Census enumeration universe. Once the appeals process concludes, you must destroy or return to the Census Bureau your Title 13 materials and submit a signed *Destruction or Return of Title 13 Materials Form (D-2012)* as required by law. Filing an appeal is optional and is not a requirement of the LUCA operation.

APPENDICES

This Page Intentionally Left Blank

APPENDIX A CONFIDENTIALITY AND SECURITY GUIDELINES

A.1 Introduction

Federal law, under Title 13 of the United States Code (U.S.C.), requires the U.S. Census Bureau to maintain the confidentiality of the information it collects. The Census Bureau takes this responsibility very seriously. Respondents place their trust in the Census Bureau each time they complete a survey or an interview. This trust in confidentiality is critical to the success of the Census Bureau's mission to collect and report the most accurate data possible. To uphold the law, the Census Bureau requires that any individuals with access to Title 13 materials adhere to the prescribed confidentiality and security guidelines.

A.2 Title 13, U.S. Code

Chapter 1, Section 9 of Title 13, U.S. Code states: "Neither the Secretary, nor any other officer or employee of the Department of Commerce or bureau or agency thereof, or local government census liaison, may, except as provided in section 8 or 16 or chapter 10 of this title....

- 1) Use the information furnished under the provisions of this title for any purpose other than the statistical purposes for which it is supplied; or
- 2) Make any publication whereby the data furnished by any particular establishment or individual under this title can be identified; or
- 3) Permit anyone other than the sworn officers and employees of the Department or bureau or agency thereof to examine the individual reports."

In 1994, under Public Law 103-430, the U.S. Congress amended Chapter 1 of Title 13 to allow the local government census liaison to review and update the Census Bureau's address information for their jurisdiction. Although the amendment allows official local government access, the amendment reaffirmed the confidential nature of the Census Bureau's address information. Census information protected under Title 13 includes:

- Everything on a completed or partially completed questionnaire or any information obtained in a personal or telephone interview.
- Individual addresses maintained by the Census Bureau, including those shared with governments through the 2020 Census Local Update of Census Addresses Operation (LUCA).
- Digital or paper maps with latitude/longitude coordinate data that identify the location of living quarters (structure points).
- The penalty for the wrongful disclosure or release of information protected by Title 13 is a fine of not more than \$250,000 or imprisonment for not more than 5 years, or both, as set by Section 214 of the Code and the Uniform Sentencing Act of 1984.

Title 13 U.S.C. does not apply to generalized address information, such as address range data available in the Census Bureau's digital products or address counts by census block.

A.3 The Confidentiality Agreement

To participate in LUCA, a government must designate a LUCA liaison. The LUCA liaison, LUCA reviewers, and **anyone** with access to Title 13 materials must sign the *Confidentiality Agreement*. The Census Bureau will not deliver LUCA materials to a participant until we have received the completed and signed **Confidentiality Agreement** and the **Confidentiality and Security Checklist**.

The Census Bureau's Title 13 data, including addresses and latitude/longitude coordinate data (structure points), cannot be used to create, update, nor modify a tribal, state, or local jurisdiction's address list or database.

A signature on the *Confidentiality Agreement* constitutes a legal agreement by each individual to keep confidential Census Bureau Title 13 data and abide by the security guidelines outlined below. While access to Title 13 materials is temporary, the commitment to keep the information confidential is effective for a lifetime.

A.4 Security Guidelines

The LUCA liaison accepts the responsibility for protecting and safeguarding the LUCA materials. The liaison must restrict access to the Census Bureau's information covered under Title 13 to those individuals who have signed the *Confidentiality Agreement*.

A.4.1 Protecting Digital Title 13 Materials

Operating systems, programs, applications, and data are collectively referred to as Information Technology (IT) systems in this document. Any IT systems used for LUCA participation must be accessible only to those who have signed the *Confidentiality Agreement*. Your IT systems should restrict the read, write, and delete functions to all Title 13 materials.

