RE: Agency Information Collection Activities for H-2B Foreign Labor Certification Program, 87 Fed. Reg. 31259-31260 (May 23, 2022)

Dear Office of Management and Budget:

These comments are submitted by Justice at Work (Pennsylvania) formerly Friends of Farmworkers, Inc. and our long-time client Comité de Apoyo a los Trabajadores Agrícolas (CATA).

As reflected in the record of public comments under the Paperwork Reduction Act [1] on the initial Federal Register posting at 87 Fed. Reg. 1787 (Jan. 12, 2022), Justice at Work and CATA as well as Texas Rio Grande Legal Aid on March 14, 2022 submitted comments to the Department of Labor on deficiencies in the Department of Labor's implementation of Congressional Consolidated Appropriation Act language on acceptance of employer provided wage surveys in relationship to Form ETA 9165 and its instructions.

Although those comments have *not* resulted in any substantive changes to the forms or instructions, DOL appears to have withdrawn the request for OMB approval of Form ETA 9165 and will allow a further comment period on that form. *See:* 87 Fed. Reg. 35999-36001 (June 14, 2022).

Pending Rulemaking for the H-2B Program

The Department of Labor has indicated an intent to undertake rulemaking for the H-2B program.[2]

There are serious deficiencies with the existing regulations, forms and procedures for the H-2B program and at a minimum OMB should limit the time period for approval of the pending Paperwork Reduction Act form proposals so as to allow prompt implementation of revised and supplemental forms as part of the regulatory proposals from DOL and DHS.

Supplemental H-2B Visas

In addition, in *each* of the last several years, DOL and DHS have jointly issued regulations *without an opportunity for public comment*, pursuant to Congressional Appropriation Act authorizations to the Secretary of Homeland Security in consultation to increase the number of H-2B visas above the statutory cap of 66,000 H-2B visas per year. *See*: 87 Fed. Reg. 30334 (May 18, 2022) and prior supplemental visa regulations.[3]

Substantial Amendment of Date of Need

Despite the fact the DHS requirements for the approval of I-129 petitions for H-2B workers normally do not permit a change in the date of need as approved on the DOL H-2B labor certification, the regulations repeatedly issued *without public comment* pursuant to the Congressional Appropriation Acts authorization for supplemental H-2B visas, the joint regulations issued by DHS and DOL for those supplemental visas have *failed* to require employers to *amend* their applications for labor certification with DOL.

This has significant implications for the H-2B forms and instructions under review with OMB. Those forms and their instructions should be amended to require that employers take several steps when authorized to change the date of need:

1. The rulemaking for supplemental H-2B visas should have included a clarification and requirement that 20 C.F.R. § 655.35 provisions for amendments of job orders were applicable to previously certified H-2B labor certifications where DHS permits a change in the date of need of more than 14 days,
2. The H-2B forms and instructions should required the submission of an amended job order specifying the new date of need.
3. The DOL OFLC job registry at https://seasonaljobs.dol.gov/ should post the amended job order and accurately state the active period of domestic worker recruitment for the amended job order.

OMB should withhold approval of the pending H-2B forms and instructions in order to allow DHS and DOL to consider modifications to H-2B forms appropriately required by the issuance of supplemental H-2B visas as part of the pending comment period through July 18, 2022 or such subsequent date as DHS and DOL may establish by public Federal Register notice.

The practical implications of this are substantial. Many H-2B job orders for start dates in April 2022 and early May 2022 had no or virtually no active recruitment of U.S. workers through job postings on https://seasonaljobs.dol.gov/ or state job service websites. Significant numbers of H-2B applications for labor certification for the 3rd quarter of FY2022 were approved despite any significant U.S. worker recruitment. *See* annexed hereto as *Attachment A:* Email March 13, 2022 and March 10, 2022 Memorandum.

---

[3] *See also*, Congressional Research Service, "The H-2B Visa and the Statutory Cap", Report R44306 (Updated February 28, 2020) available at: https://crsreports.congress.gov/product/pdf/R/R44306/8

Local recruitment only on a state workforce agency job site fails to meet the requirements of the H-2B program to determine that there are *no* workers *in the United States* capable of performing the job. In addition, there is no effective mechanism for identifying these jobs on a national level.

Failure to Disclose Foreign Labor Recruiters Pursuant to 20 C.F.R. § 655.9

The failure of DOL and DHS to treat the substantial change in the date of need for supplemental visas as requiring an amendment to the job order has the further impact that the requirements of 20 C.F.R. § 655.9 requiring the public disclosure of foreign labor recruiters utilized by H-2B employers are not disclosed (or provided to DOL) where an employer determines to utilize a previously undisclosed foreign labor contractor.

This is particularly consequential for those employers who determine to utilize any of the 11,500 visas reserved for nationals of El Salvador, Guatemala, and Honduras (Northern Central American countries) and Haiti.

The failure of the instructions for the H-2B forms and the forms to require supplementation of foreign labor recruiters effectively nullifies the purpose of 20 C.F.R. § 655.9 where recruitment is by a foreign labor recruiter who was not previously disclosed.

