Submitter Info

Comment:

I would suggest there should be some questions related to elections security included in the EAVS. Suggested questions should include areas surrounding: - User access security to voter information databases - Backup information on voter registration databases - Status of cyber systems as it relates to critical classification - Timeliness of voter registration database updates and what areas were updated - General cybersecurity practices - Cyber-related incident response plan readiness - IT resources at a local level dedicated to elections Questions should be tailored to address questions at both the state and local levels. *🌐