Digital Guidelines

- Construct electronic security profiles to allow only the LUCA liaison and the LUCA reviewers to access Title 13 materials. Test your security to ensure that access is restricted.
- Use file encryption and passwords to protect all digital Title 13 materials at all times.
 Encrypt files using the Advanced Encryption Standard (AES) with key length of 256 bits.
- Do not leave computers with Title 13 materials unattended. Log-off computers, lock terminals, and lock the room when not in use.
- Label all digital media and every printed page of any paper materials produced from Title
 13 digital media with the following:
 - "This document contains information, the release of which is prohibited by Title 13, U.S.C., and is for U.S. Census Bureau official use only. Wrongful disclosure or release of information can be punished by fine or imprisonment (Public Law 99-474)."
- Do not send backup digital media off-site. Store in a secured area. Do not mix, store, or back-up LUCA data with other data.

- Clear dedicated digital media containing Title 13 materials before reuse. Overwrite Title
 13 digital data a minimum three times using a commercial disk utility program.
- Do not disclose precise or even anecdotal information about Census Bureau addresses or locations to anyone who has not signed the *Confidentiality Agreement*.

Password Guidelines

The IT systems must use logon routines that require a user-ID and password that conform to the following guidelines:

- Unique user-ID and password required for the LUCA liaison, the LUCA reviewers, and anyone who has signed the Confidentiality Agreement.
- Must consist of at least twelve, nonblank characters consisting of at least one alphabet letter and either one number or one special character (for example: \$,*, or &).
- Reject passwords that are the same as the user-ID or that have been used within the last six months.
- Disable passwords after three failed attempts.
- Mask passwords.
- Require password changes every 90 days or immediately, if compromised.
- Require user to change an assigned password to a unique password the first time the user accesses a new account.

A.4.2 Protecting Paper Title 13 Materials

- Do not leave Title 13 materials unattended. Secure all Title 13 materials in a locked room.
 If possible, store Title 13 materials in locked desks or cabinets.
- Copy only the Title 13 materials necessary to complete the LUCA review. Do not leave
 the copy machine unattended while making copies. All copied materials containing Title
 13 information must bear the statement:

"This document contains information, the release of which is prohibited by Title 13, U.S.C., and is for U.S. Census Bureau official use only. Wrongful disclosure or release of information can be punished by fine or imprisonment (Public Law 99-474)."

• Do not disclose precise or even anecdotal information about Census Bureau addresses or locations to anyone who has not signed the *Confidentiality Agreement*.

A.4.3 Reporting an Incident

If you discover that any Title 13 materials have been viewed by unauthorized persons or are missing from your inventory, you must:

- Contact the Census Bureau through the Census Incident Response Team (CIRT) at (301) 763-3333 within 24 hours. You must provide the following information:
- Jurisdiction Name.
- Date and time of the incident.
- Name of the contact person.
- Phone number of contact person.

- Site address of incident.
- Immediately secure all remaining materials. Prohibit any further access, by anyone, including the LUCA liaison and anyone who signed the Confidentiality Agreement.
 Census Bureau staff will contact your office within 48 hours with information on how to proceed.

A.4.4 On-site Visits

The Census Bureau may make an on-site visit to review a participant's security procedures. The Census Bureau will strive not to disrupt office operations. A visit may include a review of:

- Storage and handling of Title 13 materials.
- Employee access to Title 13 materials.
- Physical safeguard of stored Title 13 materials.
- IT Systems, including use of passwords.
- Employee awareness of their responsibilities to Title 13 materials.

A.4.5 Destruction of Census Bureau Confidential Materials

After the entire LUCA operation has concluded, **all** Title 13 materials must be **destroyed** (preferred method) or **returned** according to the Census Bureau's specific guidelines.