Comments previously submitted in 2021 in Relationship to Supplemental H-2B Visa Rulemaking

On July 21, 2021 Justice at Work and CATA submitted comments pursuant to 86 Fed. Reg. 28198 (May 25 2021) as to these issues in relationship to the FY2021 supplemental visa cap. A copy thereof is annexed hereto as *Attachment B.*

Seafood Industry Staggered Crossings - Form ETA-9142B Seafood Attestation

DOL procedures have failed to implement the requirements of Congressional Appropriation language for seafood industry staggered crossing in the operation of its DOL OFLC job registry at https://seasonaljobs.dol.gov/. *See* DOL discussion of the Congressional requirements at: https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/H-2B_2015_IFR_FAQs_Round9.pdf.

Although those provisions (and proposed Form ETA-9142B Seafood Attestation)[4] require offering potential H-2B positions to any equal or better qualified U.S. workers, OFLC treats seafood industry jobs subject to the staggered crossings as inactive pursuant to 20 C.F.R. § 655.40(c) as of 21 days before the *first* date of need as opposed to the final date of need. In our review of seafood H-2B cases, it appears that the beginning date of need for seafood workers is frequently far in advance of the date on which most workers are brought into the U.S.

DOL needs to ensure that employers authorized to utilize the Seafood Industry staggered crossing rule continue to actively recruit U.S. workers throughout the staggered crossing dates.

[4] ETA-9142B Seafood Attestation at Part B(3) provides:

> 3. I will offer the job for which I seek to bring H-2B workers into the United States to any equally or better qualified U.S. workers who applies for the job and who indicates that they are be available at the time and place of need.

A failure to do so fails to meet the statutory requirements for the H-2B program that no workers in the U.S. are available for the positions.

Requirements for Eligibility for Jobs Through Prospective H-2B Employers

The H-2B forms and procedures fail to require employers to adequately demonstrate to DOL and to State Workforce Agencies (SWA's) that the minimum requirements to apply for H-2B jobs are appropriate requirements for those jobs.

DOL's H-2B public disclosure information for the H-2B program identifies many of the requirements that employers have been allowed to establish in order for a worker to apply for a position with a prospective H-2B employer.

Significantly prior to 2011 most H-2B employers for relatively low skill jobs imposed no pre-employment experience requirements on applicants for H-2B jobs, because the employers argued that the positions were "entry level" jobs entitled to be paid at lower wage rates. In its January 2011 rulemaking for the H-2B program,[5] DOL determined that the overwhelming majority of H-2B jobs were "low skill" H-2B jobs which required little prior training or experience. Specifically, DOL noted that its "O*Net Job Zone" system classified most H-2B jobs as Job Zone One positions requiring little or no prior training or experience. *See:* https://www.onetonline.org/help/online/zones.

However, since DOL eliminated the wage incentive for prospective H-2B employers to classify positions as "entry level" the percentage of Job Zone One positions requiring prior experience has expanded significantly. DOL public disclosure data for FY2021 H-2B determinations indicates that 24,862 of the Job Zone One certified H-2B positions had experience requirements. DOL and SWA's should carefully scrutinize such restrictions and ask more questions to determine the "specific vocational preparation" actually required for each such position as well as whether it is prevailing practice in each geographic area to have such experience requirements.

The availability of H-2B jobs for new entrants to the labor market including younger workers entering the job market is critical to avoiding unlimited employer demand for an ever-expanding H-2B program. Similarly, refugees and asylees are potential significant labor sources if not excluded from job eligibility by inappropriate prior experience requirements.

Significant numbers of approved H-2B labor certifications include requirements for U.S. worker applicants to complete criminal background checks (even where those are not completed on a pre-employment basis for H-2B workers). DOL and SWA's should obtain sufficient information on such requirements to determine if these are genuine job-related requirements rather than attempts to discourage applications for employment by U.S. workers.

Similarly, drug screening requirements are routinely accepted from prospective H-2B employers without efforts to determine if such requirements are employment related and prevailing practices rather than attempts to discourage applications for employment by U.S. workers.

---

[5] *See* 76 Fed. Reg. 3452 (Jan. 19, 2011)

Disclosure of Terms and Conditions of Employment

Unlike for the H-2A program DOL has never developed standardized job order disclosure forms requiring uniform disclosure of relevant terms and conditions of employment. The lack of uniformity and completeness of job disclosure is a serious problem for H-2B workers.

In the interim DOL should be directed to generate a publicly disclosable format of the ETA 9142B data for each H-2B application for labor certification. Unlike the inconsistent Job Orders developed by each SWA, the ETA 9142B contains consistent information about each job order.

Where H-2B employers offer housing that DOL H-2B forms should include disclosure of terms and conditions of availability of housing including the location of employer provided housing. All H-2B employer provided housing (especially the housing for mobile amusement and forestry employers) should be required to at a minimum comply with OSHA temporary labor camp standards and to meet minimum COVID-19 safety protocols.

Disclosure of Terms and Conditions of Employment in the Language of Workers

Although DOL has designed a computerized machine translation system for the summaries of H-2B job orders posted on https://seasonaljobs.dol.gov/, there is no procedure for review of such computerized machine translations despite extensive documentation of the inaccuracy of machine translation without review by bilingual interpreters.

