Submitter Info

Comment:	Even though there is some data to show that state data would
-----------------	--

improve the census count, the benefit would be slight compared to the detriment that would result. State data remains inconsistent throughout the different agencies used, and would provide significant administrative costs sorting through the different reports on a single person. Moreover, the main reason they are doing this is to circumvent the citizen question. Citizenship is a non-issue and should not even be considered. *🌐