The LUCA liaison is required to verify the destruction or return of any Title 13 materials, both paper and digital, including all paper copies, backup files, etc., by signing and returning the *Destruction or Return of Title 13, U.S.C. Materials form.* In addition, anyone who signed the *Confidentiality Agreement* is required to sign this form once their participation in LUCA has ended. Should any liaison, reviewer, or anyone who signed the *Confidentiality Agreement* leave before the completion of LUCA, they must sign and date this form. If any liaison, reviewer, or anyone who signed the *Confidentiality Agreement* is unable to sign and date the form, the current liaison must sign and date on their behalf. Only individuals who signed the Confidentiality Agreement are permitted to destroy Title 13 materials:

- Never deposit Title 13 materials in a trash or recycle container, or dispose of information in a landfill before destruction procedures are completed.
- Destruction must prevent recognition or reconstruction of paper or digital Title 13 materials. Use one of the following methods:
 - Shredding or pulping.
 - Chemical decomposition.
 - Pulverizing (such as, hammer mills, choppers, etc.).
 - Burning (facility approved by the Environmental Protection Agency).
 - Clear dedicated digital media containing Title 13 materials before reuse. Overwrite
 Title 13 digital data minimally three times using a commercial disk utility program.

- Clearing or sanitizing all print servers and multi-function printing or scanning devices with stored images or print files containing Title 13 data.
- Destroying CDs and DVDs using a shredder or other method suitable for rendering them un-usable.

Note: Hand tearing is an **unacceptable** method of disposal before destruction.

See the National Institute of Standards and Technology, Special Publication 800-88, Revision 1, <u>Guidelines for Media Sanitization</u> for further information on acceptable methods for digital media and office equipment sanitization. http://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.800-88r1.pdf>

A.4.6 Returning Census Bureau Title 13 Materials

After the entire LUCA operation has concluded, **all** Title 13 materials must be **destroyed** (preferred method) or **returned** according to the Census Bureau's specific guidelines. If you choose to return the Title 13 materials rather than destroying them, follow these guidelines:

- Ship the Title 13 materials, double-wrapping them by using an inner and an outer envelope (or container), one within the other. These should be durable enough to prevent someone from viewing or tampering with the enclosed material.
- Label both sides of the inner envelope (or container) with the notice:
 - "DISCLOSURE PROHIBITED BY Title 13, U.S.C."
- Place the inner envelope (or container) into the outer envelope.
- Use the mailing label that was included in the initial mail-out of materials. If you have misplaced the mailing label, please contact the Census Bureau to have a replacement label sent to you.
- Include with the returned materials, a signed *D-2012*, *Destruction or Return of Title 13*, *U.S.C. Materials Form*. Ensure that all reviewers and anyone with access to the Title 13 LUCA materials signs this form.
- If you do not use the mailing label, ship using a service that provides tracking information, such as U.S. Postal Service trackable delivery, FedEx, United Parcel Service (UPS), or similar service.

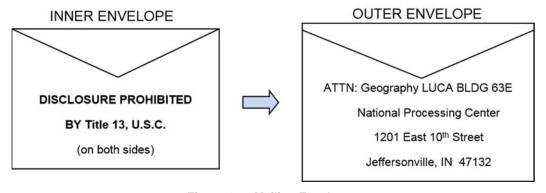

Figure 103. Mailing Envelopes

APPENDIX B THE LARGE FOMAT PAPER MAP LEGEND

The map legend describes the various symbols and colors used on the paper maps. The legend is divided into three columns:

Figure 104. Map Legend

- The Symbol Description column includes the type of features, boundaries, and geography shown on the map.
- The Symbol column shows the symbols. representing the feature in the symbol description.
- The Name Style column shows an example of the name of a particular feature such as a road, waterway, or geographic area displayed on the map.

Boundaries

The first group of symbols in the legend refers to different boundary types or geographic area shown on the map. Each type of boundary has a distinct color or symbol.

Transportation

The second group of symbols represents various types of transportation features. Thicker lines identify major roadways such as interstates and U.S. highways while thinner lines represent secondary roads and city streets. Also identified are cul-de-sacs and circles. Jeep trails, walkways, stairways, and ferries, represented by distinctive dashed lines, are included in this section.

Other Features

The third group of symbols represents other feature types such as pipelines and streams and nonvisible boundaries. Streams and shorelines are blue and geographic offset and corridors are speckled red.

