

PICTURED ABOVE: on August 14, 2023 we had Assistant Secretary For Electricity Gene Rodrigues Deputy Chief of Staff to the Secretary Bridget Bartol, Miles Fernandez Chief of Staff of The Office of Electricity, and Zack Valdez Chief of Staff for the Office of Manufacturing and Energy Supply Chains pose in front of our filled to capacity Hilltop Shipping coil field. As such, no customers were experiencing delays in transformer manufacturing related to supply issues related to Butler Works' G.O.E.S.

PICTURED ABOVE: on August 14, 2023 we had Assistant Secretary For Electricity Gene Rodrigues Deputy Chief of Staff to the Secretary Bridget Bartol, Miles Fernandez Chief of Staff of The Office of Electricity, and Zack Valdez Chief of Staff for the Office of Manufacturing and Energy Supply Chains pose in front of our filled to capacity Main Plant Shipping coil field. The plastic wrapped and palletized coils are of finished Grain Oriented Electrical Steel, waiting to be picked up from customers, who were backed up due to other supply chain issues. Not at all however, due to a shortage of GOES products from the Butler Works, as can easily be seen in the picture.