Even more consequentially H-2B employers who overwhelmingly recruit workers in Spanish speaking countries are not required to provide DOL or include in posted job orders information about H-2B jobs in the native language of the foreign workers who will be the target of the foreign H-2B recruitment. This is despite requirements that the terms and conditions of employment must be disclosed in writing in the native language of the workers to H-2B workers. DOL should require all employers to post complete information about terms and conditions of employment in the language(s) of workers in the countries where they will engage in recruitment of H-2B workers. In addition, at least larger H-2B employers seeking more than 10 H-2B workers should be required to provide written information in the Spanish language even if that is not the language of the foreign workers who they are seeking to recruit.

The operation of the H-2B and H-2A recruitment systems by DOL and SWA's absent provisions for access by limited English proficient workers is a serious problem which should be addressed by DOL.

Eligibility of Current H-2B Workers to Transfer to Other Jobs

USCIS data indicates that significant numbers of H-2B workers obtained employment which did not count as a new visa entrant in relationship to the H-2B cap.

It is important that DOL and SWA's target full disclosure of available H-2B positions to such workers rather than making them captive to employers in relationship to changing jobs.

This requires the https://seasonaljobs.dol.gov/ and SWA's recognize the importance of disclosure to these workers of available jobs. It further requires that these workers obtain accurate information from USCIS as to the status of employer I-129 petitions under which they are potential beneficiaries. OMB should help coordinate USCIS and DOL and SWA duties in relationship to such workers.

Consistency of Data Disclosure by DOL and USCIS

Importantly, USCIS has created an "H-2B Employer Data Hub" available at: https://www.uscis.gov/tools/reports-and-studies/h-2b-employer-data-hub.

This is an important development. However, its effectiveness has been severely limited because of the failure of USCIS to implement tracking of approvals of H-2B I-129 petitions by DOL ETA case number. OMB should require that USCIS and DOL data can be tracked across agencies and work with the Department of State to make consular data similarly tracked to DOL labor certification decisions.

In the meantime, USCIS has adopted a procedure for identification of I-129 H-2B petitioning employers by including the last 4 digits of the employer Tax Identification number for each H-2B employer. DOL currently treats the employer tax identification number as non-disclosable, but should consistent with USCIS at least disclose the last 4 digits of the employer identification number so as to allow cross tracking with USCIS information.

Interagency Cooperation

In practice the H-2B program requires significant cross agency communication and cooperation. OMB could play an important role in ensuring that each of the agencies responsible for the H-2B program work effectively with each other and that the agencies better protect both domestic and foreign workers.

Re: H-2B Program FY2022 Labor Certifications and H-2B Visas

I am following up on some time critical issues relating to the H-2B program which were addressed at the February 25, 2022 Migration that Works meeting with each of your agencies, representatives of the White House, and the Department of State.

My immediate concern is the status of postings of information relating to applications for labor certification by H-2B employers for FY2022 Q3 and specifically the application of requirements that recruitment of U.S. workers and job order postings through https://seasonaljobs.dol.gov/ for all jobs that sought a April 1, 2022 start date will become *inactive* tomorrow on March 11, 2022.

Because prospective H-2B employers have learned over the past two years that **all** 33,000 cap eligible H-2B visas for the second half of a fiscal year will be allocated to employers seeking a start date of April 1, 2022, employers who might actually employ workers at a later start date overwhelmingly seek labor certification based on that date.

OFLC ETA DOL announced on its website https://www.dol.gov/agencies/eta/foreign-labor/news on January 4, 2022:

> **January 4, 2022. OFLC Conducts Randomization Process on H-2B Applications Submitted Requesting an April 1, 2022, Work Start Date.**
>
> The Office of Foreign Labor Certification has completed the randomization process to randomly assign all H-2B applications submitted during the initial three-day filing window, January 1-3, 2022, requesting an April 1, 2022, work start date for the second half of the

> Fiscal Year 2022 H-2B statutory visa cap.
>
> OFLC received a total of 7,875 H-2B applications requesting 136,555 worker positions during this filing period.

It was self-evident to everyone that as an initial matter USCIS would close the process of receipt of H-2B I-129 applications during February 2022 once a sufficient number of I-129 petitions to reach the 33,000 half year cap were received.

The USCIS cap count website announced on March 1, 2022:

> On March 1, 2022, USCIS announced that it had received a sufficient number of petitions to reach the congressionally mandated H-2B cap for the second half of FY 2022. Feb. 25, 2022 was the "final receipt date" for new cap-subject H-2B worker petitions requesting employment start dates on or after Apr. 1, 2022, and before Oct. 1, 2022. The "final receipt date" is the date on which USCIS determines that it has received enough cap-subject petitions to reach the limit of 33,000 H-2B workers for the second half of FY 2022.

See: https://www.uscis.gov/working-in-the-united-states/temporary-workers/h-2b-non-agricultural-workers/cap-count-for-h-2b-nonimmigrants

I have carefully examined OFLC available data as to H-2B applications processed through March 8, 2022 and divided those applications into four "status groups" for review. That data indicates the following:

Employer Applications for H-2B Jobs Beginning April 1, 2022

Status Group	Group Description	Cases	Workers Needed
1	January 2022 Accepted	2,081	34,978
2	Feb. 1-17 Accepted	1,299	21,484
3	Feb. 18 - March 8 Accepted	1,441	23,586
	Sub-Total	4,821	80,048
4	Pending	3,056	56,507
	Total	7,877	136,555

Status Group 1applications accepted by OFLC for public posting during January 2022 are the H-2B employer cases which were the most likely to have received full DOL OFLC approval in sufficient time for submission to USCIS prior to the February 25, 2022 cutoff date and are more than sufficient to have filled the 33,000 worker cap on available visas.