Landmarks

The last group of symbols represents various landmarks on the map such as rivers and lakes, glaciers, airports, cemeteries, golf courses, jails, military installations, parks, and mountain peaks. The area outside of the subject area is speckled gray.

Footnotes and Notes

The footnote and notes section of the legend provide additional information and details on geographic relationships, boundaries, and symbols.

APPENDIX C THE PDF SMALL FORMAT MAP LEGEND

SYMBOL DESCRIPTION	SYMBOL	NAME STYLE

APPENDIX M GLOSSARY

Address breaks—Address breaks identify the city style addresses on each side of a boundary or at an intersection of street with another street or another feature.

Address Count List—Identifies the number of housing unit addresses and group quarters addresses on the Census Address List for each census block within a jurisdiction.

Address range—The lowest and highest address numbers used to identify structures along each side of a street segment that has city style addresses. Usually one side of the street has even address numbers and the other side has odd address numbers.

Block to Map Sheet Relationship List—A list identifying census block numbers and the Census Bureau large format map(s) on which each block is located.

Boundary—A line, on a map, either invisible or coincident with a visible feature that identifies the extent of a geographic entity, such as a census tract, city, county, or state. A boundary marks the limits of an area.

Census Address List—The Census Address List, extracted from the Master Address File (MAF) for review and update during 2020 LUCA, contains all the residential addresses (city style and non-city style) known to the Census Bureau for your government. It also contains census geographic codes (state, county, census tract, census block) that indicate the location of each address. Many addresses also contain latitude and longitude coordinates depicting the address location.

Census block—A census block is an area bounded by visible and/or invisible features shown on Census Bureau maps. A census block is the smallest geographic area created by the Census Bureau for which it collects and tabulates decennial census data. Census blocks are numbered within census tracts and are uniquely numbered within census tracts.

Census block number—Census block numbers are a 4-digit number plus up to two alpha character suffix, if applicable, e.g. 3001A or 2002AA. Suffixes, boundary changes as well as added features within the given block that split the original block.

Census Bureau—An agency within the U.S. Department of Commerce. The U.S. Census Bureau is the country's preeminent statistical collection and dissemination agency. It publishes a wide variety of statistical data about people and the economy of the nation. The Census Bureau conducts approximately 200 annual surveys and conducts the decennial census of the United States population.

Census Bureau map—Any map produced by the Census Bureau. A Census Bureau map displays geographic entities used in a Census Bureau sponsored census or survey for which the Census Bureau tabulates data.

Census tract—A small, relatively permanent statistical subdivision of a county or statistically equivalent entity delineated for data presentation. Designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment, census tracts generally contain between 1,000 and 8,000 people, with an optimum size of 4,000 people. Delineated with the intention of being stable over many decades, census tract boundaries generally follow relatively permanent visible features. However, they may follow governmental unit boundaries and other invisible features in some instances; the boundary of a state or county (or statistically equivalent entity) is always a census tract boundary.

Census tract number—Unique numbers to identify census tracts within a county or statistically equivalent entity. Census tract numbers are a 4-digit number followed by a decimal point and a 2-digit number for suffixed tracts, e.g., 1234.01. For census tracts without a suffix, the number will contain a period with zero fill, e.g., 4567.00.

City style address—The Census Bureau's definition of a city style address is an address consisting of a house number and street or road name. For example, 201 Main Street is a city style address. The address may or may not be used for the delivery of mail and may include apartment numbers/designations or similar identifiers.

Confidentiality—The guarantee made by law (Title 13, United States Code) to individuals who provide information about themselves or their business to the Census Bureau. This item refers to the Census Bureau's promise of nondisclosure of that information to others.

County—The primary legal division of most states. Most are governmental units with powers defined by state law.

Edges shapefile—All linear features in the MAF/TIGER database are contained in the edges shapefile.

