Notice: CDC Fellowship Programs Assessments - 0920-1163 - Extension 2019-20705

I support the Center for Disease Control and Prevention (CDC) Fellowship Programs Assessment because it runs on behalf of public health. The main purpose of the data collection by the CDC Fellowship Programs Assessment is to improve the efficiency of those fellowship programs. That will develop more qualified public health professionals and workforces. The burden of the collection of information on the individual respondent is 30 minutes per year that is reasonable. There are no more costs for respondents other than their time.