Status Group 2 applications accepted by OFLC for public posting during the period February 1 – 17, 2022 represent additional applications for H-2B labor certification that conceivably might have completed processing in time for potential submission to USCIS.

Information from USCIS to DOL OFLC as to which H-2B labor certification cases received H-2B visa approvals (or were accepted by USCIS on or before February 25, 2022 for processing) is critical for DOL to obtain from USCIS in order to inform the public as to which H-2B employers received cap-eligible H-2B visa authorizations from USCIS. This was an issue which we discussed on February 25.

However, it should have been clear to DOL OFLC that each application for H-2B labor certification processed by DOL OFLC after on or about February 18, 2022 would be for an

invalid unavailable April 1, 2022 start date. It is my understanding that USCIS regulations require the date of need to be accurately stated in an I-129 application and to be the date that was used for issuance of labor certification. See Seafood Staggered Crossing Congressional Appropriation riders creating an exception for those employers from these requirements.

As a result, it would be my position that as a matter of regulatory requirements DOL OFLC should require employers continuing to seek H-2B labor certifications for any potential supplemental visas to keep open the date of need for those positions and to hold off further labor certification decisions until non-cap barred visas become available.

This is obviously a critical issue in terms of recruitment of U.S. workers and I am hoping that you have identified a mechanism for keeping applications for H-2B labor certification for which visas are not available open for continued U.S worker recruitment.

There are numerous other issues which it would be critical to discuss in the context of issuance of supplemental visas including the various employer requirements that inhibit effective recruitment of U.S. workers. This includes pre-employment experience requirements for ONET Job Zone One positions requiring little or no prior experience, but also includes other barriers to effective national recruitment of available workers present in the U.S.

I am hoping it is possible to schedule further discussions on these issues and on the status of employers who received FY2022 Q1-2 H-2B visas including supplemental visas in the near future.

Thank you.

I have carefully examined OFLC available data as to H-2B applications processed through March 8, 2022 and divided those applications into four "status groups" for review. That data indicates the following:

Employer Applications for H-2B Jobs Beginning April 1, 2022

Status Group	Group Description	Cases	Workers Needed
1	January 2022 Accepted	2,081	34,978
2	Feb. 1-17 Accepted	1,299	21,484
3	Feb. 18 - March 8 Accepted	1,441	23,586
	Sub-Total	4,821	80,048
4	Pending	3,056	56,507
	Total	7,877	136,555

Status Group 1applications accepted by OFLC for public posting during January 2022 are the H-2B employer cases which were the most likely to have received full DOL OFLC approval in sufficient time for submission to USCIS prior to the February 25, 2022 cutoff date and are more than sufficient to have filled the 33,000 worker cap on available visas.

Status Group 2 applications accepted by OFLC for public posting during the period February 1 – 17, 2022 represent additional applications for H-2B labor certification that conceivably might have completed processing in time for potential submission to USCIS.

Information from USCIS to DOL OFLC as to which H-2B labor certification cases received H-2B visa approvals (or were accepted by USCIS on or before February 25, 2022 for processing) is critical for DOL to obtain from USCIS in order to inform the public as to which H-2B employers received cap-eligible H-2B visa authorizations from USCIS. This was an issue which we discussed on February 25.

However, it should have been clear to DOL OFLC that each application for H-2B labor certification processed by DOL OFLC after on or about February 18, 2022 would be for an invalid unavailable April 1, 2022 start date. It is my understanding that USCIS regulations require the date of need to be accurately stated in an I-129 application and to be the date that was used for issuance of labor certification. See Seafood Staggered Crossing Congressional

Appropriation riders creating an exception for those employers from these requirements.

As a result, it would be my position that as a matter of regulatory requirements DOL OFLC should require employers continuing to seek H-2B labor certifications for any potential supplemental visas to keep open the date of need for those positions and to hold off further labor certification decisions until non-cap barred visas become available.

This is obviously a critical issue in terms of recruitment of U.S. workers and I am hoping that you have identified a mechanism for keeping applications for H-2B labor certification for which visas are not available open for continued U.S worker recruitment.

There are numerous other issues which it would be critical to discuss in the context of issuance of supplemental visas including the various employer requirements that inhibit effective recruitment of U.S. workers. This includes pre-employment experience requirements for ONET Job Zone One positions requiring little or no prior experience, but also includes other barriers to effective national recruitment of available workers present in the U.S.

I am hoping it is possible to schedule further discussions on these issues and on the status of employers who received FY2022 Q1-2 H-2B visas including supplemental visas in the near future.

Thank you.

Very truly yours,

Arthur N. Read

Announcements

Calendar Year 2022

- **January 7, 2022. OFLC Publishes List of Randomized H-2B Applications Submitted January 1-3 for Employers Seeking H-2B Workers Starting April 1, 2022.**

  To keep the public informed regarding the submission and assignment of H-2B applications for review, the Office of Foreign Labor Certification (OFLC) published the assignment group(s) for 7,875 H-2B applications covering 136,555 worker positions with the start date of work of April 1, 2022.