Enumeration at Transitory Locations (ETL) operation—Provides coverage for locations where people live in non-traditional housing that is transient or movable in nature. Most census questionnaires are mailed, or hand-delivered by census personnel, to known addresses in the Census Master Address File (MAF). However, due to changes in society, some people no longer maintain a traditional residence (house, apartment, condo, etc.), and have decided to live in boats, motorized recreational vehicles (RVs), trailers that are pulled by car or trucks, or any other type of housing that is movable or mobile, including tents. For operational purposes, we refer to these as 'portable housing units.

The type of Transitory Locations (TLs) that are included in the ETL are:

- 1. Recreational (RV) parks
- 2. Marinas
- 3. Carnivals

Feature—Any part of the landscape, whether natural (such as, a stream or ridge) or man-made (such as a road or power line). In a geographic context, features are any part of the landscape portrayed on a map, including nonvisible boundaries of legal entities, such as city limits or county lines.

Federal Information Processing Series (FIPS)—These are codes formerly known as Federal Information Processing Standards codes, until the National Institute of Standards and Technology (NIST) announced its decision in 2005 to remove geographic entity codes from its oversight. The Census Bureau continues to maintain and issue codes for geographic entities covered under FIPS oversight, albeit with a revised meaning for the FIPS acronym. Geographic entities covered under FIPS include states, counties, congressional districts, core based statistical areas, places, county subdivisions, sub-minor civil divisions, consolidated cities, and all types of American Indian, Alaska Native, and Native Hawaiian areas. FIPS codes are assigned alphabetically according to the name of the geographic entity and may change to maintain alphabetic sort when new entities are created or names change. FIPS codes for specific geographic entity types are usually unique within the next highest level of geographic entity with which a nesting relationship exists. For example, FIPS state, congressional district, and core based statistical area codes are unique within nation; FIPS county, place, county subdivision, and sub-minor civil division codes are unique within state. The codes for American Indian, Alaska Native, and Native Hawaiian areas also are unique within state; those areas in multiple states will have different codes for each state.

Geocodes—Codes that place an individual address in its correct geographic location, which, in census terms, includes the correct state, county, census tract, and census block codes. Because the Census Bureau counts people where they live, geocodes provide information to Census enumerators for locating an address. Accurate geocoding also ensures the Census Bureau counts housing units, and the people associated with them, in the correct census geography.

Geographic Information System (GIS)—A computer system for the storage, retrieval, and maintenance of information about the points, lines, and areas that represent the streets and roads, rivers, railroads, geographic entities, and other features on the surface of the Earth-information that previously was available only on paper maps.

Geographic Update Partnership Software (GUPS)—A self-contained GIS update and processing package provided by the Census Bureau for participation in a variety of Census geography programs, including 2020 LUCA. Pre-packaged to include all of the components for 2020 LUCA, the GUPS contains the Census Address List, address count list, and TIGER Partnership shapefiles. GUPS allows the participant to add external geospatial data (shapefiles, geodatabases, and imagery) for comparison and update purposes. Delivery of all data (software, address list, address count list and shapefiles) is on DVD.

Governmental unit (GU)—A geographic entity established by legal action for the purpose of implementing specified governmental functions. Most governmental units provide a number of general government services and raise revenues (usually through taxing authority).

Group quarters (GQ)—A place where people live or stay normally owned or managed by an entity or organization providing housing and/or services for the residents. These services may include custodial or medical care as well as other types of assistance, and residency is commonly restricted to those receiving these services. People that live in a group quarters are usually not related. Group quarters include such places as college residence halls, residential treatment centers, skilled nursing facilities, group homes, military barracks, correctional facilities, workers' dormitories, and facilities for people experiencing homelessness.

Highest elected official (HEO)—The person most responsible for the governmental activities of a local government. This person receives the LUCA Program invitation letter, and must designate a LUCA liaison, to participate in the 2020 LUCA Operation.

Housing unit (HU)—A single-family house, townhouse, mobile home, trailer, apartment, group of rooms, or a single room occupied as a separate living quarters or, if vacant, intended for occupancy as a separate living quarters. A separate living quarters is one in which one or more occupants (or intended occupants, if vacant) live separate from any other individual(s) in the building and have direct access to the living quarters without going through another living quarters, such as from outside the building or through a common hall.

