---

I would suggest the following format updates to the SF-299:

1. Addition of a box for Email Address.
2. Relocate phone number blank to an area that is more visible. It is often not filled out due to the current location.
3. Addition of a selection for " Existing improvements, no changes on the ground. Skip to signature." - Something to that affect. This should be AFTER the proposal description however as we still need those details, updated maps, etc... Often times we have people buying rec residence cabins or property with a driveway permit and most of the application does not apply. They have no idea how to fill it out and we spend a lot of time going through it with them.
4. Make signature area more visible, it is often missed.

Respectfully,