  Following the randomization procedures published in the Federal Register on March 4, 2019, OFLC completed the randomization process on January 4 and assigned to National Processing Center analysts all H-2B applications placed in Assignment Group A for issuance of Notices of Deficiency or Acceptance. Group A includes enough worker positions to reach the H-2B semi-annual visa allotment of 33,000. Six additional Assignment Groups were created for the remaining applications, each of which includes no more than 20,000 worker positions.

  On January 4, 2022, OFLC provided written notice to each employer (and the employer's authorized attorney or agent) informing them about the Assignment Group for their application(s).

  - View the Assignment Groups for H-2B Applications Submitted January 1-3, 2022

- **January 4, 2022. OFLC Conducts Randomization Process on H-2B Applications Submitted Requesting an April 1, 2022, Work Start Date.**

  The Office of Foreign Labor Certification has completed the randomization process to randomly assign all H-2B applications submitted during the initial three-day filing window, January 1-3, 2022, requesting an April 1, 2022, work start date for the second half of the Fiscal Year 2022 H-2B statutory visa cap.

  OFLC received a total of 7,875 H-2B applications requesting 136,555 worker positions during this filing period.

  OFLC will be providing written notification to employers (and the employer's authorized attorney or agent) with their H-2B Assignment Group. On January 7, 2022, OFLC will also publish on its website the list of the H-2B applications assigned to each Assignment Group.

Attachment A

Fiscal Year 2022 H-2B Cap Count

On March 1, 2022, USCIS announced that it had received a sufficient number of petitions to reach the congressionally mandated H-2B cap for the second half of FY 2022. Feb. 25, 2022 was the "final receipt date" for new cap-subject H-2B worker petitions requesting employment start dates on or after Apr. 1, 2022, and before Oct. 1, 2022. The "final receipt date" is the date on which USCIS determines that it has received enough cap-subject petitions to reach the limit of 33,000 H-2B workers for the second half of FY 2022.

Cap Type	Cap Amount	Beneficiaries Approved	Beneficiaries Pending	Total Beneficiaries[1]	Date of Last Count
H-2B: First Half of FY 2022	33,000			On Sept. 30, 2021 the cap for the 1st half of FY 2022 was reached.	
H-2B: Second Half of FY 2022	33,000[2]			On Feb. 25, 2022, the cap for the 2nd half of FY 2022 was reached.	

Note: The figures above are preliminary estimates and are only meant to give the public an approximate count of beneficiaries of H-2B visas who would be counted towards the INA cap for the fiscal year.

[1] Refers to the total number of beneficiaries of approved or pending petitions filed with USCIS that could potentially be counted towards the H-2B cap. This number will typically exceed the actual cap to allow for withdrawals, denials, and approvals for which no visa is issued.

[2] If the first half of the fiscal year cap of 33,000 H-2B visas is not reached during the first half of the fiscal year, USCIS will make those unused numbers available for use during the second half of the fiscal year. Unused fiscal year cap-subject H-2B visas do not carry over to the following fiscal year.

Job Zone One: Little or No Preparation Needed

https://www.onetonline.org/help/online/zones#zone1

Related Experience	Little or no previous work-related skill, knowledge, or experience is needed for these occupations. For example, a person can become a waiter or waitress even if he/she has never worked before.
Job Training	Employees in these occupations need anywhere from a few days to a few months of training. Usually, an experienced worker could show you how to do the job.
Job Zone Examples	These occupations involve following instructions and helping others. Examples include food preparation workers, dishwashers, sewing machine operators, landscaping and groundskeeping workers, logging equipment operators, and baristas.

Re: **Comments on information collection Form ETA-9142B-CAA-4 Regulatory Information Number (RIN) 1205-AC07. 86 Fed Reg 28,198 (May 25 2021)**
Attestation for Employers Seeking to Employ H-2B Nonimmigrant Workers Under Section 105 of Division O of the Consolidated Appropriations Act, 2021 Public Law 116-260 (December 27, 2020)
Submitted through: https://www.regulations.gov/commenton/ETA_FRDOC_0001-0258

Dear Mr. Pasternak and Mr. Nimick:

These comments are submitted by the General Counsel of Justice at Work (Pennsylvania) on behalf of our client El Comité de Trabajadores Agrícolas (CATA) in response to the above published interim final rule promulgated without any opportunity for public notice and comment. The Federal Register notice at 86 Fed Reg 28,198 (May 25 2021) does *not* seek comment on the interim final rule, but *only* on Form ETA-9142B-CAA-4 which is posted at: https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/ETA_9142-B-CAA-4_508_Compliant_OMB_FINAL_05242021.pdf.

The joint adoption by DOL and DHS of this interim final rule and specifically the inadequate employer assurances incorporated into Form ETA-9142B-CAA-4 are grossly inadequate to meet the duty of the Departments of Labor and Homeland Security to secure information sufficient to make factual determinations of:

(i) Whether U.S. workers are available to perform temporary *employment in the United States*, for which an employer desires to employ nonimmigrant foreign workers, and

(ii) Whether the employment of aliens for such temporary work will adversely affect the wages or working conditions of similarly employed U.S. workers;

Direct: Arthur N. Read (215) 690-5687
E-mail: ***aread@justiceatworklegalaid.org***

See 20 C.F.R. § 655.0(a)(1). That DOL's regulation 20 CFR § 655.0 further provides: ™

> Once a determination of no adverse effect has been made*, the availability of U.S. workers can be tested only if U.S. workers are actively recruited through the offer of wages, terms, benefits, and conditions* at least at the minimum level or the level offered to the aliens, whichever is higher.