Living quarters—Any site where people live, stay, or could live. Living quarters are classified as housing units or group quarters. They are usually found in structures intended for residential use, but also may be found in structures intended for nonresidential use as well as tents, vans, shelters for people without housing, dormitories, barracks, and so forth, or they might not be associated with a structure at all.

LUCA liaison—A person appointed by the highest elected official (HEO) of each jurisdiction to review the Census Address List and maps against local records to identify differences. This person is also known as the program primary liaison or designated liaison.

MAF/TIGER Database—The Census Bureau's nationwide geographic database, which integrates the Master Address File (MAF) and Topologically Integrated Geographic Encoding and Referencing (TIGER) files.

Master Address File (MAF)—The Census Bureau's nationwide database of all addresses and physical/location descriptions known to the Census Bureau used to support many of the Census Bureau's operations. Besides containing mailing addresses and ZIP Codes, a MAF record also contains geographic information about the location of addresses. The Census Bureau's Geography Division regularly updates the MAF/TIGER Database from various sources, including the United States Postal Service (USPS) Delivery Sequence File (DSF) and other sources of updates such as current surveys and locally provided sources.

Metadata—Describes the data content, coordinate system/projection, author, source, and other characteristics of GIS files.

Minor civil division (MCD)—A type of governmental unit that is the primary governmental or administrative subdivision of a county in many states. MCDs are

identified by a variety of terms, such as town (in 8 states), township, and/or district, and include both functioning and nonfunctioning governmental entities.

Non-city style address—An address that does not have a house number and/or street name or may not include a complete house number and street name address. This includes rural route and box number address and highway contract route addresses, etc., which may include a box number, post office boxes and drawers, and general delivery.

Occupied housing unit—A housing unit is classified as occupied if it is the usual place of residence of the individual or group of persons living in it at the time of enumeration or if the occupants are only temporarily absent; for example, away on vacation. Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by permanent residents, that is, individuals for whom the facility is their usual place of residence.

Place—A concentration of population either legally bound as an incorporated place or identified by the Census Bureau as a census designated place.

Regional Office—One of six permanent Census Bureau offices distributed across the nation. Regional offices are responsible for the Census Bureau's field operations.

Shapefile—Digital representations of geographic features, such as roads and boundaries used to create maps. A shapefile stores non-topological geometry and attribute information for the spatial features in a dataset. The Census Bureau provides county-based shapefiles in Environmental Systems Research Institute (Esri) shapefile format.

Street segment—The portion of a street or road between two features that intersect that street or road, such as other streets or roads, railroad tracks, streams, and governmental unit boundaries. The Census Bureau records the known address ranges for every street segment with city style addresses.

Structure Point (map spot)—A dot on a Census Bureau map, used to show the location of one or more living quarters. A maximum of 4-digits plus one alpha character is assigned within a census block to each structure point. Structure points are stored in the TIGER database and are protected by Title 13 U.S.C.

Topologically Integrated Geographic Encoding and Referencing (TIGER)—The Census Bureau's digital map, including the geographic coordinates and names of streets, water features, other linear features, and boundaries for all jurisdictions and statistical areas that provide the geospatial framework for collecting and tabulating census data. TIGER also contains the structure coordinates of address records in the Master Address File (MAF) and address ranges along street features used for geocoding MAF records to census geography.

Transitory locations (TL)—Movable or mobile housing, or portable housing units, including boats, motorized recreational vehicles (RVs), tents, trailers that are pulled by cars or trucks, or any other type of portable housing.

Vacant housing unit—A habitable structure containing living quarters that is not occupied. New housing units not yet occupied are classified as vacant housing units if

construction has reached a point where exterior windows and doors are installed and final usable floors and a roof are in place. Vacant units are excluded if they are open to the elements, or if there is positive evidence, such as a sign on the house, that the housing unit is to be demolished or has been condemned.