The Federal Register notice acknowledged that:

> The Secretary of Homeland Security and the Secretary of Labor heard from many trade unions and worker advocates who opposed raising the cap. They argued that the unemployment rate remains high. In particular, they provided evidence that the unemployment rate for summer-related occupations, such as landscaping workers, restaurant workers, construction workers and others, for which businesses were pressing for an increase in visas, exceeds the national average in unemployment. (36) They also pointed to what they consider weaknesses in the labor market test, and stated that some H-2B employers have violated labor laws, including requirements in the H-2B program.
>
> Fn 36 See: Department of Labor, Bureau of Labor Statistics, Labor Force Statistics from the Current Population Survey, Table A–30, available at https://www.bls.gov/web/empsit/cpseea30.htm.
> According to the March 2021 Current Population Survey, the unemployment rate for construction and landscaping workers was 9.5 percent and 9.9 percent, respectively, whereas the national unemployment rate was 6.2 percent.

86 Fed Reg at 28,203.

The Federal Register notice states"

> For all petitions filed under this rule and the H-2B program, generally, employers must establish, among other requirements, that insufficient qualified U.S. workers are available to fill the petitioning H-2B employer's job opportunity and that the foreign worker's employment in the job opportunity will not adversely affect the wages or working conditions of similarly-employed U.S. workers. INA section 214(c)(1), 8 U.S.C. 1184(c)(1); 8 CFR 214.2(h)(6)(iii)(A) and (D); 20 CFR 655.1. To meet this standard of protection for U.S. workers and, in order to be eligible for additional visas under this rule, employers must have applied for and received a valid TLC in accordance with 8 CFR 214.2(h)(6)(iv)(A) and (D) and 20 CFR part 655, subpart A. Under DOL's H-2B regulations, TLCs are valid only for the period of employment certified by DOL and expire on the last day of authorized employment. 20 CFR 655.55(a).
>
> In order to have a valid TLC, therefore, *the employment start date on the employer's H-2B petition must not be different from the employment start date certified by DOL on the TLC*. See 8 CFR 214.2(h)(6)(iv)(D). Under generally applicable DHS regulations, the only exception to this requirement applies when an employer files an amended visa petition, accompanied by a copy of the previously approved TLC and a copy of the initial visa petition approval notice, at

> a later date to substitute workers as set forth under 8 CFR 214.2(h)(6)(viii)(B). *This rule* also *requires additional recruitment for certain petitioners*, as discussed below.

86 Fed Reg at 28,204.

The Federal Register notice discusses 86 Fed Reg at 28,213-28,214 Section J. "DOL Procedures" purports to require employers who are seeking to employ H-2B workers for periods beginning after their prior asserted date of need for workers to engage in procedures to re-determine if there are U.S. workers available to perform the job for which H-2B workers are sought. Specifically:

> In addition to the recruitment already conducted in connection with a valid TLC, in order to ensure the recruitment has not become stale, employers that wish to obtain visas for their workers under 8 CFR 214.2(h)(6)(x), and who file an I-129 petition 45 or more days after the certified start date of work on the TLC *must conduct additional recruitment for U.S. workers. This is particularly important this year as U.S. workers have begun to, and will continue to, reenter the workforce as they become vaccinated and the COVID-19 emergency subsides*.
>
> As noted in the 2015 H-2B Interim Final Rule, U.S. workers seeking employment in temporary or seasonal nonagricultural jobs typically do not search for work months in advance, and cannot make commitments about their availability for employment far in advance of the work start date. See 80 FR 24041, 24061, 24071. Given that the temporary labor certification process generally begins 75 to 90 days in advance of the employer's start date of work, employer recruitment efforts typically occur between 40 and 60 days before that date with an obligation to provide employment to any qualified U.S. worker who applies until 21 days before the date of need. Therefore, *employers with TLCs containing a start date of work on April 1, 2021, likely conducted their positive recruitment beginning around late-January and ending around mid-February 2021, and continued to consider U.S. worker applicants and referrals only until March 11, 2021.*[1]

---

[1] Neither USCIS or DOL have identified to the public those employers who have (or are seeking) supplemental H-2B visas under this rule. This is a despite a request by the commenters to USCIS pursuant to FOIA to provide this information on an expedited basis. See attached June 21 and June 22, 2021 FOIA requests to USCIS. No response or acknowledgment of these requests has been received from USCIS. DOL OFLC has stated that it does not know which prospective H-2B employers have submitted these requests and that this information is only in the possession of USCIS.

On June 23, 2021 (after the above requests were submitted) USCIS announced an H-2B employer hub at: https://www.uscis.gov/news/alerts/uscis-launches-h-2b-employer-data-hub. See https://www.uscis.gov/tools/reports-and-studies/h-2b-employer-data-hub/understanding-our-h-2b-employer-data-hub and https://www.uscis.gov/tools/reports-and-studies/h-2b-employer-data-hub/h-2b-employer-data-hub-files. Although this portal will ultimately provide much of the information sought in the FOIA requests, no information on these supplemental H-2B certifications will be available until the Fall of 2021 long after the opportunity for U.S. workers to apply for these jobs has passed.

> In order to provide U.S. workers a realistic opportunity to pursue jobs for which employers will be seeking foreign workers under this rule, the Departments have determined that *if employers file an I-129 petition 45 or more days after their dates of need, they have not conducted recruitment recently enough for the Departments to reasonably conclude that there are currently an insufficient number of U.S. workers who are qualified, willing, and available to perform the work absent taking additional, positive recruitment steps*. The 45-day threshold for additional recruitment identified in this rule reflects a timeframe between the end of the employer's recruitment and filing of the petition similar to that provided under the FY 2018 and FY 2019 H-2B supplemental cap rules.
>
> * * *
>
> The employer must place a new job order for the job opportunity with the State Workforce Agency (SWA) serving the area of intended employment no later than the next business day after submitting an I-129 petition for H-2B workers to USCIS. The job order must contain the job assurances and contents set forth in 20 CFR 655.18 for recruitment of U.S. workers at the place of employment, and remain posted for at least 15 calendar days. The employer must also follow all applicable SWA instructions for posting job orders and receive applications in all forms allowed by the SWA, including online applications. The Departments have concluded that keeping the job order posted for a period of 15 calendar days, during the period the employer is conducting the additional recruitment steps

---

Because of the lottery prioritization of FY2021Q3 H-2B applications with April 1, 2021 start of employment dates thousands of H-2B positions were only briefly open to U.S. workers through the DOL https://seasonaljobs.dol.gov/ portal before being classified as inactive on March 11, 2021. *See* https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/H2B-Randomization-List-January-2021.pdf. OFLC stated on January 7, 2021:

> Following the randomization procedures published in the Federal Register on March 4, 2019, OFLC completed the randomization process on January 5 and assigned to National Processing Center analysts all H-2B applications placed in Assignment Group A for issuance of Notices of Deficiency or Acceptance. Group A includes enough worker positions to reach the H-2B semi-annual visa allotment of 33,000. Four additional Assignment Groups (Groups B-E) were created for the remaining applications, each of which includes no more than 20,000 worker positions.

https://www.dol.gov/agencies/eta/foreign-labor/news.

A review of postings on https://seasonaljobs.dol.gov/ confirms that no priority Group E employer had a job listing posted before February 25, 2021. None of those jobs were posted for more than 14 days before being listed as inactive on March 11, 2021. Similarly, at least 162 priority Group D employer listings were posted on or after February 25, 2021. In all 290 H-2B employer applications for April 1, 2021 start dates for employment were posted on or after February 25, 2021 and these postings covered 4,738 prospective H-2B jobs.

> explained below, will effectively ensure U.S. workers are apprised of the job opportunity and are referred for employment, if they are willing, qualified, and available to perform the work. The 15 calendar day period also is consistent with the employer-conducted recruitment activity period applicable under 20 CFR 655.40(b).
>
> The employer also must conduct additional recruitment steps during the period of time the SWA is actively circulating the job order for ***intrastate*** clearance.[2] First, the employer must contact, by email or other electronic means, the nearest American Job Center(s) (AJC) offering business services and serving the area of intended employment where work will commence to request staff assistance to advertise and recruit U.S. workers for the job opportunity…
>
> * * *
>
> The requirements to contact former U.S. workers and provide notice to the bargaining representative or post the job order ***must be conducted in a language understood by the workers***, as necessary or reasonable.[3] This requirement would apply, for example, in situations where an employer has one or more employees who do not speak English as their primary language and who have a limited ability to read, write, speak, or understand English. This requirement would allow those workers to make informed decisions regarding the job opportunity, and is a reasonable interpretation of the recruitment requirements in 20 CFR part 655,

---

[2] The limitation requiring only "intrastate" recruitment and the absence of national posting of these prospective H-2B jobs on the DOL's own temporary foreign worker portal at https://seasonaljobs.dol.gov/ has effectively removed all of these applications for H-2B employment from testing whether U.S. workers are available to perform temporary *employment in the United States* as required by 20 C.F.R. § 655.0(a)(1). This is particularly true for H-2B employers offering jobs in labor markets covering more than one state and for employment involving multiple states.

[3] This recognition that significant numbers of U.S. workers who might consider H-2B jobs do not speak English as their primary language and who have a limited ability to read, write, speak, or understand English is a potentially critical change to the failure of prospective H-2B employers to include in internet posted H-2B jobs the terms and conditions of the jobs order in languages other than English even when the employer is theoretically required to provide that same information to foreign H-2B workers whose native language is other than English. In particular, data for the H-2B program indicates that an overwhelming percentage of H-2B foreign workers are recruited in Spanish speaking countries. Despite this virtually no job orders posted by prospective H-2B employers on https://seasonaljobs.dol.gov/ and state workforce job sites contain Spanish language disclosure of terms and conditions of employment.

It should also be noted, as DOL has acknowledged, that DOL's H-2 recruitment website at https://seasonaljobs.dol.gov/ cannot be searched in a language other than English. This is an apparent violation of the requirements of Executive Order 13166 of August 11, 2000. *See https://www.lep.gov/executive-order-13166* and administrative guidance for federal agencies and recipients of federal funds.

> subpart A, in light of the need to ensure that the test of the U.S. labor market is as comprehensive as possible. Consistent with existing language requirements in the H-2B program under 20 CFR 655.20(l), DOL intends to broadly interpret the necessary or reasonable qualification, and apply an exemption only in those situations where having the job order translated into a particular language would both place an undue burden on an employer and not significantly disadvantage the employee.
>
> The employer must hire any qualified U.S. worker who applies or is referred for the job opportunity until either (1) the date on which the last H-2B worker departs for the place of employment, or (2) 30 days after the last date on which the SWA job order is posted, whichever is later. Additionally, consistent with 20 CFR 655.40(a), *applicants may be rejected only for lawful job-related reasons*.[4] Given that the employer, SWA, and AJC(s) will be actively engaged in conducting

[4] Many employers in both the H-2A and H-2B programs have established extensive restrictive requirements which have the clear effect of discouraging and preventing significant numbers of unemployed U.S. workers from even apply for those jobs.

DOL ETA OFLC representatives have stated in stakeholder meetings hosted by DOL that DOL will approve prior experience requirements of up to three months prior experience even in those O*NET Job Zone One jobs requiring little or no prior training or experience to perform those jobs. DOL has previously held in rulemaking for the H-2B program that most H-2B positions are for Job Zone One positions. *See* https://www.onetonline.org/find/zone?z=1&g=Go and explanation at https://www.flcdatacenter.com/svp.aspx:

> Specific Vocational Preparation is defined as the amount of lapsed time required by a typical worker to learn the techniques, acquire the information, and develop the facility needed for average performance in a specific job-worker situation.
>
> * * *
>
> The following is an explanation of the various level of specific vocational preparation [which are included in Job Zone One jobs]:
>
> SVP 1 - Short demonstration only
> SVP 2 - Anything beyond short demonstration up to and including 1 month
> SVP 3 - Over 1 month up to and including 3 months

It should also be noted that pre-employment drug screening (including for drugs that are permitted to be used in particular states) and bars on considering applications for employment for individuals with prior criminal convictions have a significant impact on discouraging applications from many U.S. workers for positions for which neither of these issues would be an appropriate bar to employment.

OFLC has routinely accepted applications for temporary labor H-2B certification with all of these restrictions without requiring employers to demonstrate that they are typical requirements by other employers in the area of employment for the type of position for which H-2B labor certification is sought.

> recruitment and broader dissemination of the job opportunity during the period of time the job order is active, this requirement provides an adequate period of time for U.S. workers to contact the employer or SWA for referral to the employer and completion of the additional recruitment steps described above. As explained above, the Departments have determined that if employers file a petition 45 or more days after their dates of need, they have not conducted recruitment recently enough for the Departments to reasonably conclude that there are currently an insufficient number of U.S. workers qualified, willing, and available to perform the work absent additional recruitment.

See 86 Fed Reg at 28,213-28,214.

The employer certifications as to supplemental H-2B recruitment in Part E of Form ETA-9142B-CAA-4 are wholly inadequate to meet the responsibilities of the Departments under the H-2B program to determine that no U.S. workers are available for the positions for which H-2B workers are sought.

Foreign Labor Recruitment from the Northern Triangle

The May 25, 2021 interim final rule and Form ETA-9142B-CAA-4 also fail in a separate critical area relating to meeting DOL's responsibility under its regulations to publish a listing of foreign labor recruiters where employers sought to utilize the incentives to recruit from the Northern Triangle area. See 20 C.F.R. § 655.9 and https://www.dol.gov/agencies/eta/foreign-labor/recruiter-list.

DOL has acknowledged that it has made no provision for requiring employers to update information previously provided to DOL where the employer is utilizing a foreign labor recruiter not previously identified. This is a critical issue which the Departments can rectify by requiring all employers to disclose the identity of recruiters identified by an employer subsequent to the date of their initial application for labor certification.

Disclosure of Information to H-2B Workers Changing Employers

These regulations and the procedures of USCIS fail to adequately protect H-2B workers present in the country who are changing employers as permitted under these regulations. It is critical that such workers can confirm that an employer has authorization to offer them continuing employment under these regulations and USCIS needs to establish a mechanism for H-2B workers to directly confirm that they have continuing authorization to remain employed in the U.S. The failure to provide for this exposes H-2B workers to serious potential for labor trafficking and employer abuse.

Protection of Workers from COVID-19

It remains critical for the Departments to proactively address protecting workers employed by employers seeking to utilize the H-2B program from continuing dangers from COVID-19. The May 25, 2021 rule and its implementing forms are insufficient in this regard.

The Departments Should Actively Address the Issues Raised in This Comment ™

Most of the deficiencies with the May 25, 2021 rule and implementing Form ETA-9142B-CAA-4 have been previously brought to the attention of DOL, but is critical that the Departments carefully review and respond to the issues raised herein.

We are happy to discuss these issues further with the agencies together with the many other critical issues relating to the deficiencies in worker protection under the H-2B program.

Very truly yours,

Arthur N. Read, Esq.
